

CRS Report for Congress

Received through the CRS Web

Interior, Environment, and Related Agencies: FY2007 Appropriations

Updated June 1, 2006

Carol Hardy Vincent, Co-coordinator
Specialist in Natural Resources
Resources, Science, and Industry Division

Susan Boren, Co-coordinator
Specialist in Social Legislation
Domestic Social Policy Division

The annual consideration of appropriations bills (regular, continuing, and supplemental) by Congress is part of a complex set of budget processes that also encompasses the consideration of budget resolutions, revenue and debt-limit legislation, other spending measures, and reconciliation bills. In addition, the operation of programs and the spending of appropriated funds are subject to constraints established in authorizing statutes. Congressional action on the budget for a fiscal year usually begins following the submission of the President's budget at the beginning of the session. Congressional practices governing the consideration of appropriations and other budgetary measures are rooted in the Constitution, the standing rules of the House and Senate, and statutes, such as the Congressional Budget and Impoundment Control Act of 1974.

This report is a guide to one of the regular appropriations bills that Congress considers each year. It is designed to supplement the information provided by the House Appropriations Subcommittee on Interior, Environment, and Related Agencies and the Senate Appropriations Subcommittee on Interior and Related Agencies. It summarizes the status of the Interior, Environment, and Related Agencies appropriations bill, its scope, major issues, funding levels, and related congressional activity, and is updated as events warrant. The report lists the key CRS staff relevant to the issues covered and related CRS products.

NOTE: A Web version of this document with active links is available to congressional staff at [\[http://beta.crs.gov/cli/level_2.aspx?PRDS_CLI_ITEM_ID=73\]](http://beta.crs.gov/cli/level_2.aspx?PRDS_CLI_ITEM_ID=73).

Interior, Environment, and Related Agencies: FY2007 Appropriations

Summary

The FY2007 Interior, Environment, and Related Agencies appropriations bill includes funding for the Department of the Interior (DOI), except for the Bureau of Reclamation, and for two agencies within other departments — the Forest Service within the Department of Agriculture and the Indian Health Service within the Department of Health and Human Services. It also includes funding for arts and cultural agencies; the Environmental Protection Agency, which was recently transferred to the appropriations subcommittees that deal with Interior and Related Agencies; and numerous other entities and agencies.

On May 18, 2006, the House passed H.R. 5386, providing \$25.94 billion for Interior, Environment, and Related Agencies for FY2007. The House-passed level would be a \$141.8 million (1%) decrease from the FY2006 enacted level of \$26.09 billion, but a \$412.0 million (2%) increase over the President's request for FY2007 of \$25.53 billion. Among the proposed decreases in the House-passed bill for FY2007, from the FY2006 level, are the following:

- \$-99.5 million (4%) for the National Park Service (NPS);
- \$-65.5 million (2%) for the Forest Service (FS);
- \$-55.4 million (4%) for the Fish and Wildlife Service (FWS);
- \$-48.7 million (1%) for the Environmental Protection Agency (EPA);
- \$-39.6 million (2%) for the Bureau of Indian Affairs (BIA); and
- \$-38.7 million (17%) for the Office of Special Trustee for American Indians.

Among the increases for FY2007 were the following:

- \$148.4 million (5%) for the Indian Health Service (IHS);
- \$31.2 million (2%) for the Bureau of Land Management (BLM);
- \$15.8 million (2%) for the U.S. Geological Survey (USGS);
- \$9.0 million (1%) for the Smithsonian Institution; and
- \$5.0 million (4%) for each of the National Endowment for the Arts (NEA) and the National Endowment for the Humanities (NEH).

The House considered many amendments to H.R. 5386 and agreed to a number of them. They included amendments to prohibit funds in the bill from being used for the sale or slaughter of wild horses and burros, building roads in the Tongass National Forest in Alaska for harvesting timber, limiting the outreach programs of the Smithsonian Institution, and issuing new lease sales to current Outer Continental Shelf (OCS) oil and gas lessees who do not have price thresholds in their leases. The House also retained the moratoria on OCS leasing, and increased funds for the NEA, NEH, and Payments in Lieu of Taxes program, among other changes. This report will be updated as action occurs.

Interior, Environment, and Related Agencies: FY2007 Appropriations

Most Recent Developments

On May 18, 2006, the House passed H.R. 5386, the FY2007 Interior, Environment, and Related Agencies appropriations bill containing \$25.94 billion.

Introduction

The FY2007 Interior, Environment, and Related Agencies appropriations bill includes funding for agencies and programs in three separate federal departments, as well as numerous related agencies and bureaus. The bill provides funding for Department of the Interior (DOI) agencies (except for the Bureau of Reclamation, funded in Energy and Water Development appropriations laws), many of which manage land and other natural resource or regulatory programs. The bill also provides funds for agencies in two other departments: the Forest Service in the Department of Agriculture, and the Indian Health Service in the Department of Health and Human Services, as well as funds for the Environmental Protection Agency. Further, the FY2007 bill includes funding for arts and cultural agencies, such as the Smithsonian Institution, National Gallery of Art, National Endowment for the Arts, and National Endowment for the Humanities, and for numerous other entities and agencies.

In recent years, the appropriations laws for Interior and Related Agencies provided funds for several activities within the Department of Energy (DOE), including research, development, and conservation programs; the Naval Petroleum Reserves; and the Strategic Petroleum Reserve. However, at the outset of the 109th Congress, these DOE programs were transferred to the House and Senate Appropriations subcommittees covering energy and water, to consolidate jurisdiction over DOE.¹ At the same time, jurisdiction over the Environmental Protection Agency (EPA), and several smaller entities, was moved to the House and Senate Appropriations subcommittees covering Interior and Related Agencies.² This change resulted from the abolition of the House and Senate Appropriations Subcommittees on Veterans Affairs, Housing and Urban Development, and Independent Agencies, which previously had jurisdiction over EPA.

¹ The House panel is called the Subcommittee on Energy and Water Development and Related Agencies. The Senate panel is entitled the Subcommittee on Energy and Water.

² The House panel is called the Subcommittee on Interior, Environment, and Related Agencies. The Senate panel is entitled the Subcommittee on Interior and Related Agencies.

The FY2006 Interior, Environment, and Related Agencies appropriations law contained three primary titles providing funding. The FY2007 legislation follows a similar organization, and this report is organized along these lines. Accordingly, the first section (Title I) provides information on Interior agencies; the second section (Title II) discusses EPA; and the third section (Title III) addresses other agencies, programs, and entities. A fourth section of this report discusses cross-cutting topics that encompass more than one agency.

In general, in this report the term *appropriations* represents total funds available, including regular annual and supplemental appropriations, as well as rescissions, transfers, and deferrals, but excludes permanent budget authorities. Increases and decreases generally are calculated on comparisons between FY2007 funding levels for the most recent action, and those requested by the President for FY2007 and appropriated for FY2006. The House Committee on Appropriations is the primary source of the funding figures used throughout the report. Other sources of information include the Senate Committee on Appropriations, agency budget justifications, and the *Congressional Record*. In the tables throughout this report, some columns of funding figures do not add to the precise totals provided due to rounding.

FY2007 Budget and Appropriations

Current Overview

On May 18, 2006, the House passed H.R. 5386, providing \$25.94 billion for Interior, Environment, and Related Agencies for FY2007. The House-passed level would be a \$141.8 million (1%) decrease from the FY2006 enacted level of \$26.09 billion, but a \$412.0 million (2%) increase over the President's request for FY2007 of \$25.53 billion. Among the proposed decreases in the House-passed bill for FY2007, from the FY2006 level, are the following:

- \$-99.5 million (4%) for the National Park Service (NPS);
- \$-65.5 million (2%) for the Forest Service (FS);
- \$-55.4 million (4%) for the Fish and Wildlife Service (FWS);
- \$-48.7 million (1%) for the Environmental Protection Agency (EPA);
- \$-39.6 million (2%) for the Bureau of Indian Affairs (BIA); and
- \$-38.7 million (17%) for the Office of Special Trustee for American Indians.

Among the increases for FY2007 were the following:

- \$148.4 million (5%) for the Indian Health Service (IHS);
- \$31.2 million (2%) for the Bureau of Land Management (BLM);
- \$15.8 million (2%) for the U.S. Geological Survey (USGS);
- \$9.0 million (1%) for the Smithsonian Institution; and
- \$5.0 million (4%) for each of the National Endowment for the Arts (NEA) and the National Endowment for the Humanities (NEH).

The House considered many amendments to H.R. 5386, and agreed to a number of them. They included amendments to prohibit funds in the bill from being used for the sale or slaughter of wild horses and burros, building roads in the Tongass National Forest in Alaska for harvesting timber, limiting the outreach programs of the Smithsonian Institution, and issuing new lease sales to current Outer Continental Shelf (OCS) oil and gas lessees who do not have price thresholds in their leases. The House also retained the moratoria on OCS leasing, and increased funds for the NEA, NEH, and Payments in Lieu of Taxes program, among other changes.

In earlier action, on May 15, 2006, the House Appropriations Committee reported H.R. 5386 (H.Rept. 109-465), also with \$25.94 billion for Interior, Environment, and Related Agencies for FY2007. The House Appropriations Committee adopted a number of amendments during its markup before ordering the bill reported.

Table 1 below shows the budget authority for Interior, Environment, and Related Agencies for FY2004-2006. See **Table 25** for a budgetary history of each agency for FY2004-FY2006, the President's budget request for FY2007, and the House-passed levels for FY2007.

**Table 1. Interior, Environment, and Related Agencies
Appropriations, FY2004 to FY2006**

(budget authority in billions of current dollars)

FY2004	FY2005	FY2006
\$27.33	\$27.02	\$26.09

Note: These figures exclude permanent budget authorities, and generally do not reflect scorekeeping adjustments. They generally reflect rescissions and supplemental appropriations to date.

Major Issues

One issue being debated in this appropriations cycle is the distribution of proceeds from land sales under the Federal Land Transaction Facilitation Act (FLTFA). This issue is covered briefly in the "Bureau of Land Management" section, below. Another issue being debated is the sale of certain National Forest System lands. This issue is covered briefly in the "Forest Service" section, below. The President's FY2007 budget assumed enactment of legislation to open part of the Coastal Plain in the Arctic National Wildlife Refuge to oil and gas exploration and development. This issue is covered briefly in the "Fish and Wildlife Service" section, below. (For more information, see CRS Issue Brief IB10136, *Arctic National Wildlife Refuge (ANWR): Controversies for the 109th Congress*, by M. Lynne Corn, Bernard A. Gelb, and Pamela Baldwin.)

Controversial policy and funding issues typically have been debated during consideration of the annual Interior, Environment, and Related Agencies Appropriations bill. Debate on FY2007 funding levels encompasses a variety of issues, many of which have been controversial in the past, including the issues listed below.

- *BIA Schools and IHS Hospitals*, particularly whether to enact funding cuts proposed in the President's FY2007 budget. (For more information, see the "Bureau of Indian Affairs" and the "Indian Health Service" sections in this report.)
- *Clean Water and Drinking Water State Revolving Funds*, especially the adequacy of funding to meet state and local wastewater and drinking water needs. These state revolving funds provide seed money for state loans to communities for wastewater and drinking water infrastructure projects. (For more information, see the "Environmental Protection Agency" section in this report.)
- *Indian Trust Funds*, especially the method by which an historical accounting will be conducted of Individual Indian Money (IIM) accounts to determine correct balances in the class-action lawsuit against the government involving tribal and IIM accounts. (For more information, see the "Office of Special Trustee for American Indians" section in this report.)
- *Land Acquisition*, including the appropriate level of funding for the Land and Water Conservation Fund for federal land acquisition and the state grant program, and extent to which the fund should be used for activities not involving land acquisition. (For more information, see "The Land and Water Conservation Fund (LWCF)" section in this report.)
- *Outer Continental Shelf Leasing*, particularly the moratoria on preleasing and leasing activities in offshore areas, and oil and gas leases in offshore California. (For more information, see the "Minerals Management Service" section in this report.)
- *Payments in Lieu of Taxes Program (PILT)*, primarily the appropriate level of funding for compensating local governments for federal land within their jurisdictions. (For more information, see the "Payments in Lieu of Taxes Program (PILT)" section in this report.)
- *Royalty Relief*, especially the extent to which oil and natural gas companies receive royalty relief for production of oil and natural gas on federal lands. (For more information see "MMS" section of this report.)
- *Smithsonian Institution*, in particular its contract with CBS/Showtime that gives certain rights to Showtime in accessing the Smithsonian's collection. (For more information see the "Smithsonian Institution" section of this report.)
- *Superfund*, notably the adequacy of proposed funding to meet hazardous waste cleanup needs, and whether to continue using general Treasury revenues to fund the account or reinstate a tax on

industry that originally paid for most of the program. (For more information, see the “Environmental Protection Agency” section in this report.)

- *Wildland Fire Fighting*, involving questions about the appropriate level of funding to fight fires on agency lands; advisability of borrowing funds from other agency programs to fight wildfires; implementation of a new program for wildland fire protection and locations for fire protection treatments; and impact of environmental analysis, public involvement, and challenges to agency decisions on fuel reduction activities. (For more information, see the “Bureau of Land Management” and “Forest Service” sections in this report.)

Status of Bill

Table 2 below will contain information on congressional consideration of the FY2007 Interior appropriations bill as it occurs.

Table 2. Status of Interior, Environment, and Related Agencies Appropriations, FY2007

Subcommittee Markup		House Report	House Passage	Senate Report	Senate Passage	Conf. Report	Conference Report Approval		Public Law
House	Senate						House	Senate	
5/04/06		H.R. 5386, H.Rept. 109-465 5/15/06	H.R. 5386, (293-128) 5/18/06						

Title I: Department of the Interior

Bureau of Land Management

Overview. The Bureau of Land Management (BLM) manages approximately 261 million acres of public land for diverse and sometimes conflicting uses, such as energy and minerals development, livestock grazing, recreation, and preservation. The agency also is responsible for about 700 million acres of federal subsurface mineral resources throughout the nation, and supervises the mineral operations on an estimated 56 million acres of Indian Trust lands. Another key BLM function is wildland fire management on about 370 million acres of DOI, other federal, and certain nonfederal land.

For FY2007, the House approved \$1.79 billion for BLM. This would be an increase of \$31.2 million (2%) from the FY2006 enacted level of \$1.75 billion and nearly the same as the Administration’s FY2007 request. See **Table 3** below.

The Administration's FY2007 budget suggested amending the Federal Land Transaction Facilitation Act (FLTFA) to alter the distribution of proceeds from land sales. Under current law, proceeds are deposited into a separate Treasury account and are available primarily for land acquisition. The President's proposal would direct 70% of the proceeds to the general fund of the Treasury to help reduce the deficit. Legislation would be needed to make this change. The House did not include such a proposal in its FY2007 bill. In last year's budget request, the President proposed amending the Southern Nevada Public Land Management Act (SNPLMA) to change the allocation of proceeds of BLM land sales in Nevada, but the proposal has not been enacted. These land sales in Nevada have generated significantly more proceeds than the land sales under FLTFA.

Management of Lands and Resources. For Management of Lands and Resources, the House approved \$867.7 million, a \$20.1 million (2%) increase over the FY2006 enacted level of \$847.6 million. This line item includes funds for an array of BLM land programs, including protection, recreational use, improvement, development, disposal, and general BLM administration. The House agreed with the Administration's approach to decrease funds for some programs from FY2006, including rangelands; soil, air, and water; cadastral surveys; land conveyances in Alaska; and annual and deferred maintenance.

The House also agreed with the Administration's approach to increase funds for some programs over FY2006, although in some cases the House approved less of an increase than the Administration had sought. For instance, for cultural resources, the request was \$18.1 million, up \$3.1 million (21%) from the FY2006 enacted level of \$15.0 million, but the House approved \$16.6 million. The increase over FY2006 is for a long-term initiative to inventory, monitor, stabilize, and protect cultural resources. For energy and minerals, the request was \$134.7 million, an increase of \$24.3 million (22%) over FY2006 (\$110.4 million, including Alaska minerals); the House supported \$133.0 million. The overall increase is intended to foster access to energy resources on federal lands. A portion would be used to process the growing number of Applications for Permits to Drill, and for related inspection, enforcement, and monitoring. Another portion would accelerate implementation of an oil shale development program. Further, the budget assumes that Congress will enact legislation in 2006 to open the Arctic National Wildlife Refuge (ANWR) to development. Thus, an increase is sought for preparing and implementing an ANWR leasing program and for management of energy development activities in the National Petroleum Reserve — Alaska.

In other cases, the House included increases over FY2006 for programs the Administration had sought to cut. For instance, the House approved \$67.0 million for recreation management, a 3% increase over FY2006. The House also included \$20.1 million for resource protection and law enforcement, a 6% increase over FY2006, in part for law enforcement along the southwest border.

The House-passed bill would continue to bar funds from being used for energy leasing activities within the boundaries of national monuments, as they were on January 20, 2001, except where allowed by the presidential proclamations that created the monuments. The law also continued the moratorium on accepting and processing applications for patents for mining and mill site claims on federal lands.

However, applications meeting certain requirements that were filed on or before September 30, 1994, would be allowed to proceed, and third party contractors would be authorized to process the mineral examinations on those applications.

The House agreed to an amendment to prohibit funds in the bill from being used for the sale or slaughter of wild horses and burros (as defined in P.L. 92-195). Amendment proponents seek to prevent BLM from selling, during FY2007, excess wild horses and burros under authority enacted in P.L. 108-447. According to BLM, 41 animals that were sold under that authority were subsequently resold or traded, and then sent to slaughterhouses by the new owners. Advocates of the amendment assert that there are alternatives for controlling populations of wild horses on federal lands, such as fertility control. Opponents of a similar amendment to last year's appropriations bill contended that BLM's changes to the sale procedure would prevent animals from being slaughtered. They maintained that sale authority was needed because adoptions and other efforts to reduce herd sizes have been insufficient. Further, they asserted that significant funds used for caring for animals in holding facilities could be redirected to other government priorities. Although the House passed a similar amendment to the FY2006 Interior appropriations bill, the provision was not enacted.

Wildland Fire Management. For Wildland Fire Management for FY2007, the House approved \$769.3 million, a \$14.0 million increase (2%) over the \$755.3 million enacted for FY2006 and nearly identical (\$0.3 million less) to the Administration's request. The increase is intended primarily for fire suppression, which would rise \$26.3 million (11%), from \$230.7 million in FY2006 to \$257.0 million. The FY2007 House-passed level represents the 10-year average cost of fire suppression. In report language, the House Appropriations Committee expressed continued concern with the high costs of fire suppression, and directed DOI and the FS to examine fires with suppression costs exceeding \$10.0 million. The increase for suppression is partially offset by reductions in other areas. For instance, there is a decrease of \$8.3 million (4%, to \$199.8 million) for hazardous fuels reduction. Also, funds for state and local fire assistance would be eliminated, on the grounds that assistance for local fire departments will be provided through other programs. The FY2006 funding level for state and local fire assistance was \$9.9 million.

The wildland fire funds appropriated to BLM are used for fire fighting on all Interior Department lands. Interior appropriations laws also provide funds for wildland fire management to the Forest Service (Department of Agriculture) for fire programs primarily on its lands. A focus of both departments is implementing the Healthy Forests Restoration Act of 2003 (P.L. 108-148) and the National Fire Plan, which emphasize reducing hazardous fuels which can contribute to catastrophic fires. In report language, the House Appropriations Committee expressed that the FS and DOI "do not have a suitable or comprehensive plan and strategy to deal with the Nation's wildfire management needs," and directed the development and implementation of a comprehensive and cohesive strategy (H.Rept. 109-465, p. 18). The Committee also stated that it is still not clear that hazardous fuels funding is being used for priority projects and an expectation that DOI provide a report on how funding is to be prioritized and allocated. Committee report language, and provisions of the House-passed bill, seek to address other concerns, including the sufficiency of readiness for fire fighting and the cost and utility of the fire program analysis system.

The program is being developed by DOI and the FS to determine the best distribution of firefighting resources. (For additional information on wildland fires, see the “Forest Service” section in this report.)

Construction and Land Acquisition. For FY2007, the House approved \$11.5 million for BLM Construction, a 2% decrease from the FY2006 level (\$11.8 million). The Administration had requested \$6.5 million, a 45% decrease. For Land Acquisition for FY2007, the House approved \$3.1 million, a \$5.6 million cut (64%) from the FY2006 level (\$8.6 million) and \$5.7 million (65%) less than requested by the Administration. In report language, the House Appropriations Committee stated that new land acquisition is a low priority. The appropriation for BLM acquisitions has fallen steadily from \$49.9 million in FY2002 to \$8.6 million for FY2006. Money for land acquisition is appropriated from the Land and Water Conservation Fund. (For more information, see the “Land and Water Conservation Fund (LWCF)” section in this report.)

Table 3. Appropriations for the Bureau of Land Management, FY2006-FY2007
(\$ in millions)

Bureau of Land Management	FY2006 Approp.	FY2007 Request	FY2007 House Passed
Management of Lands and Resources	\$847.6	\$863.2	\$867.7
Wildland Fire Management	755.3	769.6	769.3
— Preparedness	268.8	274.8	274.8
— Suppression	230.7	257.0	257.0

CRS Issue Brief IB10076. *Bureau of Land Management (BLM) Lands and National Forests*, by Ross W. Gorte and Carol Hardy Vincent, coordinators.

Fish and Wildlife Service

For FY2007, the President requested \$1.29 billion for the Fish and Wildlife Service (FWS), 4% less than FY2006 (\$1.35 billion). The House approved \$1.9 billion less than the request. By far the largest portion of the FWS annual appropriation is for the Resources Management account. The President's FY2007 request was \$995.6 million, a 1% decrease from the FY2006 level of \$1.00 billion. The House approved \$1.02 billion. Among the programs included in Resources Management are the Endangered Species program, the Refuge System, and Law Enforcement.

In addition, the President's FY2007 budget proposed enacting legislation to open part of the Coastal Plain in the Arctic National Wildlife Refuge (ANWR) to oil and gas exploration and development.³ The budget proposed that the first lease sale would be held in FY2008. Under the proposal, this and subsequent sales were estimated to generate \$4.0 billion in federal revenues over the next five years. For information on the debate over whether to approve energy development in the Refuge, see CRS Issue Brief IB10136, *Arctic National Wildlife Refuge (ANWR): Controversies for the 109th Congress*, by M. Lynne Corn, Bernard A. Gelb, and Pamela Baldwin.

Endangered Species Funding. Funding for the Endangered Species program is one of the perennially controversial portions of the FWS budget. The Administration proposed to reduce the program from \$147.8 million in FY2006 to \$141.0 million in FY2007 (5%), with the bulk of the reduction in the recovery subprogram. For FY2007, the House approved \$146.6 million, \$1.2 million below FY2006 and \$5.6 million above the request. See **Table 4** below.

A number of other related programs also benefit conservation of species that are listed, or proposed for listing, under the Endangered Species Act. The President's request would increase the Landowner Incentive Program from \$21.7 million in FY2006 (including a \$2.0 million rescission) to \$24.4 million in FY2007. Stewardship Grants would rise from \$7.3 million in FY2006 to \$9.4 million. The Cooperative Endangered Species Conservation Fund (for grants to states and territories to conserve threatened and endangered species) would remain at \$80.0 million. Within that figure, the Administration proposed to earmark \$5.1 million in FY2007 for the Idaho Salmon and Clearwater River Basins Habitat Account. The House approved cuts in the Landowner Incentive Program and Private Stewardship Grants, but a modest increase in the Cooperative Endangered Species Conservation Fund. See **Table 4**, below.

Under the President's request, total FY2007 funding for the Endangered Species program and related programs would decrease from \$256.8 million to \$254.8 million (1%). The House approved a decrease to \$249.1 million (3%).

³ The proposed authorization for exploration and development would be separate legislation, rather than part of the Interior appropriations bill. The proposal does not appear in the FWS Budget Justification for FY2007.

Table 4. Appropriations for Endangered Species and Related Programs, FY2005-FY2007

(\$ in thousands)

Endangered Species and Related Programs	FY2005 Approp.	FY2006 Approp.	FY2007 Request	FY2007 House Passed
Endangered Species Program				
— <i>Candidate Conservation</i>	\$9,255	\$8,619	\$8,063	\$8,163
— <i>Listing</i>	15,960	17,630	17,759	17,759
— <i>Consultation</i>	48,129	47,997	49,337	50,018
— <i>Recovery</i>	69,870	73,562	65,879	70,670
Subtotal, Endangered Species Program	143,214	147,808	141,038	146,610
Related Programs				
— <i>Landowner Incentive Program</i>	21,694	21,667	24,400	15,000
— <i>Private Stewardship Grants</i>	6,903	7,277	9,400	7,000
— <i>Cooperative Endangered Species Conservation Fund^a</i>	80,462	80,001	80,001	80,507
Subtotal, Related Programs	109,059	108,945 ^b	113,801	102,507
Total Appropriations	\$252,273	\$256,753^b	\$254,839	\$249,117

- a. The President's request for FY2007 called for the entire amount to be derived from LWCF. The House approved \$60.3 million from LWCF, an amount the report of the House Committee on Appropriations identifies as equal to species recovery, land acquisition, and acquisition for Habitat Conservation Plans.
- b. Reflects a \$2.0 million rescission in the Landowner Incentive Program and a \$1.0 million rescission in the Cooperative Endangered Species Conservation Fund in P.L. 109-148.

National Wildlife Refuge System and Law Enforcement. For refuge operations and maintenance in FY2007, the President proposed \$381.7 million, a decrease from \$382.5 million in FY2006. The House approved \$388.7 million. The President proposed \$57.3 million for Law Enforcement — an increase of \$1.2 million from the FY2006 level (\$56.1 million). The House-passed bill contained \$57.5 million.

Avian Flu. For FY2007, the Administration proposed to continue the special supplemental funding Congress provided in FY2006 for the study, monitoring, and early detection of highly pathogenic avian flu, through a virus strain known as H5N1. The FY2006 level was \$7.4 million. The same was proposed by the Administration for FY2007, and this amount was passed by the House. FWS will cooperate with other federal and non-federal agencies in studying the spread of the virus through wild birds. Attention will be focused on the North American species whose migratory patterns make them likely to come into contact with infected Asian birds. The geographic focus will be on Alaska, the Pacific Flyway (along the west coast), and Pacific islands. The House Appropriations Committee report also directed that the funds be used not only for monitoring and testing in Alaska, but also for “vector control efforts in other areas,” but did not elaborate on the efforts intended nor the geographic areas to be given additional emphasis.

Land Acquisition. For FY2007, the Administration proposed \$27.1 million for Land Acquisition, 3% below FY2006. The House approved \$19.8 million, a decrease of 29%. (See **Table 5.**) The House Appropriations Committee report earmarked acquisition funding for six refuges in the northeast. This program is funded from appropriations from LWCF. In the past, the bulk of this FWS program had been for specified acquisitions of federal refuge land, but a portion was used for closely related functions such as acquisition management, land exchanges, emergency acquisitions, purchase of inholdings, and general overhead (“Cost Allocation Methodology”). In recent years, less of the funding has been reserved for traditional land acquisition. The Administration continued this trend for FY2007, reserving \$13.7 million for specified acquisitions, and funding the remainder of the program at \$13.4 million.⁴ The House-passed bill allocated a smaller fraction to acquisition than the President’s proposal. (For more information, see “Land and Water Conservation Fund (LWCF)” in this report.)

Table 5. Appropriations for FWS Land Acquisition Program, FY2005-FY2007
(\$ in thousands)

FWS Land Acquisition	FY2005 Approp.	FY2006 Approp.	FY2007 Request	FY2007 House Passed
Acquisitions — Federal Refuge Lands	\$22,593	\$13,494	\$13,672	\$8,800
Inholdings	1,479	1,478	1,478	478
Emergencies & Hardships	986	1,478	1,478	1,500
Exchanges	1,726	1,478	1,478	0
Acquisition Management	8,249	8,269	7,171	7,171
Cost Allocation Methodology	1,972	1,793	1,802	1,802
Total Appropriations	\$37,005	\$27,990	\$27,079	\$19,751

Wildlife Refuge Fund. The National Wildlife Refuge Fund (also called the Refuge Revenue Sharing Fund) compensates counties for the presence of the non-taxable federal lands of the National Wildlife Refuge System (NWRS). A portion of the fund is supported by the permanent appropriation of receipts from various activities carried out on the NWRS. However, these receipts are not sufficient for full funding of amounts authorized in the formula, and county governments have long urged additional appropriations to make up the difference. Congress generally does provide additional appropriations. The President requested \$10.8 million for FY2007, down from \$14.2 million in FY2006. This FY2007 level, combined with expected receipts, would provide about 30% of the authorized full payment, down from 40% in FY2006. The House-passed figure was \$14.2 million, as in FY2006.

⁴ Under the Migratory Bird Conservation Account (MBCA), FWS has a permanently appropriated source of funding (from the sale of “duck stamps” to hunters, and import duties on certain arms and ammunition) for land acquisition. As annual appropriations for acquisitions under LWCF have declined, the MBCA (\$41.9 million in FY2006) has become increasingly important in the protection of habitat for migratory birds, especially waterfowl. Other species in these habitats benefit incidentally.

Multinational Species Conservation Fund (MSCF). The MSCF has generated considerable constituent interest despite the small size of the program. It benefits Asian and African elephants, tigers, rhinoceroses, great apes, and marine turtles. The President's FY2007 budget again proposed to move funding for the Neotropical Migratory Bird Conservation Fund (NMBCF) into the MSCF. Congress has rejected the proposed transfer annually from FY2002 to FY2006, and the House again rejected the proposal for FY2007. For FY2007, the President proposed \$8.2 million for the MSCF (including the proposed transfer of the NMBCF to this program). The proposal would cut programs for great apes, rhinos, tigers, African and Asian elephants, and marine turtles, but increase funding for neotropical migratory birds. The House passed smaller reductions. See **Table 6** below.

Table 6. Appropriations for Multinational Species Conservation Fund and Neotropical Migratory Bird Fund, FY2005-FY2007
(\$ in thousands)

Multinational Species Conservation Fund	FY2005 Approp.	FY2006 Approp.	FY2007 Request	FY2007 House Passed
African Elephant	\$1,381	\$1,379	\$990	\$1,290
Tiger and Rhinos	1,477	1,576	990	1,490
Asian Elephant	1,381	1,379	990	1,290
Great Apes	1,381	1,379	990	1,290
Marine Turtles	99	691	297	697
<i>[Neotropical Migratory Birds]</i>	<i>[3,944]</i>	<i>[3,941]</i>	<i>[3,960]</i>	<i>[4,000]</i>
Total Appropriations	\$5,719	\$6,404	\$4,257	\$6,057

Note: The Neotropical Migratory Bird program was first authorized in FY2002, and is not part of the MSCF, although the transfer has been proposed in the President's budgets from FY2002-FY2007. Congress has rejected the proposal five times, and the program is not included in the column totals.

State and Tribal Wildlife Grants. State and Tribal Wildlife Grants help fund efforts to conserve species (including non-game species) of concern to states, territories, and tribes and has generated considerable support from these governments. The program was created in the FY2001 Interior appropriations law (P.L. 106-291) and further detailed in subsequent Interior appropriations bills. (It lacks any separate authorizing statute.) Funds may be used to develop conservation plans as well as to support specific practical conservation projects. A portion of the funding is set aside for competitive grants to tribal governments or tribal wildlife agencies. The remaining state portion is for matching grants to states. A state's allocation is determined by formula. The President proposed \$74.7 million, an increase from \$67.5 million in FY2006. The House approved a decrease to \$50.0 million. See **Table 7** below. An amendment to transfer \$500,000 to this program for alligator control in Florida was withdrawn.

Table 7. Appropriations for State and Tribal Wildlife Grants, FY2005-FY2007
(\$ in thousands)

State and Tribal Wildlife Grants	FY2005 Approp.	FY2006 Approp.	FY2007 Request	FY2007 House Passed
State Grants	\$61,040	\$59,556	\$61,486	\$45,000
Competitive Grants for States, Territories, & Other Jurisdictions	0	0	5,000	0
Tribal Grants	5,917	5,912	5,940	5,000
Administration ^a	1,947	2,024	2,240	NA
Cost Allocation Methodology (CAM) ^b	124	—	—	—
Total Appropriations	\$69,028	\$67,492	\$74,666	\$50,000

a. In FY2006 and earlier, administrative costs were limited to 3%, after tribal grants are deducted from the total. Committee reports and the conference report did not specify a dollar figure for allocation to administration or to the cost allocation methodology. For FY2007, the House Appropriations Committee did not specify either a dollar or a percent limit on administrative costs, but only that such costs be deducted from the state grants share of the program.

b. Beginning in FY2006, CAM was included under administrative costs.
NA = Not available.

National Park Service

The National Park Service (NPS) is responsible for the National Park System, currently comprising 390 separate and very diverse park units covering 85 million acres. The NPS and its 20,400 employees protect, preserve, interpret, and administer the park system's diverse natural and historic areas representing the cultural identity of the American people. The NPS mission is to protect park resources and values, unimpaired, while making them accessible to the public. The Park System has some 20 types of area designations, including national parks, monuments, memorials, historic sites, battlefields, seashores, recreational areas, and other classifications. The NPS also supports some resource conservation activities outside the Park System.

The House-passed total is \$2.18 billion for the NPS, an increase of \$20.0 million (1%) above the President's FY2007 request (\$2.16 billion), and a decrease of \$99.5 million (4%) from the FY2006 enacted level. See **Table 8**, below. The NPS budget request is in accordance with the Administration's goal of cutting the

federal budget deficit, but may be at odds with the agency's public popularity. It included increases for park operations and park police, with other line items either nearly level or significantly reduced. It has been reported that inflation; fixed costs, such as mandatory pay and benefit increases; and rising fuel and utility costs are forcing park managers to reduce visitor programs and services and to raise entry fees as the summer season approaches.⁵

Two amendments adopted by the House involved the NPS. The first increased funding for the Operation of the National Park System by \$1.0 million, with the intent of increasing security to open all of the Statue of Liberty to visitors. The other excluded certain cities from an ongoing NPS study of the San Gabriel watershed. In addition, House Appropriations Committee Members agreed to help resolve a matter concerning repeated extensions of the concessions contract to provide ferry service to the Statue of Liberty/Ellis Island National Monument.

Operation of the National Park System. The park operations line-item is the primary source of funding for the national parks, accounting for 81% of the total NPS budget. It supports the activities, programs, and services essential to the day-to-day operations of the Park System, and covers resource protection, visitors' services, facility operations, facility maintenance, and park support programs, as well as employee pay, benefits, and other fixed costs. The majority of operations funding is provided directly to park managers. In its report on the FY2007 bill, the House Appropriations Committee was critical of a Department "hold harmless" policy for law enforcement rangers "... while forcing all other visitor service, maintenance, and resources protection functions to deal with the absorption of fixed costs and other budgetary limitations" (H.Rept. 109-465, p. 44). The House retained the committee's bill language to counter this policy.

The House-passed bill allowed \$1.76 billion for park operations in FY2007, an increase of \$13.0 million (1%) above the request and of \$36.4 million (2%) above FY2006. An ongoing NPS "core operations analysis" program aims to reduce park spending by 20-30% without compromising the core mission functions of resource protection and visitor hospitality. To date, 53 park units have completed the studies and 34 more are scheduled to finish by the end of FY2006. The NPS intends to complete all unit studies by the end of 2011.⁶ Park advocacy groups have estimated that, in recent years, the national parks operate with two-thirds of needed funding, on average, and have asked Congress to provide an additional \$150 million for park operations in FY2007, as well as additional funding for park security, land acquisition, and hurricane damage repairs. The condition of the national parks and the adequacy of their care and operation continue to be controversial.

⁵ "National Parks Cutting Back on Services, Raising Fees," *USA Today* (May 12, 2006): A1.

⁶ "National Parks: Directions to Increase Efficiency, Cut Costs Gets Mixed Reviews," *Land Letter* (May 4, 2006.)

**Table 8. Appropriations for the National Park Service,
FY2005-FY2007**
(\$ in millions)

National Park Service	FY2005 Approp.	FY2006 Approp.	FY2007 Request	FY2007 House Passed
Operation of the National Park System	\$1,683.6	\$1,718.9	\$1,742.3	\$1,755.3
U.S. Park Police	80.1	80.2	84.8	84.8
National Recreation and Preservation	61.0	54.2	33.3	47.2
Historic Preservation Fund	71.7	72.2	71.9	58.7
Construction ^a	353.0	332.9	229.3	229.9
Land and Water Conservation Fund ^b	-30.0	-30.0	-30.0	-30.0
Land Acquisition and State Assistance				
— Assistance to States	91.2	29.6	1.6	1.6
— NPS Acquisition	55.1	34.4 ^c	22.7	28.4
Subtotal, Land Acquisition and State Assistance	146.3	47.0 ^d	24.3	30.0
Total Appropriations	\$2,365.7	\$2,275.3	\$2,155.8	\$2,175.8

a. Includes \$50.8 million of emergency funding for FY2005 enacted in P.L. 108-324, and \$19.0 million of emergency funding for FY2006 enacted in P.L. 109-148.

b. Figures reflect a rescission of contract authority.

c. The funding figure is reduced by the use of \$9.8 million from prior year balances.

d. The funding figure is reduced by the use of \$17.0 million from prior year balances, which are not allocated between Assistance to States and NPS Acquisition.

United States Park Police (USPP). This budget item supports the U.S. Park Police, an urban-oriented, full-service, uniformed law enforcement entity of the NPS with primary jurisdiction at park sites within the metropolitan areas of Washington, DC, New York City, and San Francisco. USPP law enforcement authority extends to all NPS units and to certain other federal and state lands. The park police provide specialized law enforcement services to other park units when requested, through deployment of professional police officers to support law enforcement trained and commissioned park rangers working in park units system-wide. The enacted level for FY2006 was \$80.2 million; the FY2007 request and the House-passed bill both allowed \$84.8 million, a 6% increase. Increased funding is proposed for heightened security at icon parks and for recruitment and training of new officers. An internal review concluded in December 2004 reportedly addressed long-standing fiscal and management problems and redefined USPP priorities to be: (1) protection of “iconic” (symbols of democracy) park units and their visitors, (2) patrol of the National Mall and adjacent parks, (3) special events and crowd management, (4) criminal investigations, and (5) traffic control and parkway patrol.

National Recreation and Preservation. This line item has funded a variety of park recreation and resource protection programs and an international park affairs office, as well as programs connected with state and local community efforts to preserve natural, cultural, and historic (heritage) resources. The House-passed bill allowed a total of \$47.2 million for the line item, \$13.9 million (42%) above the request of \$33.3 million, but \$7.0 million (13%) below the FY2006 enacted level of \$54.2 million. The large requested decrease was partly from the proposal to

eliminate statutory and contractual aid program for specific sites, as had been proposed — and rejected by Congress — in FY2005 and FY2006. The House agreed with the proposal not to fund statutory and contractual aid.

The House-passed bill rejected the request to reduce funding for the heritage partnership program and to transfer the program to the Historic Preservation Fund. The Administration had proposed the transfer of heritage partnership programs (for heritage areas) to the Historic Preservation Fund (see below) and a decrease in FY2007 funding for heritage areas to \$7.4 million, down \$5.9 million (44%) from FY2006.

In agreement with the committee report, the House declined to provide funds for the Chesapeake Bay Gateways and Water Trail initiative, a program that had received a total of \$11.0 million since FY2000.

Construction. The construction line item funds new construction, as well as improvements, repair, rehabilitation, and replacement of park facilities. The FY2006 Interior appropriations law provided \$332.9 million for NPS construction, \$20.1 million (6%) less than FY2005. The House-passed bill allowed \$229.9 million, \$0.7 million (0.3%) more than the FY2007 request, and \$102.9 million (31%) less than FY2006 enacted. While the FY2006 request cited high priority health, safety, and resource protection needs, the FY2007 request contained no similar specific direction.

Cuts in the construction line item could limit the reduction of the NPS multi-billion dollar maintenance backlog. Rather than fund the reduction of the backlog in FY2007, it has been reported that the Administration is proposing to hold the line against any further backlog accumulation by sustaining the same level of “facility condition index.”⁷ (For information on NPS maintenance, see CRS Issue Brief IB10145, *National Park Management*, coordinated by Carol Hardy Vincent.)

Land Acquisition and State Assistance. FY2006 appropriations for the NPS under the Land and Water Conservation Fund (LWCF) were \$47.0 million, comprised of \$34.4 million for NPS land acquisition, \$29.6 million for state assistance programs, and a \$17.0 million reduction due to the use of prior year funds.⁸ Land acquisition funds are used to acquire lands, or interests in lands, for inclusion within the National Park System. State assistance is for recreation-related land acquisition and recreation planning and development by the states, with the funds allocated by a formula and states determining their spending priorities.

The House-passed bill allowed a total of \$30.0 million for NPS land acquisition and state assistance, \$5.7 million (23%) more than the FY2007 request and \$17.0 million (36%) less than FY2006. Within the \$30.0 million, the report of the House

⁷ Leslie Ann Duncan, “Senate Energy Panel Hears from Mainella on Parks Budget,” *Congressional Quarterly Green Sheets*, March 12, 2006.

⁸ Prior year balances of \$9.8 million for land acquisition and of \$17.0 million for both programs (with no specified allocation between NPS land acquisition and state assistance) offset additional LWCF appropriations for FY2006.

Appropriations Committee specified \$5.0 million for the United Airlines Flight 93 memorial near Shanksville, PA. The request for state assistance funds was limited to \$1.6 million for administrative expenses, with no funds for state grants (\$28.0 million in FY2006); the House agreed with this request. (For more information, see the “Land and Water Conservation Fund (LWCF)” section in this report.)

Historic Preservation. The Historic Preservation Fund (HPF), administered by the NPS, provides grants-in-aid for activities specified in the National Historic Preservation Act (NHPA; 16 U.S.C. §470), such as restoring historic districts, sites, buildings, and objects significant in American history and culture. Preservation grants are normally funded on a 60% federal/40% state matching share basis. The HPF includes funding for Save America’s Treasures and Preserve America grants.

For FY2007, the House approved \$58.7 million for the HPF, \$13.5 million below the FY2006 appropriation and \$13.2 million below the Administration’s FY2007 budget of \$71.9 million. See **Table 9** below. The House-passed measure would include \$35.7 million for grants-in-aid to state historic preservation offices, \$3.9 million for Tribal grants, and \$1.0 million for preserving and restoring historic buildings and structures on campuses of Historically Black Colleges and Universities (HBCUs); the FY2006 appropriation for HBCUs was \$3.0 million.

The House disagreed with the Administration’s FY2007 request to create the America’s Heritage and Preservation Partnership program within the Historic Preservation Fund. The Administration’s FY2007 budget would have combined funding for National Heritage Areas (\$7.4 million), Save America’s Treasures (\$14.8 million), and Preserve America grants (\$10.0 million). The NPS supports National Heritage Areas, which are managed by private or state organizations, with financial and technical assistance. The House bill would retain the Heritage Partnership program within the National Recreation and Preservation programs line item.

The House-passed bill would provide \$15.0 million for Save America’s Treasures. Save America’s Treasures preserves nationally significant intellectual and cultural artifacts and historic structures. Annual appropriations laws have required that project recommendations be subject to approval by the Appropriations Committees. From the total for Save America’s Treasures for FY2006 (\$29.6 million), approximately \$16.0 million was specified by Congress for designated projects. Preserve America grants-in-aid were created to supplement Save America’s Treasures in supporting community efforts to develop resource management strategies and to encourage heritage tourism. They are competitively awarded on a matching basis, as one-time seed money grants. The FY2006 appropriation provided that not to exceed \$5.0 million could be allocated to Preserve America grants; the FY2007 House-passed bill would provide \$3.0 million for Preserve America.

An issue that is often considered during the appropriations process is whether historic preservation should be funded by private money rather than the federal government. Also, pending legislation (H.R. 3446 and S. 1378) would reauthorize the Historic Preservation Fund through FY2011 and FY2015 respectively and make changes to the Advisory Council on Historic Preservation, an independent federal agency that promotes historic preservation and oversees NHPA §106 historic preservation review.

**Table 9. Appropriations for the Historic Preservation Fund,
FY2005-FY2007**
(\$ in thousands)

Historic Preservation	FY2005 Approp.	FY2006 Approp.	FY2007 Request	FY2007 House Passed
Grants-in-Aid to States and Territories ^a	\$35,500	\$35,717	\$35,717	\$35,717
Tribal Grants	3,205	3,941	3,941	3,941
HBCUs	3,451	2,956	—	1,000
Heritage Partnership Programs ^b	[14,579]	[13,301]	7,400	^b —
Save America's Treasures	29,583	29,558 ^c	14,800	15,000
Preserve America Grants-In-Aid	0	^c	10,000	3,000
Total Appropriations	\$71,739	\$72,172	\$71,858	\$58,658

a. The term "Grants-in-Aid to States and Territories" is used in conjunction with the budget and refers to the same program as Grants-in-Aid to State Historic Preservation Offices.

b. Funding for heritage areas in FY2005 and FY2006 was included in the National Recreation and Preservation line item. The House-passed bill would retain the Heritage Partnership program in the National Recreation and Preservation line item and fund it at \$13.9 million for FY2007.

c. The FY2006 appropriation allowed not to exceed \$5.0 million to be used for Preserve America grants within funding for Save America's Treasures.

For further information on *Historic Preservation*, see its website at [<http://www.cr.nps.gov/hps/>].

CRS Report 96-123. *Historic Preservation: Background and Funding*, by Susan Boren.

CRS Issue Brief IB10145. *National Park Management*, coordinated by Carol Hardy Vincent.

U.S. Geological Survey

The U.S. Geological Survey (USGS) is the nation's premier science agency in providing physical and biological information related to natural hazards; certain aspects of the environment; and energy, mineral, water, and biological sciences. In addition, it is the federal government's principal civilian mapping agency and a primary source of data on the quality of the nation's water resources. For FY2007, the Administration is emphasizing the role USGS plays in providing timely scientific information for monitoring natural hazards and assessing their impacts, measuring land cover changes, and assessing mineral resources.

Funds for the USGS are provided in the line item *Surveys, Investigations, and Research*, for seven activities: the National Mapping Program; Geologic Hazards, Resources, and Processes; Water Resources Investigations; Biological Research;

Enterprise Information; Science Support; and Facilities. For FY2007, the Administration requested \$944.8 million for the USGS, which is \$25.9 million (3%) below the FY2006 level of \$970.7 million.⁹ The House-passed bill contains \$986.4 million, which is \$41.7 million above the request and \$15.8 million above the FY2006 enacted level. See **Table 10** below. The House-passed bill is \$5.0 million less than the bill reported by the House Appropriations Committee due to a floor amendment. The amendment did not specify the activity or activities that would be reduced.

Of the proposed changes in the Administration's request, the largest would be the transfer of funds (\$68.9 million in FY2006) from the Cooperative Topographic Mapping Program to the Enterprise Information Program. This transfer is consistent with changes in the direction of the National Mapping Program, which the Administration proposed to change to the Geographic Research, Investigations, and Remote Sensing Program. The Geographic Research, Investigations, and Remote Sensing Program, under these changes, would emphasize fundamental geographic research and consolidate elements of national geospatial programs. This transfer also is reflected in the House-passed bill. The FY2007 request proposed to eliminate funding for the Water Resources Research Institutes, which the Administration contends have been generally self-supporting. The House-passed bill would retain \$6.4 million for this program. The House-passed bill also would retain \$22.9 million for mineral resource assessments, which were cut in the FY2007 request.

Enterprise Information. This program consolidates funding of all USGS information needs including information technology, security, services, and resources management, as well as capital asset planning. There are three primary programs within Enterprise Information: (1) Enterprise Information Security and Technology, which supports management and operations of USGS telecommunications (e.g., computing infrastructure and email); (2) Enterprise Information Resources, which provides policy support, information management, and oversight over information services; and (3) Federal Geographic Data Coordination, which provides operational support and management for the Federal Geographic Data Committee (FGDC). The FGDC is an interagency, intergovernmental committee that encourages collaboration to make geospatial data available to state, local, and tribal governments, as well as communities. The FY2007 Administration's request provided \$111.2 million for this program, \$64.8 million above the FY2006 enacted level of \$46.4 million. The House-passed bill would provide \$113.7 million for this program, which is \$2.5 million above the Administration's request and \$67.3 million over the FY2006 enacted level. The increase in funds is due to a proposed reorganization of the USGS budget. (See introduction above.)

National Mapping Program. The National Mapping Program aims to provide public access to high quality geospatial information. The Administration requested \$76.6 million for this program, \$52.7 million below the FY2006 enacted level of \$129.3 million. Further, the Administration requested that the program name be changed to the Geographic Research, Investigations, and Remote Sensing Program. The House-passed bill would change the program name to the Geographic

⁹ This includes \$9.0 million in emergency appropriations under P.L. 109-148.

Research, Investigations, and Remote Sensing Program and provide \$78.6 million, \$2.0 million above the request and \$50.7 million less than the FY2006 enacted level.

The primary reduction in requested funds for this program is due to budget restructuring, as noted above. Further, the AmericaView program would not be funded (a reduction of \$3.0 million). The AmericaView program is a state level network that provides access and imagery archives for university participants and other government participants. The bill passed by the House would provide \$2.0 million to the AmericaView program. The bill also would provide \$13.0 million for the Mid-Continent Mapping Center (MCMC) in Rolla, Missouri, and prohibit the use of funds to consolidate the functions and operations of the MCMC into the National Geospatial Technical Operations Center.

Under the Land Remote Sensing subheading, an increase of \$16.0 million is requested by the Administration to support the Landsat Data Continuity Mission, also known as Landsat 8. Landsat 8 is an upcoming satellite that will take remotely-sensed images of the Earth's land surface and surrounding coastal areas primarily for environmental monitoring. The volume of data taken by Landsat 8 is to be four times greater than its predecessor, Landsat 7, and Landsat 8 is to include additional spectral bands and higher resolution than Landsat 7 data. The requested funds would be used to establish ground systems to provide for the transfer, storage, and accessibility of data from Landsat 8, when it is launched. The House-passed bill would fund this program along the lines of the request.

Geologic Hazards, Resources, and Processes. For Geologic Hazards, Resources, and Processes activities, the Administration requested \$217.4 million, which is \$17.9 million below the FY2006 enacted level of \$235.3 million. This line item covers programs in three activities: Hazard Assessments, Landscape and Coastal Assessments, and Resource Assessments. The House-passed bill would provide \$241.9 million, which is \$24.4 million above the requested amount and \$6.6 million above the FY2006 enacted level.

The primary reduction in the Administration's request under this heading is a \$22.9 million reduction in the Mineral Resources Program. According to the Administration, proposed cuts in the mineral resources program will focus efforts on mineral resource assessments and research that benefit federal land management programs, as opposed to both federal and non-federal needs as in previous years. The Administration expects that universities or other entities will undertake assessments and research that support non-federal needs. The reduction will result in the discontinuation of most research and data collection projects, including those on industrial mineral research, and the elimination of some geophysical labs. In previous years, the Administration has requested similar cuts in this program, yet funding has been included by Congress.

The FY2007 House-passed bill would retain funding for this program, including \$18.4 million for research and assessments of mineral deposits, and \$4.5 million for minerals information. The House Appropriations Committee stated that it "strongly disagrees" with the proposed reduction in the program and urged the Administration not to propose program elimination again. The Committee disagreed with the notion that objective data can be prepared in the private sector. In FY2006, the conference

committee report stated that it would seem “irresponsible for the Administration to decrease or eliminate funding for what is clearly an inherently Federal responsibility” (H.Rept. 109-188, p. 89).

The FY2007 request contained an increase of \$1.4 million for the Geologic Hazards Program. Some of the funds would go toward supporting a Multi-hazard Pilot Initiative within the USGS. This initiative would increase funding for research to assess coastal vulnerability to extreme storms, for earthquake and landslide hazards research, and for geographic and water resources studies. The House-passed bill also would provide this increase.

Water Resources Investigations. The Administration’s request for Water Resources Investigations was \$204.0 million, \$7.7 million below the FY2006 enacted level of \$211.8 million. The Hydrologic Monitoring, Assessments, and Research sub-activity would receive \$141.9 million; the Federal-State Cooperation Water Program would receive \$62.2 million; and the Water Resource Research Institutes would not be funded. The House-passed bill included \$213.8 million for this heading, \$9.7 million above the requested amount and \$2.0 million above the FY2006 enacted level.

As with the Bush Administration’s FY2002-FY2006 budget requests, the FY2007 request would discontinue USGS support for Water Resources Research Institutes because, according to the Administration, most institutes have succeeded in leveraging sufficient funding for program activities from non-USGS sources. Congress has provided funding for the institutes from FY2002 to FY2006, appropriating \$6.4 million for FY2006. The House-passed bill would retain funding for the Institutes at \$6.4 million.

The Administration requested an increase of \$2.3 million for network operations under the National Streamflow Information Program (NSIP), which would receive a total of \$16.8 million for FY2007. These additional funds would be used to continue the operation of 114 streamgages that would otherwise be shut down due to the anticipated loss of partner contributions. Further, they would allow for the number of streamgages to increase by 30 nationwide. Through the NSIP program, the USGS collects the streamflow data needed by federal, state, and local agencies for planning, operating water-resources projects, and regulatory programs. The bill passed by the House also would provide this increase.

Biological Research. The Biological Research Program under the USGS generates and distributes information related to the conservation and management of the nation’s biological resources. The Administration requested \$172.6 million for biological research, which is \$2.3 million below the FY2006 enacted level of \$174.9 million. The House-passed bill would provide \$175.6 million for this heading, which is \$3.0 million above the request and \$0.7 million above the FY2006 enacted level.

Under the Administration’s request, several earmarked activities totaling \$6.4 million under the Biological Research and Monitoring Program would be removed for FY2007. According to the USGS, these projects do not address the highest priority science. Some of these program reductions would be restored in the House-

passed bill. The House Appropriations Committee stated that the USGS should implement the Chesapeake Bay science plan to assess components of the ecosystem.

Under the Terrestrial and Endangered Resources sub-activity, the USGS will be conducting activities related to Highly Pathogenic Avian Influenza (HPAI). The Administration requested \$3.2 million for FY2007 to continue USGS avian flu detection activities. In cooperation with the FWS and other federal and state agencies, the USGS began targeted surveillance for the early detection of HPAI in wild birds in Alaska in 2005, collecting samples from 520 birds of 10 species that are known to migrate through the Russian Far East and Southeast Asia. A steering committee was formed in 2006 to coordinate efforts and establish standard operating procedures for sampling and analysis. For 2007, the USGS will continue sampling birds for HPAI and coordinate with other agencies to deal with avian influenza in North America. The House-passed bill provides these increases.

Science Support and Facilities. Science Support focuses on those costs associated with modernizing the infrastructure for managing and disseminating scientific information. The Administration requested \$67.4 million for science support, a decrease of \$1.9 million from the FY2006 enacted level of \$69.3 million. The House-passed bill would provide \$72.4 million, \$5.0 million above the requested amount and \$3.1 million above the FY2006 enacted level.

Facilities focuses on the costs for maintenance and repair of facilities. The Administration requested \$95.5 million for facilities for FY2007, an increase of \$0.7 million from the FY2006 enacted level of \$94.8 million. The House-passed bill would provide \$95.5 million for Facilities, similar to the requested amount and \$0.7 million above the FY2006 enacted level.

**Table 10. Appropriations for the U.S. Geological Survey,
FY2005-FY2007**
(\$ in millions)

U.S. Geological Survey	FY2005 Approp.	FY2006 Approp.	FY2007 Request	FY2007 House Passed
Enterprise Information	\$44.4	\$46.4	\$111.2	\$113.7
National Mapping Program	118.8	129.3	76.6	78.6
Geologic Hazards, Resources, and Processes	229.2	235.3	217.4	241.9
Water Resources Investigations	211.2	211.8	204.1	213.8
Biological Research	171.7	174.9	172.6	175.6
Science Support	65.6	69.3	67.4	72.4
Facilities	94.6	94.8	95.5	95.5
Decrease in House Floor Action				- 5.0
Total Appropriations	\$944.6^a	\$970.6^b	\$944.8	\$986.4

a. The total includes emergency appropriations of \$1.0 million provided in P.L. 108-324 and \$8.1 million in P.L. 109-13.

b. The total includes emergency appropriations of \$9.0 million provided in P.L. 109-148.

Minerals Management Service

The Minerals Management Service (MMS) administers two programs: the Offshore Minerals Management (OMM) Program and the Minerals Revenue Management (MRM) Program. OMM administers competitive leasing on Outer Continental Shelf (OCS) lands and oversees production of offshore oil, gas, and other minerals. MRM collects and disburses bonuses, rents, and royalties paid on federal onshore and OCS leases and Indian mineral leases. Revenues from onshore leases are distributed to states in which they were collected, the general fund of the U.S. Treasury, and designated programs. Revenues from the offshore leases are allocated among the coastal states, the Land and Water Conservation Fund, the Historic Preservation Fund, and the U.S. Treasury.

The MMS estimates that it collects and disburses over \$8 billion in revenue annually. This amount fluctuates based primarily on the prices of oil and natural gas. Over the past decade, royalties from natural gas production have accounted for 40% to 45% of annual MMS receipts, while oil royalties have been not more than 25%.

Budget and Appropriations. The Administration submitted an FY2007 total MMS budget of \$292.3 million. This includes \$6.9 million for Oil Spill Research and \$285.4 million for Royalty and Offshore Minerals Management. The total FY2007 budget request reflects \$163.6 million in appropriations and an

additional \$128.7 million from offsetting collections which MMS has been retaining since 1994. The Administration's total budget request is 2% below the \$297.0 million enacted for FY2006 (including an emergency appropriation of \$16.0 million). The net appropriations request for FY2007 of \$163.6 million is a 6% reduction from the \$174.3 million enacted for FY2006. The House recommended \$164.4 million, slightly higher than the request due to a greater increase for Royalty and Offshore Minerals Management. See **Table 11** below.

Table 11. Appropriations for the Minerals Management Service, FY2006-FY2007

(\$ in millions)

Minerals Management Service	FY2006 Approp.	FY2007 Request	FY2007 House Passed
Royalty and Offshore Minerals Management			
— <i>OCS Lands (OMM)</i>	\$148.8	\$159.4	\$158.4
— <i>Royalty Management (MRM)</i>	77.9	79.2	79.2
— <i>General Administration</i>	47.5	46.9	48.7
— <i>Gross, Royalty and Offshore Minerals Management</i>	290.1 ^a	285.4	286.2
— <i>Use of Receipts</i>	-122.7	-128.7	-128.7
Total, Royalty and Offshore Minerals Management Appropriations	167.4	156.7	157.5
Oil Spill Research	6.9	6.9	6.9
Total Appropriations	\$174.3	\$163.6	\$164.4

a. Includes an emergency appropriation of \$16.0 million in P.L. 109-148.

Oil and Gas Leasing Offshore. Issues not directly tied to specific funding accounts remain controversial. Oil and gas development moratoria in the Outer Continental Shelf (OCS) along the Atlantic and Pacific Coasts, parts of Alaska, and the Gulf of Mexico (GOM) have been in place since 1982, as a result of public laws and executive orders of the President. The FY2006 appropriations law retained the moratorium on funding preleasing and leasing activities in the OCS.

The House retained the moratoria on oil and natural gas leasing in its FY2007 appropriations bill. The House Appropriations Committee had approved an amendment that would have allowed for natural gas leasing in the OCS moratoria areas. Oil leasing would still have been prohibited. The House voted to restore the moratoria on natural gas development in certain offshore areas and also to defeat an amendment to strike sections 104-106 of the bill that contain the OCS oil leasing moratoria. Separately, legislation (S. 2290, H.R. 4318) has been introduced to allow natural gas-only drilling in areas currently under the moratoria. The bills would allow the Secretary of the Interior to offer natural gas-only leases in the 2007-2012 leasing program. Under both bills, the states would receive a larger share of the revenue generated from U.S. offshore leases.

Royalty relief for OCS oil and gas producers has been debated during consideration of FY2007 Interior appropriations. On February 13, 2006, the New

York Times reported that the MMS would not collect royalties on leases awarded in 1998 and 1999 because no price threshold was included in the lease agreements during those two years. Without the price thresholds, producers may produce oil and gas up to specified volumes without paying royalties no matter what the price. The MMS asserts that placing price thresholds in the lease agreements is at the discretion of the Secretary of the Interior. However, according to the MMS, the price thresholds were omitted by mistake during 1998 and 1999.¹⁰

A House committee amendment to the FY2007 Interior appropriations bill would require the Secretary of the Interior to include price thresholds in all leases (based on \$34.71/barrel of oil and \$4.34/thousand cubic feet of natural gas) and require the Secretary to renegotiate leases to conform with current price thresholds levels. This provision would impact the 1998 and 1999 leases and those shallow water deep-gas leases with price threshold levels currently around \$9.90/thousand cubic feet. The committee language, however, was removed from the bill on a point of order during the House floor debate. Subsequently, the House agreed to an amendment that would prohibit funds in the bill from being used to issue new lease sales to current lessees that do not have price thresholds in their leases. Opponents of the amendment argued that the companies with valid leases, even though without price thresholds, should not be penalized.

Leasing in the Eastern Gulf of Mexico has been controversial over the past several years. There were several blocks that were removed by the Administration from Eastern GOM sale 181 that could become available for release after 2007, as part of the Administration's proposed five-year (2007-2012) leasing program. A Senate proposal (S. 2253) would make available for lease about 3.6 million acres within the lease sale 181 area within one year of enactment of the bill — prior to the next five-year lease program. Industry groups contend that Eastern GOM sales are too limited, asserting that the resource potential is significant. Environmental groups and some state officials contend that the risks of development to the environment and local economies are too great.

Oil and gas leasing in offshore California also has continued to be a controversial issue. Under the Coastal Zone Management Act of 1972 (16 U.S.C. §1451), development of federal offshore leases must be consistent with state coastal zone management plans. In 1999, MMS extended 36 of the 40 leases at issue in offshore California by granting lease suspensions, but the State of California contended that it should have first reviewed the suspensions for consistency with the state's coastal zone management plan. In June 2001, the U.S. Court for the Northern District of California agreed with the State of California and struck down the MMS suspensions.

The Bush Administration appealed this decision January 9, 2002, to the U.S. Ninth Circuit Court of Appeals, after the state rejected a more limited lease development plan that involved 20 leases using existing drilling platforms. However, on December 2, 2002, a three-judge panel of the Ninth Circuit upheld the District

¹⁰ This information is from discussions with Walter Cruickshank, Deputy Director of MMS, during April, 2006.

Court decision.¹¹ The Department of the Interior did not appeal this decision and is currently working with lessees to resolve the issue.

A breach-of-contract lawsuit was filed against MMS by nine oil companies seeking compensation for their undeveloped leases. On November 17, 2005, the U.S. Federal Court of Claims made a determination that the federal government breached its contract with the lessees regarding the 36 offshore California leases. Although the government was ordered to repay the lessees \$1.1 billion, the judge deferred a final judgement until additional claims (such as recovery of sunk costs) are resolved.

For further information on the *Minerals Management Service*, see its website at [<http://www.mms.gov>].

Office of Surface Mining Reclamation and Enforcement

The Surface Mining Control and Reclamation Act of 1977 (SMCRA, P.L. 95-87; 30 U.S.C. §1201 note) established the Office of Surface Mining Reclamation and Enforcement (OSM) to ensure that land mined for coal would be returned to a condition capable of supporting its pre-mining land use. SMCRA also established an Abandoned Mine Lands (AML) fund, with fees levied on coal production, to reclaim abandoned sites that pose serious health or safety hazards. The law provided that individual states and Indian tribes would develop their own regulatory programs incorporating minimum standards established by law and regulations. Fee collections have been broken up into federal and state shares. Grants are awarded to the states after applying a distribution formula to the annual appropriation that calculates not only how much money goes to each state, but also what portion came from each of the state and federal share accounts. In instances where states have no approved program, OSM directs reclamation.

Several states have pressed in recent years for increases in the AML appropriations, with an eye on the unappropriated balances in the state-share accounts that now exceed \$1 billion. The total unappropriated balance — including both federal and state share accounts in the AML fund — was \$1.8 billion by the end of FY2005. Western states are additionally critical of the program because, as coal production has shifted westward, these states are paying more into the fund. They have contended that they are shouldering a disproportionate share of the reclamation burden as more of the sites requiring remediation are in the East.¹²

¹¹ Ninth U.S. Circuit Court of Appeals, *California v. Norton*, 01-16637.

¹² Interest generated by unappropriated balances in the AML fund is transferred to the United Mine Workers of America Combined Benefit Fund, established by P.L. 102-486 to cover the unreimbursed health cost requirements of retired miners.

The FY2005 and FY2006 budget requests from the Administration were accompanied by a proposal to restructure the program, including a plan to return the unobligated balances to the states. The Administration plan was not widely supported. Other proposals for reauthorization of AML collections and restructuring the program have been introduced in the House and Senate, but Congress has not reached a consensus surrounding the structure of the program.

As a consequence, reauthorization of fee collection during the last few fiscal years has been for relatively short terms. In the 108th Congress, authorization for collection of AML fees was extended for nine months, to the end of June 2005 by the Consolidated Appropriations Act for 2005 (P.L. 108-447). The Emergency Supplemental Appropriations Act for FY2005 (P.L. 109-13) extended authorization for collection of the fees that are deposited to the AML reclamation fund to the end of FY2005. The FY2006 Interior appropriations law (P.L. 109-54) included the Senate language extending the authorization for collections to the end of June 2006. The FY2007 request does not include any broad Administration proposal to change the program, and instead seeks what the Administration describes as an “interim extension” through the end of FY2007 “while allowing the Administration to continue working with Congress on finding an appropriate, fiscally responsible and fair, long-term resolution to the reauthorization discussion.”¹³ In report language, the House Appropriations Committee supported the interim extension through December 31, 2007 that was included in the Emergency Supplemental Appropriations. The Committee also expressed that a more permanent solution is needed.

For FY2007, the Administration sought \$185.9 million, an increase of \$0.7 million over the FY2006 enacted level of \$185.2 million. The other component of the OSM budget is for regulation and technology programs. For regulation and technology, Congress provided \$108.9 million in FY2006, and the Administration requested \$112.2 million. The greater part of the \$3.3 million increase (3%) is for environmental protection. In total, the Administration requested \$298.1 million for the OSM for FY2007, a \$4.0 million increase (1%) over the FY2006 enacted level of \$294.2 million. The House supported the same levels of funding as the Administration requested for FY2007. See **Table 12** below.

In its FY2007 budget, the Administration requested \$1.5 million for *minimum program states*. These states have significant AML problems, but insufficient levels of current coal production to generate significant fees to the AML fund. While Congress is authorized to appropriate \$2 million annually to minimum program states, Congress has appropriated \$1.5 million to minimum program states since FY1996. The House retained language limiting funding for minimum program states to \$1.5 million. The SMCRA legislation also provided that 10% of AML collections would be allocated to the Rural Abandoned Mine Program (RAMP), administered by the Department of Agriculture. However, no funds have been requested for RAMP since FY1996, and the \$361 million balance in funds set aside for RAMP were transferred to the federal share of AML collections in the FY2006

¹³ U.S. Dept. of the Interior, Office of Surface Mining Reclamation and Enforcement, *Budget Justification and Performance Information, Fiscal Year 2007*, p. 49-50.

appropriation. The FY2007 Administration request recommended that this practice continue. The House included language transferring the RAMP balance to the federal share fund.

Table 12. Appropriations for the Office of Surface Mining Reclamation and Enforcement, FY2006-FY2007

(\$ in millions)

Office of Surface Mining Reclamation and Enforcement	FY2006 Approp.	FY2007 Request	FY2007 House Passed
Regulation and Technology	\$108.9	\$112.2	\$112.2
— <i>Environmental Protection</i>	78.4	81.0	81.0
Abandoned Mine Reclamation Fund	185.2	185.9	185.9
Total Appropriations	\$294.2	\$298.1	\$298.1

CRS Report RL32993. *Abandoned Mine Reclamation Fee on Coal*, by Nonna Noto.

Bureau of Indian Affairs

The Bureau of Indian Affairs (BIA) provides a variety of services to federally-recognized American Indian and Alaska Native tribes and their members, and historically has been the lead agency in federal dealings with tribes. Programs provided or funded through the BIA include government operations, courts, law enforcement, fire protection, social programs, education, roads, economic development, employment assistance, housing repair, dams, Indian rights protection, implementation of land and water settlements, management of trust assets (real estate and natural resources), and partial gaming oversight.

BIA's FY2006 direct appropriations are \$2.27 billion. For FY2007, the Administration proposed \$2.22 billion, a decrease of \$52.4 million (2.3%) below FY2006. The House approved \$2.23 billion, a reduction of \$39.6 million (2%) below FY2006, but an increase of \$12.8 million (0.6%) over the Administration proposal. For the BIA, its major budget components, and selected BIA programs, **Table 13** below presents funding figures for FY2006 and for the Administration and the House for FY2007, with the percentages of change from FY2006 to the House-passed level for FY2007. Decreases are shown with minuses.

Key issues for the BIA, discussed below, include the reorganization of the Bureau, especially its trust asset management functions, and problems in the BIA school system, including the proposal not to fund the Johnson-O'Malley program.

Budget Presentation. The BIA's budget presentation of its Operation of Indian Programs activities, in which programs with the same budget function (e.g., education) were included in different budget activities (e.g., "Tribal Priority Allocations," "Other Recurring Programs"), has been restructured so that programs

with the same function fall under the same budget activity (e.g., “Education”). **Table 13** below illustrates the new structure. The Tribal Priority Allocations (TPA) budget activity is significant to tribes because it covers many basic tribal services. Perhaps more importantly, tribes may apply their own priorities to TPA programs, moving funds among programs without prior BIA approval and without triggering congressional Appropriation Committees’ requirements for approval of reprogramming. The BIA identifies in its FY2007 *Budget Justifications* the amounts within the new budget activities that fall in the TPA category. Those amounts are shown in **Table 13**. According to BIA figures, the total TPA funding proposed for FY2007 was \$754.1 million. Other sources suggest TPA funding for FY2006 was \$769.5 million, but it is not certain that the BIA’s FY2007 figures cover all the same programs. The House Appropriations Committee commended the new budget structure but required the BIA to report on the budget structure and tribes’ reactions, TPA transparency, BIA management accountability, and BIA central and regional offices’ funding.

a. Tribal Priority Allocations (TPA) are a subset of funds for BIA Operation of Indian Programs. The amounts in this column are included in the “FY2007 Request — Total” column in the table.

BIA Reorganization. In April 2003, Secretary of the Interior Norton began implementing a reorganization of the BIA, the Office of Assistant Secretary-Indian Affairs (AS-IA), and the Office of Special Trustee for American Indians (OST) in the Office of the Interior Secretary. (See “Office of Special Trustee” section below.) The reorganization arose from issues and events related to trust funds and trust assets management, and is integrally related to the reform and improvement of trust management. Historically, the BIA has been responsible for managing Indian tribes’ and individuals’ trust funds and trust assets. Trust assets include trust lands and the lands’ surface and subsurface economic resources (e.g., timber, grazing, or minerals), and cover about 45 million acres of tribal trust land and 10 million acres of individual Indian trust land. Trust assets management includes real estate services, processing

of transactions (e.g., sales and leases), surveys, appraisals, probate functions, land title records activities, and other functions.

The BIA, however, has been frequently charged with mismanaging Indian trust funds and trust assets. Investigations and audits in the 1980s and after supported these criticisms, especially in the areas of accounting, linkage of owners to assets, and retention of records. This led to a trust reform act in 1994 and the filing of an extensive court case in 1996. (See “Office of Special Trustee” section below.) The 1994 act created the OST, assigning it responsibility for oversight of trust management reform. In 1996, trust fund management was transferred to the OST from the BIA, but the BIA retained management of trust assets.

Unsuccessful efforts at trust management reform in the 1990s led DOI to contract in 2001 with a management consultant firm. The firm’s recommendations included both improvements in trust management and reorganization of the DOI agencies carrying out trust management and improvement.¹⁴ After nearly a year of consultation with Indian tribes and individuals, DOI announced the reorganization in December 2002, even though the department and tribal leaders had not reached agreement on all aspects of reorganization. DOI, however, faced a deadline in the court case to file a plan for overall trust management reform, and reorganization was part of DOI’s plan.

The current reorganization of BIA, AS-IA, and OST chiefly involves trust management structures and functions. The BIA’s trust operations at regional and agency levels remains in those offices but are split off from other BIA services. The OST adds trust officers to BIA regional and agency offices to oversee trust management and provide information to Indian trust beneficiaries. The BIA, OST, and AS-IA, together with the Office of Historical Trust Accounting in the Secretary’s office, also are implementing a separate trust management improvement project. The project includes improvements in trust asset systems, policies, and procedures, historical accounting for trust accounts, reduction of backlogs, modernization of computer technology (the court case led in 2001 to a continuing shutdown of much of BIA’s World-Wide-Web connections), and maintenance of the improved system.

Many Indian tribes and tribal organizations, and the plaintiffs in the court case, have been critical of the new reorganization and have asked that it be suspended. Tribes contend that the reorganization is premature, because new trust procedures and policies are still being developed; that it insufficiently defines new OST duties; and that other major BIA service programs are being limited or cut to pay for the reorganization. For FY2004-FY2006, Congress responded to tribal concerns by excluding from BIA reorganization certain tribes that have been operating trust management reform pilot projects with their regional BIA offices. The House approved the same exclusion for FY2007. Congress has not, however, suspended or stopped the reorganization.

¹⁴ The report is available on the DOI website at [<http://www.doi.gov/indiantrust/pdf/roadmap.pdf>].

BIA School System. The BIA funds 185 elementary and secondary schools and peripheral dormitories, with over 2,000 structures, educating about 48,000 students in 23 states. Tribes and tribal organizations, under self-determination contracts and other grants, operate 120 of these institutions; the BIA operates the remainder. BIA-funded schools' key problems are low student achievement and, especially, a large number of inadequate school facilities.

The Johnson-O'Malley (JOM) program provides supplementary education assistance grants for tribes and public schools to benefit Indian students, and was funded at \$16.4 million in FY2006. The Administration proposed no funding for this program in FY2007, asserting that U.S. Department of Education programs under Titles I (education of the disadvantaged) and VII (Indian education) of the Elementary and Secondary Education Act provide funds for the same purposes, and that the funds should be used for BIA-funded schools. Opponents disagree that the Education Department programs can replace JOM's culturally-relevant programs. The House Appropriations Committee recommended restoring the JOM program to its FY2006 level, stating that other federal programs could not provide the funds because there was no guaranteed one-to-one match between Department of Education grants and JOM funds. The House approved the Committee's recommendation.

Many BIA school facilities are old and dilapidated, with health and safety deficiencies. BIA education construction covers both construction of new school facilities to replace facilities that cannot be repaired, and improvement and repair of existing facilities. Schools are replaced or repaired according to priority lists. The BIA has estimated the current backlog in education facility repairs at \$942 million.

Table 13 above shows education construction funds. For FY2007, the Administration proposed reducing the appropriation for education construction by \$49.3 million (24%). Included is a reduction for replacement-school construction of 43%. The Administration asserts that the BIA needs to focus on completing replacement schools funded in prior years. Opponents contend that a large proportion of BIA schools need replacement or major repairs and that hence funding should not be cut. The House approved the Administration's proposal for BIA education construction. However, the House Appropriations Committee disagreed that funding for new schools should be reduced while current school construction projects are finished and expressed concern about large amounts of unobligated construction balances from prior years. The Committee directed BIA to report on the projected obligation of current unobligated balances and on improvements in construction planning and design procedures, enrollment projections, and space standards.

CRS Report RS22056. *Major Indian Issues in the 109th Congress*, by Roger Walke.

Departmental Offices¹⁵

Insular Affairs. The Office of Insular Affairs (OIA) provides financial assistance to four insular areas — American Samoa, the Commonwealth of the Northern Mariana Islands (CNMI), Guam, and the U.S. Virgin Islands — as well as three former insular areas — the Federated States of Micronesia (FSM), Palau, and the Republic of the Marshall Islands (RMI). OIA staff manage relations between these jurisdictions and the federal government and work to build the fiscal and governmental capacity of units of local government.

The total OIA request for FY2007 is \$426.3 million, an amount slightly above that provided in FY2006 (\$425.6 million). OIA funding consists of two parts: (1) permanent and indefinite appropriations and (2) discretionary and current mandatory funding subject to the appropriations process. Of the total request for FY2007, \$347.1 million (81%) is mandated through statutes as follows:

- \$202.4 million to three freely associated states (RMI, FSM, and Palau) under conditions set forth in the respective Compacts of Free Association;¹⁶ and
- \$144.7 million in fiscal assistance through payments to territories, divided between the U.S. Virgin Islands for estimated rum excise and income tax collections and Guam for income tax collections.

Discretionary and current mandatory funds that require annual appropriations constitute the remaining 19% of the OIA budget. Two accounts — Assistance to Territories (AT) and the Compact of Free Association (CFA) — comprise discretionary and current mandatory funding. AT funding is used to provide grants for the operation of the government of American Samoa, infrastructure improvement projects on many of the insular area islands, and specified natural resource initiatives. The CFA account provides federal assistance to the freely associated states pursuant to compact agreements negotiated with the federal government.

Discretionary and mandatory appropriations for FY2006 total \$81.5 million (including government-wide rescissions enacted in P.L. 109-148), with AT funded at \$76.2 million and CFA at \$5.3 million. The FY2007 request would reduce AT funding to \$74.4 million, and CFA assistance to \$4.9 million, for a total of \$79.2 million. The House approved \$3.2 million more for AT (\$77.6 million) than had been requested, for increased oversight and technical assistance funding. The House passed CFA funding totaling \$5.4 million, \$0.5 million above the request to support food production activities necessary on Enewetak island as a result of destruction caused by World War II conflicts as well as atomic bomb testing. In total, the House

¹⁵ This section addresses selected activities/offices that fall under “Departmental Offices.” Total funding for Departmental Offices is identified in Table 25 at the end of this report.

¹⁶ Legislation to approve the amended compacts was enacted in the 108th Congress (P.L. 108-188). For background, see CRS Report RL31737, *The Marshall Islands and Micronesia: Amendments to the Compact of Free Association with the United States*, by Thomas Lum. The Compact with the Republic of Palau began in FY1994 and will terminate in FY2009.

passed \$82.9 million for Insular Affairs, 2% above FY2006 and 5% above the Administration's FY2007 request.

For further information on *Insular Affairs*, see its website at [<http://www.doi.gov/oia/index.html>].

Payments in Lieu of Taxes Program (PILT). For FY2007, the Administration requested \$198.0 million for PILT, down 15% from the FY2006 level of \$232.5 million. The Administration asserts that cutting PILT is part of an effort to reduce the deficit, and is consistent with historical appropriations levels. The House Appropriations Committee's draft contained \$216.0 million, but the Committee agreed to an amendment transferring \$12.0 million from the Smithsonian Institution to PILT, bringing the total to \$228.0 million. (See "*Smithsonian Institution, Business Ventures*" section of this report for more information.) A House floor amendment transferred an additional \$16.0 million from Interior Department salaries and expenses, to bring the figure to \$244.0 million. It passed by voice vote.

The PILT program compensates local governments for federal land within their jurisdictions which cannot be taxed. Since the beginning of the program in 1976, payments of more than \$3.6 billion have been made. The PILT program has been controversial, because in recent years the payment formula, which was indexed to the Consumer Price Index in 1994, has increased authorization levels. However, appropriations have grown less rapidly, and substantially slower than authorized amounts, ranging from 42% to 68% of authorized levels between FY2000 and FY2005 (the most recent year available).¹⁷ See **Table 14** below. County governments claim that the program as a whole does not provide funding comparable to property taxes, and further that rural areas in particular need additional PILT funds to provide the kinds of services that counties with more private land are able to provide.

Table 14. Authorized and Appropriated Levels for Payments in Lieu of Taxes, FY2000-FY2007
(\$ in millions)

Fiscal Year	Authorized Amount	Appropriated Amount	% of Authorized Amount
2000	\$317.6	\$134.0	42.2
2001	338.6	199.2	58.8
2002	350.8	210.0	59.9
2003	324.1	218.2	67.3
2004	331.3	224.3	67.7
2005	332.0	226.8	68.3
2006	<i>340.3</i>	232.5	68.3
2007	<i>347.8</i>	244.0 ^a	70.2

Notes: The FY2006 and FY2007 authorized levels, in *italics*, are estimates. Calculations of these levels assume: (1) all revenues from other payment programs are flat over the two year period;

¹⁷ When appropriations are not sufficient to cover the authorization, each county receives a pro rata share of the authorized amount.

(2) the number of acres eligible for PILT payments is unchanged; (3) all of the counties' populations are unchanged; and (4) no states change their "pass-through" laws. In consequence, only the changes in the Consumer Price Index would influence PILT payments. However, it is likely that at least some of these assumptions would need to be modified.

a. This figure is the amount passed by the House.

For further information on the *Payments in Lieu of Taxes* program, see the DOI website at [<http://www.doi.gov/pilt/>].

CRS Report RL31392. *PILT (Payments in Lieu of Taxes): Somewhat Simplified* by M. Lynne Corn.

Office of Special Trustee for American Indians. The Office of Special Trustee for American Indians (OST), in the Secretary of the Interior's office, was authorized by Title III of the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. §§4001 et seq.). The OST generally oversees the reform of Interior Department management of Indian trust assets, the direct management of Indian trust funds, establishment of an adequate trust fund management system, and support of department claims settlement activities related to the trust funds. Indian trust funds formerly were managed by the BIA, but in 1996 the Secretary transferred trust fund management to the OST. (See "Bureau of Indian Affairs" section above.)

Indian trust funds managed by the OST comprise two sets of funds: (1) tribal funds owned by about 300 tribes in approximately 1,450 accounts, with a total asset value of about \$2.9 billion; and (2) individual Indians' funds, known as Individual Indian Money (IIM) accounts, in about 277,000 accounts with a current total asset value of about \$400 million. (Figures are from the OST FY2007 budget justifications.) The funds include monies received from claims awards, land or water rights settlements, and other one-time payments, and from income from land-based trust assets (e.g., land, timber, minerals), as well as from investment income.

OST's FY2006 appropriation was \$222.8 million. The Administration proposed \$244.5 million for FY2007, an increase of \$21.7 million (10%). The House approved \$184.0 million for FY2007, a reduction of \$38.7 million (17%) from FY2006 and \$60.4 million (25%) from the proposal. **Table 15** below presents funding figures for FY2006-FY2007 for the OST. Key issues for the OST are an historical accounting for tribal and IIM accounts, and litigation involving tribal and IIM accounts.

Table 15. Appropriations for the Office of Special Trustee for American Indians, FY2006-FY2007

(\$ in thousands)

Office of Special Trustee for American Indians	FY2006 Approp.	FY2007 Request	FY2007 House Passed	
			Total	Change from FY2006
Federal Trust Programs	\$188,774	\$185,036	\$150,036	-21%
— <i>Historical Accounting</i>	56,353	56,353	45,000	-20%
Indian Land Consolidation	34,006	59,449	34,006	0%
Total Appropriations	\$222,780	\$244,485	\$184,042	-17%

Historical Accounting. For FY2007, the Administration proposed \$56.4 million for historical accounting activities, the same as enacted for FY2006. The House approved \$45.0 million for FY2007. The historical accounting effort seeks to assign correct balances to all tribal and IIM accounts, especially because of litigation. Because of the long historical period to be covered (some accounts date from the 19th century), the large number of IIM accounts, and the large number of missing account documents, an historical accounting based on actual account transactions is expected to be large and time-consuming. The Interior Department in 2003 proposed an extensive, five-year, \$335 million project to reconcile IIM accounts. The project would reconcile all transactions for certain types of accounts and all land-based transactions of \$5,000 and over, but a statistical sample for land-based transactions of less than \$5,000. OST continues to follow this plan, subject to court rulings (see “Litigation” below) or congressional actions. Plaintiffs in the litigation consider the statistical sampling technique invalid. For FY2007, the House Appropriations Committee did not disagree with DOI’s historical accounting plan, but expressed its intent to limit spending for historical accounting and also directed DOI to make quarterly reports on any use of funds from BIA “Operation of Indian Programs” for IIM litigation support costs.

Litigation. An IIM trust funds class-action lawsuit (*Cobell v. Norton*) was filed in 1996, in the federal district court for the District of Columbia, against the federal government by IIM account holders.¹⁸ Many OST activities are related to the *Cobell* case, including litigation support activities. The most significant issue for appropriations concerns the method for the historical accounting to estimate IIM accounts’ proper balances. The DOI estimated its proposed method would cost \$335 million over five years and produce a total owed to IIM accounts in the low millions. The plaintiffs’ method, based on estimated rates of errors applied to an agreed-upon figure for IIM throughput, was estimated to produce a total owed to IIM accounts of as much as \$177 billion, depending on the error rate used. After a lengthy trial, the court, in September 2003, rejected both the plaintiffs’ and DOI’s historical accounting plans and ordered DOI to account for all trust fund and asset transactions

¹⁸ *Cobell v. Norton* (Civil No. 96-1285) (D.D.C.). Updated information is available on the websites of the plaintiffs at [<http://www.indiantrust.com>], the DOI at [<http://www.doi.gov/indiantrust/>], and the Justice Department at [<http://www.usdoj.gov/civil/cases/cobell/index.htm>].

since 1887, without using statistical sampling. The Interior Department estimated that the court's choice for historical accounting would cost \$6-12 billion.

In the FY2004 Interior appropriations act, Congress enacted a controversial provision aimed at the court's decision. It directed that no statute or trust law principle should be construed to require DOI to conduct the historical accounting until either Congress had delineated the department's specific historical accounting obligations or December 31, 2004, whichever was earlier. Based on this provision, the DOI appealed the court's September 25, 2003 order. The U.S. Court of Appeals for the District of Columbia temporarily stayed the September 25 order. During the stay, on April 5, 2004, the IIM plaintiffs and the federal government commenced mediation. On December 10, 2004, the Appeals Court overturned much of the September 25 order, finding that the congressional provision prevented the district court from requiring DOI to follow its directions for a historical accounting. The Appeals Court noted that the provision expired on December 31, 2004, but did not discuss the district court's possible reissue of the order. On February 23, 2005, the district court issued an order on historical accounting very similar to its September 2003 order, requiring that an accounting cover all trust fund and asset transactions since 1887 and not use statistical sampling. The DOI, which estimated that compliance with the new order would cost \$12-13 billion,¹⁹ appealed the order. The Appeals Court on November 15, 2005, vacated the district court's February 2005 order. The district court has not yet issued another order, and the OST continues its historical accounting under its September 2003 plan.

Congress has long been concerned that the current and potential costs of the *Cobell* lawsuit may jeopardize DOI trust reform implementation, reduce spending on other Indian programs, and be difficult to fund. Besides the ongoing expenses of the litigation, possible costs include \$12-13 billion for the court-ordered historical accounting, a *Cobell* settlement that might cost as much as (1) the court-ordered historical accounting, (2) the more than \$100 billion that *Cobell* plaintiffs estimate their IIM accounts are owed, or (3) the \$27.5 billion that the *Cobell* plaintiffs have proposed as a settlement amount.²⁰ Among the funding sources for these large costs discussed in a 2005 House Interior Appropriations Subcommittee hearing were discretionary appropriations and the Treasury Department's "Judgment Fund,"²¹ but some senior appropriators consider the Fund insufficient even for a \$6-\$13 billion dollar settlement.²² Among other options, Congress may enact another delay to the court-ordered accounting, direct a settlement, or delineate the department's historical

¹⁹ Testimony from the Interior Department estimated the cost at \$12-13 billion (James Cason, Associate Deputy Secretary, U.S. Dept. of the Interior, Statement before the House Committee on Appropriations, Subcommittee on Interior, Environment, and Related Agencies, March 17, 2005). Previous Interior estimates of the cost were \$6-12 billion.

²⁰ Trust Reform and Cobell Settlement Workgroup, "Principles for Legislation," June 20, 2005, p. 2, at [http://www.indiantrust.com/_pdfs/20050620SettlementPrinciples.pdf].

²¹ The Judgment Fund is a permanent, indefinite appropriation for paying judgments against, and settlements by, the U.S. Government. (See 31 U.S.C. §1304.)

²² Matt Spangler, "Treasury Fund May Be Short of Cash Needed to Settle Indian royalty Case," *Inside Energy with Federal Lands* (March 21, 2005), p. 6.

accounting obligations (which could limit, or increase, the size of the historical accounting). Settlement bills (S. 1439 and H.R. 4322) would establish in the Treasury Department's general fund an IIM claim settlement fund with appropriations from the Judgment Fund. The dollar size of the fund is not stated and is still being discussed among the plaintiffs, the Administration, and Congress. In considering the FY2007 Interior appropriations bill, the House Appropriations Committee expressed its desire that *Cobell* be resolved but stated no opinion on a settlement amount.

For further information on the *Office of Special Trustee for American Indians*, see its website at [<http://www.ost.doi.gov/>].

National Indian Gaming Commission. The National Indian Gaming Commission (NIGC) was established by the Indian Gaming Regulatory Act (IGRA) of 1988 (25 U.S.C. §§2701 et seq.) to oversee Indian tribal regulation of tribal bingo and other *Class II* operations, as well as aspects of *Class III* gaming (e.g., casinos and racing).²³ The primary appropriations issue for NIGC is whether its funding is adequate for its regulatory responsibilities.

The NIGC is authorized to receive annual appropriations of \$2 million, but its budget authority consists chiefly of annual fees assessed on tribes' Class II and III operations. IGRA currently caps NIGC fees at \$8 million per year. The NIGC in recent years has requested additional funding because it has experienced increased demand for its oversight resources, especially audits and field investigations. Congress, in the FY2003-FY2006 appropriations acts, increased the NIGC's fee ceiling to \$12 million, but only for FY2004-FY2007. The FY2007 NIGC budget proposal requested that the fee ceiling be increased to \$13 million for FY2008, and the House agreed.

In the FY2005-FY2006 NIGC budget requests, the Administration proposed language amending IGRA to create an adjustable, formula-based ceiling for fees instead of the current fixed ceiling. In response, several bills in the current Congress, including S. 1295 and H.R. 3351, included the Administration's proposal to replace IGRA's dollar ceiling with a percentage ceiling. Supporters contend that a formula-based fee ceiling would allow NIGC funding to grow as the Indian gaming industry grows. Gaming tribes do not support the increased fee ceiling or the proposed amendment of IGRA's fee ceiling. They assert that NIGC's budget should first be reviewed in the context of extensive tribal and state expenditures on regulation of

²³ Classes of Indian gaming were established by the IGRA, and NIGC has different but overlapping regulatory responsibilities for each class.

Indian gaming, and that changes in NIGC's fees should be developed in consultation with tribes. Congress enacted the formula-based fee ceiling — 0.08% of the gross gaming revenues of all gaming operations subject to regulation under IGRA (H.R. 3351; P.L.109-221). If the fee ceiling percentage were applied to the latest NIGC figures for gross Indian gaming revenues (\$19.4 billion in 2004), the fee ceiling based on 2004 would be \$15.5 million.

During FY1999-FY2006, all NIGC activities have been funded from fees, with no direct appropriations. The Administration did not propose, nor did the House approve, a direct appropriation for the NIGC for FY2007.

For further information on the *National Indian Gaming Commission*, see its website at [<http://www.nigc.gov>].

Title II: Environmental Protection Agency

EPA was established in 1970 to consolidate federal pollution control responsibilities that had been divided among several federal agencies. EPA's responsibilities have grown as Congress has enacted an increasing number of environmental laws, as well as major amendments to these statutes. Among the agency's primary responsibilities are the regulation of air quality, water quality, pesticides, and toxic substances; the management and disposal of solid and hazardous wastes; and the cleanup of environmental contamination. EPA also awards grants to assist state and local governments in controlling pollution.

EPA's funding over time generally reflects an increase in overall appropriations to fulfill a rising number of statutory responsibilities. Without adjusting for inflation, the agency's appropriation has risen from \$1.0 billion when the agency was established in FY1970 to a high of \$8.4 billion in FY2004. The House approved \$7.58 billion for EPA in FY2007. The House amount is \$261.2 million more than the President's request of \$7.32 billion, but \$48.7 million less than the FY2006 appropriation of \$7.63 billion. However, Congress made an additional \$80.0 million available to EPA in FY2006 by rescinding and redirecting previously appropriated agency funds that had not been obligated for certain activities.²⁴ Consequently, the proposed funding level for EPA in the House bill is \$128.7 million less than overall FY2006 funding of \$7.71 billion, which included *new* appropriations of \$7.63 billion and \$80.0 million in rescinded prior year funds redirected to FY2006.

The House approved the House Appropriations Committee's recommended funding level for EPA for FY2007, and two floor amendments increased the agency's funding by \$3.8 million. One amendment included an additional \$1.8 million for Energy Star programs aimed at improving energy efficiency. The second amendment included \$2.0 million for EPA's National Clean Diesel Initiative. The House also passed other floor amendments that would affect EPA's implementation of certain activities. For example, one amendment would prohibit funds from being spent on implementing controversial guidance on determining federal jurisdiction over wetlands. (See CRS Issue Brief IB97014, *Wetlands Issues*, by Jeffrey A. Zinn and Claudia Copeland.) A few other amendments relevant to EPA were not agreed to. For example, one amendment would have provided \$800 million in additional funds for several agencies in the bill, of which \$250 million would have been for EPA grants to states for Clean Water State Revolving Funds (SRFs). These grants assist states in issuing loans to communities for wastewater infrastructure improvements, discussed below.

²⁴ P.L. 109-54 rescinded \$80.0 million from prior years' appropriations that EPA had not obligated for contracts, grants, and interagency agreements, for which the funding authorization had expired. The law redirected these funds to be available in FY2006 but did not specify how this funding was to be allocated among EPA's accounts. EPA's budget justification indicates that for FY2006, the agency allocated \$66.0 million to State and Tribal Assistance Grants, \$11.0 million to Hazardous Substance Superfund, \$2.0 million to Environmental Programs and Management, and \$1.0 million to Science and Technology.

Traditionally, EPA's annual appropriation has been requested and enacted according to various line-item appropriations accounts, of which there currently are eight. **Table 16** indicates amounts by appropriations account for FY2006 enacted, FY2007 requested, and FY2007 House passed.

Table 16. Appropriations for the Environmental Protection Agency, FY2006-FY2007
(\$ in millions)

Environmental Protection Agency	FY2006 Enacted	FY2007 Requested	FY2007 House Passed
Science and Technology			
— <i>Direct Appropriations</i>	\$730.8	\$788.3	\$808.0
— <i>Transfer in from Superfund account</i>	30.2	27.8	30.0
Science and Technology Total	761.0	816.1	838.0
Environmental Programs and Management	2,346.7	2,306.6	2,338.2
Office of Inspector General			
— <i>Direct Appropriations</i>	36.9	35.1	35.1
— <i>Transfer in from Superfund account</i>	13.3	13.3	13.3
Office of Inspector General Total	50.2	48.4	48.4
Buildings & Facilities	39.6	39.8	39.8
Hazardous Substance Superfund Total	1,242.1	1,259.0	1,256.9
— <i>Transfer out to Office of Inspector General</i>	(13.3)	(13.3)	(13.3)
— <i>Transfer out to Science and Technology</i>	(30.2)	(27.8)	(30.0)

State and Tribal Assistance Grants Total	3,133.7	2,797.4	3,009.3
Total Appropriations	\$7,625.4	\$7,315.5	\$7,576.7

Source: Prepared by the Congressional Research Service (CRS). Amounts are from the House Appropriations Committee, reflecting rescissions and supplementals.

^a Congress made an additional \$80.0 million available to EPA in FY2006 by rescinding and redirecting prior years' appropriated funds that had not been obligated for contracts, grants, and interagency agreements, for which the funding authorization had expired. This \$80.0 million is shown as a reduction in the above table to reflect *new* appropriations for FY2006. Including this \$80.0 million, Congress made a total of \$7.71 billion available to EPA in FY2006.

Key Funding Issues

The FY2007 House-passed bill includes both decreases and increases for individual EPA programs and activities throughout the various appropriations accounts when compared to the President's FY2007 request and the FY2006

appropriation. Although there have been varying levels of interest in FY2007 funding for the agency's programs and activities, funding for water infrastructure within the State and Tribal Assistance Grants (STAG) account, the cleanup of hazardous waste sites within the Superfund account, scientific research, and air quality programs have received the most attention thus far in the second session of the 109th Congress. Other areas of interest include funding for EPA's homeland security activities, and congressional funding priorities for individual research and water infrastructure projects, often referred to as earmarks.²⁵ The FY2007 House-passed bill includes a total of \$270.0 million for congressional priority projects, which are identified in the House Appropriations Committee report. Congress set aside \$280.0 million for such projects in the FY2006 appropriation. As in past years, the President's FY2007 request did not include any funding for congressional priority projects in EPA's budget. Proposed funding for each of the above activities in which there has been broad congressional interest is discussed further below.

Water Infrastructure. From appropriations provided within the STAG account, EPA issues grants to states to support Clean Water and Drinking Water State Revolving Funds (SRFs). These funds provide seed monies for state loans to communities for wastewater and drinking water infrastructure projects, respectively. The FY2007 House-passed bill would provide the President's request of \$687.6 million for Clean Water SRF grants, \$199.2 million less than the FY2006 appropriation of \$886.8 million. The proposed decrease has been contentious, as there is disagreement over the adequacy of funding to meet local needs, such as municipal sewage treatment plant upgrades. Although appropriations for these grants have declined in recent years, Congress has appropriated significantly more funding than the President has requested to meet these needs. However, the House's decision to approve the President's requested decrease for FY2007 departs from this trend.

The FY2007 House-passed bill also would provide the President's request of \$841.5 million for Drinking Water SRF grants, \$4.0 million more than the FY2006 appropriation of \$837.5 million. The House's decision to fund Drinking Water SRF grants at the requested level is consistent with past years, as there generally has been less disagreement between Congress and the Administration about the appropriate funding level for these grants. However, some Members support higher funding to meet local drinking water needs, such as assistance to help communities comply with new standards for drinking water contaminants (e.g., arsenic and radium).

In addition to funding the SRFs, Congress has provided specific funds in past appropriations for water infrastructure projects in specific communities. The House bill would set aside \$200.0 million for "congressional priority" water infrastructure grants within the STAG account, slightly more than the \$197.1 million set aside in the FY2006 appropriation. The House Appropriations Committee identified the recipients of these funds in its report on the FY2007 bill. As in past years, the President's FY2007 budget did not include any funding for congressional priority water infrastructure projects. Whether these needs should be met with SRF loan monies or earmarked grant assistance has become controversial. Due in part to such

²⁵ See CRS Report 98-518, *Earmarks and Limitations in Appropriations Bills*, by Sandy Streeter.

concerns, and the competing needs of many EPA activities in general, the amount of funding earmarked for water infrastructure projects has declined since FY2004.²⁶

Superfund and Brownfields. Another prominent issue is the adequacy of funding for the Superfund program to clean up the nation's most hazardous waste sites. Some Members, states, and environmental organizations have contended that more funds than have been appropriated are necessary to speed the pace of cleanup at contaminated sites. The House bill would provide a total of \$1.26 billion for the Superfund account (prior to transfers to other accounts), \$14.8 million more than the FY2006 appropriation, but \$2.1 million less than requested. This account funds many activities related to cleanup, including administration, enforcement, and certain homeland security functions. However, only a portion of the funding is for "actual" (i.e., physical) cleanup of contaminated sites. Of the House amount, \$832.9 million would be for site cleanup, \$1.0 million less than the FY2006 appropriation. The President had requested \$822.9 million for site cleanup. Some Members had questioned the President's proposed decrease during budget oversight hearings, in light of public concerns about the pace of cleanup.

The source of funding for the Superfund program also has been an ongoing issue. Nearly all of the House amount and the President's FY2007 request for the Superfund account would be provided from general U.S. Treasury revenues. Three dedicated taxes (on petroleum, chemical feedstocks, and corporate income) historically provided the majority of funding for the Superfund program. These taxes expired at the end of 1995, and the remaining revenues were essentially used up by the end of FY2003. Since then, Congress has funded the program almost entirely with general revenues. Although cost recoveries from responsible parties, fines and penalties, and interest on the unexpended balance of the trust fund continue to contribute revenue to the Superfund program, these sources continue to be relatively small compared to general revenues. Some Members of Congress advocate reinstating the Superfund taxes and assert that the use of general revenues undermines the "polluter pays" principle. Other Members and the Administration counter that viable parties are still required to pay for the cleanup of contamination and that polluters are not escaping their responsibility. According to EPA, responsible parties pay for the cleanup at more than 70% of Superfund sites.

There also has been ongoing interest in the adequacy of funding to clean up other contaminated sites, referred to as brownfields. The cleanup of these sites is funded separately from Superfund. Typically, brownfields are abandoned, idled, or underutilized commercial and industrial properties with levels of contamination less hazardous than a Superfund site, but that still warrant cleanup before the land can be safe for reuse. The House approved the President's request of \$163.3 million for EPA's Brownfields program to assist states and tribes in the cleanup of these properties, a slight increase above the FY2006 appropriation of \$162.5 million.

EPA's Homeland Security Activities. Under the Bioterrorism Act of 2002, and Homeland Security Presidential Directives 7, 9 and 10, EPA is the lead

²⁶ See CRS Report RL32201, *Water Infrastructure Project Earmarks in EPA Appropriations: Trends and Policy Implications*, by Claudia Copeland.

federal agency for coordinating security of U.S. water systems, and plays a role in early warning monitoring and decontamination associated with potential attacks using biological contaminants. Although EPA's homeland security funding is a relatively small portion compared to most other federal agencies, the EPA activities supported with this funding, and their competition for funds with core environmental programs, have been a concern to some Members of Congress.

The FY2007 House-passed bill includes \$143.7 million for EPA's homeland security activities, an increase above the FY2006 appropriation of \$129.1 million, but less than the FY2007 request of \$184.0 million. In its report on the FY2007 bill, the House Appropriations Committee indicated that it could only include a "modest" increase above FY2006 for EPA's homeland security activities (as well as for certain programs authorized by the Energy Policy Act of 2005) because of limited funding available for the bill as a whole and competing funding needs for activities that the committee viewed as essential to the agency's mission and as having a higher priority (H.Rept. 109-465, p.93).

The House amount of \$143.7 million for EPA's homeland security activities would be distributed among five of the agency's accounts: S&T, EPM, Superfund, Building and Facilities, and STAG. This funding level would support various activities, including critical water infrastructure protection, laboratory preparedness, decontamination, protection of EPA personnel and operations, and communication. Among these five accounts, the S&T account would include the largest portion of funding for EPA's homeland security activities. The House bill would provide \$61.8 million within this account for these activities, an increase above the FY2006 appropriation of \$50.2 million. The increase above FY2006 is intended for one additional project for a water quality surveillance and monitoring pilot project, referred to as the "Water Sentinel Initiative," which EPA began in FY2006.

The FY2007 request had included \$91.8 million within the S&T account for homeland security activities, a large portion of which would have funded 4 additional pilots under the above initiative. Some Members of Congress and scientists had expressed concerns that the increase requested for homeland security funding within the S&T account for activities such as these pilots was competing with EPA's core research programs, for which funding has been declining in recent years (see related discussion below). In its report, the House Appropriations Committee directed OMB and EPA to coordinate future funding requests for the Water Sentinel Initiative through the Department of Homeland Security.

Scientific Research. EPA's S&T account provides the bulk of the funding for developing the scientific knowledge and tools necessary to support decisions on preventing, regulating, and abating environmental pollution. It also supports efforts to advance the base of understanding for environmental sciences. This account incorporates elements of the former Research and Development account in place until FY1996. The House bill would provide \$838.0 million for the S&T account, including a transfer of \$30.0 million from the Superfund account. Similar to transfers in past appropriations, this funding would support research and development related to environmental cleanup. The House amount for the S&T account is more than the FY2006 appropriation of \$761.0 million (including a transfer of \$30.2 million), and more than the FY2007 request of \$816.1 million

(including a transfer of \$27.8 million). The House bill also included \$30.0 million within this account for “research/congressional priorities” (earmarks), compared to \$32.9 million that Congress provided in FY2006. The FY2007 request did not include any funding for these types of projects.

A significant portion of the increase above FY2006 in the House bill for the S&T account is in the form of an accounting adjustment, as the President’s FY2007 budget proposed. This adjustment would transfer \$61.0 million into the S&T account for “facilities infrastructure and operations.” These activities have been funded within the EPM account through FY2006. The *net* effect is that the total House amount of \$838.0 million for the S&T account, without the \$61.0 million adjustment, would be a significantly smaller increase relative to the FY2006 appropriation.

Among individual research activities, as opposed to the account level, the House-passed bill includes *both* increases and decreases within the S&T account, relative to the FY2006 appropriation and the FY2007 request. For example, the House bill includes \$238.0 million for the “Human Health and Ecosystems” research program area, slightly more than the FY2006 appropriation but significantly more than the FY2007 request of \$228.2 million. Research fellowships are funded within this program area, including Science to Achieve Results (STAR) fellowships in which there has been ongoing congressional interest. The House bill includes \$11.7 million for all fellowships within this area, slightly more than the FY2006 appropriation, but significantly more than the FY2007 request of \$8.4 million with the increase devoted to STAR fellowships. Homeland security funding within the S&T account is another example of differing priorities for individual activities, as discussed above.

Although there are varying views on the adequacy of funding for specific scientific research activities, such as those noted above, there has been much debate about support for scientific research in general. Some Members of Congress,²⁷ scientists, and environmental organizations have expressed concern about declining funding for what they refer to as “core” scientific research essential to ongoing federal roles. Debate regarding funding for scientific research administered by EPA and other federal agencies often has focused on the question of whether these agencies’ actions are based on “sound science,” and how scientific research is applied in developing federal policy. The Administration contends that the reductions in funding that it requested for some scientific research activities in FY2007 would not impair the quality of science, citing that less funding is needed in certain areas because of efficiencies gained and cost savings realized from consolidating certain research areas, and the fruition of certain research projects. As noted above, the House bill would increase funding for certain research activities, differing from the Administration in what constitutes adequate funding.

²⁷ See the House Science Committee Majority Views and Estimates on the President’s FY2007 budget: [<http://www.house.gov/science/hot/FinalViewsandEstimatesFY2007.pdf>], and the House Science Committee Minority Views and Estimates on the President’s FY2007 budget: [http://sciencedems.house.gov/randd/views_fy07.htm], visited April 12, 2006.

Clean Air Act Implementation and Research. EPA's implementation of, and proposed changes to, several Clean Air Act provisions, as well as efforts to address climate change, have elevated interest in funding for air quality programs among Members of Congress.²⁸ Funding within the S&T, EPM, Superfund, and STAG accounts would support various programmatic implementation, research, and monitoring activities addressing toxic air pollutants and air quality, radiation, climate protection, indoor air quality, and radon. The FY2007 House-passed bill includes both increases and decreases relative to the FY2006 appropriation and the FY2007 request for a variety of air quality activities throughout these accounts.

The House-passed bill includes less funding than requested in various EPA accounts for a new category introduced in the President's budget for implementation of certain activities authorized in the Energy Policy Act of 2005 (EPAct, P.L. 109-58).²⁹ These activities primarily focus on air quality. As noted above, the House Appropriations Committee indicated that it was unable to fully fund the FY2007 request for EPAct activities given the limited funding for the bill as a whole and competing funding needs for activities it viewed as essential to the agency's mission and as having a higher priority. For example, the House bill would provide \$28.0 million for a new diesel emissions reduction grant program within the EPAct category, whereas the President had requested \$49.5 million. In some cases, EPAct activities would absorb certain activities funded as separate line-items in prior years. For example, a portion of the funding for the new diesel emissions reduction grant program would support Clean School Bus grants, for which Congress provided \$6.9 million as a separate line-item in FY2006. Overall, the House amount and the President's request for EPAct air quality activities are less than what Congress authorized in the 2005 statute.

The FY2007 House-passed bill also includes \$220.3 million for a categorical grant within the STAG account for state and local air quality programs. The House amount is roughly the same as the FY2006 appropriation, but is more than the \$185.2 million request. Some Members and state and local air pollution control officials³⁰ had raised concerns about the President's requested reduction for this categorical grant, contending that more funds are needed as a result of increasing Clean Air Act responsibilities. For example, EPA has promulgated several new air quality regulations within the past two years, requiring more of states and local governments.

Title III: Related Agencies

Department of Agriculture: Forest Service

The House agreed to \$4.19 billion for the Forest Service (FS) for FY2007. This was \$95.5 million (2%) more than the President's request of \$4.10 billion, and \$65.5 million (2%) less than FY2006 appropriations of \$4.26 billion.³¹ As discussed below and shown in **Figure 1**, FS appropriations are provided in several major accounts, including Forest and Rangeland Research; State and Private Forestry (S&PF); National Forest System (NFS); Wildland Fire Management; Capital Improvement and Maintenance (Infrastructure); and Other programs (substantially land acquisition).

Figure 1. Forest Service FY2007 Budget Request
(\$ in millions)

Major FS Issues in Appropriations. Significant FS issues have been raised during consideration of the FY2007 Interior appropriations bill. In the FS budget proposal, the President proposed selling about 300,000 acres of national forest lands, with the proceeds to pay for a five-year extension of FS payments under the Secure Rural Schools and Community Self-Determination Act of 2000 (P.L. 106-393). Current FS authorities to sell or otherwise dispose of national forest lands are extremely narrow, so legislation would be needed to authorize the land sale. The Administration has sent to Congress draft legislation with criteria to determine lands eligible for sale, such as lands that are inefficient or difficult to manage because they

³¹ Data for FY2006 and previous years include emergency and supplemental appropriations and rescissions.

are isolated or scattered. Relevant legislation has not been introduced to date, and the House did not include such authority in the bill as passed.

Another issue was raised on the House floor. The House agreed to an amendment to prohibit the use of funds in the bill to plan, design, study, or build roads in the Tongass National Forest, in Alaska, for harvesting timber. A similar amendment to the FY2005 Interior Appropriations Act had passed the House, but was removed before enactment. In the FY2006 bill, a similar amendment was struck on a point of order as legislation on an appropriations bill. The amendment to the FY2007 bill was different to avoid a point-of-order being raised.

Wildland Fire Management. Fire funding and fire protection programs continue to be controversial. Ongoing discussions include questions about funding levels and locations for various fire protection treatments, such as thinning and prescribed burning to reduce fuel loads and clearing around structures to protect them during fires. Another focus is whether, and to what extent, environmental analysis, public involvement, and challenges to decisions hinder fuel reduction and post-fire rehabilitation activities. (For historical background and descriptions of activities, see CRS Report RS21544, *Wildfire Protection Funding*, by Ross W. Gorte.)

The National Fire Plan comprises the FS wildland fire program (including fire programs funded under other line items) and fire fighting on DOI lands; the DOI wildland fire monies are appropriated to BLM. Congress does not fund the National Fire Plan in any one place in Interior appropriations acts. The total can be derived by combining the several accounts which the agencies identify as National Fire Plan funding. For FY2007, the House passed \$2.62 billion, \$48.2 million (2%) more than the President requested for the National Fire Plan, as shown in **Table 17** below. This was \$78.6 million (3%) more than total FY2006 funding of \$2.54 billion.

The House included \$769.3 million for BLM wildfire funding in FY2007, \$0.3 million less than the President requested, and \$14.0 million (2%) more than FY2006. The House passed FS wildfire funding of \$1.85 billion for FY2007, \$48.6 million (3%) more than the request, and \$64.7 million (4%) more than FY2006. The FS and BLM wildfire line items include funds for fire suppression (fighting fires), preparedness (equipment, training, baseline personnel, prevention, and detection), and other operations (rehabilitation, fuel reduction, research, and state and private assistance).

Notes: Includes funding from BLM and FS Wildland Fire Management accounts and from FS State and Private Forestry (Cooperative Fire Protection).

This table differs from the detailed tables in CRS Report RS21544, *Wildfire Protection Funding*, by Ross W. Gorte, because that report rearranges data to distinguish funding for protecting federal lands, for assisting in nonfederal land protection, and for fire research and other activities.

- a. Emergency supplemental and contingent appropriations are included in agency totals.
- b. Fire research and fuel reduction funds are included under Other Operations.

The House included \$998.5 million for wildfire suppression funding in FY2007, \$4.7 million (0.5%) less than the request, and \$77.6 million (8%) more than FY2006. Neither the House nor the Administration included contingent or emergency funding (\$524.1 million for FY2005). The agencies have the authority to borrow unobligated funds from any other account to pay for firefighting, for instance, if the fire season is worse than average. Such borrowing typically is repaid, commonly through subsequent emergency appropriations bills.

For FY2007, the House passed \$930.7 million for fire preparedness, equal to the request; this is \$1.1 million more than the FY2006 appropriation. The House-passed level and request include an increase of \$6.0 million (2%) for BLM preparedness and a decrease of \$4.8 million (1%) for FS preparedness.

The House included a total of \$689.6 million for other fire operations, \$52.9 million (8%) more than the request, and \$0.1 million less than FY2006. Fuel reduction funding (under the President's Healthy Forests Initiative and the Healthy Forests Restoration Act of 2003, P.L. 108-148) was approved at \$496.6 million, \$5.0 million (1%) more than the request and \$8.3 million (2%) more than FY2006. The House-passed increase above the request is all for FS fuel reduction. Compared to FY2006, FS fuel reduction would rise by \$16.7 million (6%) while BLM fuel reduction for FY2007 would decline by \$8.3 million (4%). Funding for the remaining FS other fire operation programs (fire research, site rehabilitation, forest health, and state fire assistance) was approved at more than the request, with the increases ranging from \$2.8 million to \$13.9 million (13% — 153%). The BLM's state and local fire assistance program would be terminated, while the other programs would generally be maintained at FY2006 levels.

State and Private Forestry. While funding for wildfires has been the center of debate, proposed and recommended changes in State and Private Forestry (S&PF) — programs that provide financial and technical assistance to states and to private forest owners — have also attracted attention. For FY2007, the House approved S&PF funding of \$228.6 million — \$15.8 million (6%) less than the request and \$80.4 million (26%) less than FY2006. The House levels differ from the Administration's proposals for most accounts.

For S&PF forest health management (insect and disease control on federal and cooperative [nonfederal] lands) in FY2007, the House passed \$101.9 million, \$17.4 million (21%) more than the request and \$1.8 million (2%) more than FY2006. This level was 9% above the request for federal lands and 38% above the request for cooperative lands.

For S&PF Cooperative Fire Assistance to states and volunteer fire departments, the House included \$39.0 million, \$6.2 million (19%) more than the request and \$0.2 million (0.5%) more than appropriated for FY2006. Nearly all the difference was in assistance to states, with the requested and House-passed level for assistance to volunteer fire departments changing by about 2% from FY2006.

For Cooperative Forestry (assistance for forestry activities on state and private lands) in FY2007, the House included \$80.8 million, \$41.4 million (34%) less than the request and \$52.4 million (39%) less than FY2006. For Forest Legacy (to purchase title or easements for lands threatened with conversion to nonforest uses, such as for residences), the House passed \$12.7 million, reduced by \$3.4 million by use of prior year balances. The net funding of \$9.3 million is 15% of the \$61.5 million requested for FY2007, and 16% of the \$56.5 million enacted for FY2006. For Forest Stewardship (for states to assist private landowners), the House included \$37.0 million, \$3.1 million (9%) more than the request and \$2.9 million (8%) more than FY2006. Urban and Community Forestry (financial and technical assistance to localities) received \$29.5 million, \$2.7 million (10%) more than requested and \$1.1 million (4%) more than FY2006. The House accepted the request to terminate the Economic Action Program (EAP; for rural community assistance, wood recycling, and Pacific Northwest economic assistance); FY2006 funding was \$9.5 million and FY2005 funding was \$19.0 million. However, the House included \$5.0 million of S&PF funding for resource inventory, funded at \$4.6 million in FY2006, but proposed for termination in the Administration's budget request.

For international programs (technical forestry assistance to other nations), the House passed \$7.0 million, \$2.0 million (41%) more than the request and slightly (\$64,000, 1%) more than FY2006.

Table 18. Appropriations for FS State & Private Forestry, FY2004-FY2007

(\$ in millions)

State and Private Forestry	FY2004 Approp.	FY2005 Approp.	FY2006 Approp.	FY2007 Request	FY2007 House Passed

a. Reflects an appropriation of \$12.7 million reduced by use of \$3.4 million of prior year balances.

Infrastructure. For Capital Improvement and Maintenance, the House approved \$411.0 million, \$28.4 million (7%) more than the request and \$27.3 million (6%) less than FY2006. Significant changes from the request were passed for the various programs. For **Facilities**, the House passed \$15.1 million (12%) less than the request — \$5.0 million (7%) less in maintenance and \$10.1 million (17%) less in construction; the House-passed level for facilities was \$8.7 million (7%) below FY2006, reducing construction by \$23.0 million (31%) and increasing maintenance by \$14.3 million (28%). For **Roads**, the House approved \$30.5 million (17%) more than the request — reducing construction by \$10.0 million (11%) and increasing maintenance by \$40.5 million (44%); the House-passed funding for roads was \$7.4 million (3%) below FY2006, increasing construction by \$4.1 million (5%) and reducing maintenance by \$11.6 million (8%). For **Trails**, the House passed \$13.1 million (22%) more than the request — \$7.7 million (31%) more in construction and \$5.4 million (15%) more in maintenance. The House-passed level for **Infrastructure Improvement**, to reduce the agency's backlog of deferred maintenance (estimated at \$6.0 billion), matched the request, at \$9.3 million, \$3.4 million (27%) less than FY2006.

Other Accounts. For **FS Research** in FY2007, the House approved \$280.3 million, \$12.5 million (5%) more than the request and \$2.6 million (1%) more than FY2006. For the **National Forest System (NFS)**, the House passed \$1.44 billion, \$45.6 million (3%) more than the request and \$8.0 million (1%) more than FY2006.

The House included the proposed \$32.5 million (12%) increase in forest (timber) products. Except for the proposed and House approved 80% reduction in funding for Valles Caldera National Preserve, the House level for other NFS accounts was generally much closer to the FY2006 level than to the request. For **Land Acquisition** with LWCF funds, the House passed \$7.5 million, \$17.6 million (70%) less than the request and \$34.3 million (82%) less than FY2006. (See the “Land and Water Conservation Fund (LWCF)” section in this report.)

Department of Health and Human Services: Indian Health Service

The Indian Health Service (IHS) is responsible for providing comprehensive medical and environmental health services for approximately 1.8 million American Indians and Alaska Natives (AI/AN) who belong to 561 federally recognized tribes located in 35 states. Health care is provided through a system of federal, tribal, and urban Indian-operated programs and facilities. IHS provides direct health care services through 33 hospitals, 52 health centers, 2 school health centers, 38 health stations, and 5 residential treatment centers. Tribes and tribal groups, through IHS contracts and compacts, operate another 15 hospitals, 220 health centers, 9 school health centers, 98 health stations, and 162 Alaska Native village clinics, and 28 residential treatment centers. IHS, tribes, and tribal groups also operated 9 regional youth substance abuse treatment centers and 2,252 units of residential quarters for staff working in the clinics.

The Administration proposed \$3.17 billion for IHS for FY2007, an increase of 4% over the FY2006 level of \$3.05 billion. The House approved \$3.19 billion, an increase of 5% over FY2006 and 1% over the Administration proposal. See **Table 19** below. IHS funding is separated into two budget categories: Health Services, and Facilities. Of the total IHS appropriation enacted for FY2006, 88% will be used for health services and 12% for the facilities program. IHS also receives funding through reimbursements and a special Indian diabetes program (see “Health Services” below). The sum of direct appropriations, reimbursements, and diabetes is IHS’s “program level” total, shown in **Table 19**.

The most significant changes proposed in the Administration's FY2007 IHS budget concern the urban Indian health program, within Indian health services, and the health care facilities construction program.

Indian Health Service	FY2006 Approp.	FY2007 Request	FY2007 House Passed	
			Total	Change from FY2006
— Facilities and Environmental Health Support	150.7	161.3	161.3	7%
— Equipment	20.9	21.6	21.6	3%
Fixed Costs Decrease	—	—	-2.7	—
Subtotal, Indian Health Facilities	353.2	347.3	363.6	3%
Total Appropriations	\$3,045.3	\$3,169.8	\$3,193.7	5%
Medicare/Medicaid Reimbursements and Other Collections	648.2	684.1	684.1	6%
Special Diabetes Program for Indians ^a	150.0	150.0	150.0	0%
Total Program Level	\$3,843.5	\$4,003.9	\$4,027.8	5%

a. The Special Diabetes Program for Indians has an authorization of \$150 million for each of the fiscal years FY2004 through FY2008 (P.L. 107-360). Funded through the General Treasury, this program cost does not appear in the IHS appropriations.

Health Services. IHS Health Services are funded not only through congressional appropriations, but also from money reimbursed from private health insurance and federal programs such as Medicare, Medicaid, and the State Children’s Health Insurance Program (SCHIP). Estimated total reimbursements were \$598.7 million in FY2005 and are expected to be \$648.2 million in FY2006. Another \$150 million per year is expended through IHS Health Services for the Special Diabetes Program for Indians.

While the House Appropriations Committee agreed with most of the Administration’s proposed amounts for Health Services, it recommended a “fixed cost decrease” of \$34.4 million across the entire Health Services budget, cutting about 40% of the funding proposed to pay costs of medical inflation and population growth. The House approved this decrease. The decrease would affect each Health Services program differently.

The IHS Health Services budget has three subcategories: clinical services; preventive health services; and other services. The *clinical services* budget includes by far the most program funding. The clinical services budget proposed for FY2007 was \$2.32 billion, an increase of 7% over \$2.18 billion in FY2006. The House approved \$2.33 billion. Clinical services include primary care at IHS and tribally run hospitals and clinics. For hospital and health clinic programs, which make up 62% of the clinical services budget, the FY2007 proposal was \$1.43 billion, 7% over \$1.34 billion in FY2006. The House approved \$1.44 billion. Contract care is a significant clinical service that funds the purchase of health services from local and community health care providers when IHS cannot provide medical care and specific services through its own system. It would receive \$536.3 million for FY2007, 7% more than the FY2006 appropriation of \$499.6 million. The House agreed to this amount. For other programs within clinical services for FY2007, dental programs would receive \$127.0 million, mental health programs \$61.7 million, alcohol and substance abuse

programs \$150.6 million, and the Catastrophic Health Emergency Fund \$18.0 million. The House agreed to these amounts.

For *preventive health services*, the Administration proposed \$125.0 million for FY2007, an 7% increase over the \$117.1 million for FY2006. Included in the preventive health services proposal for FY2007 is \$53.0 million for public health nursing, \$14.5 million for health education in schools and communities, \$1.7 million for immunizations in Alaska, and \$55.8 million for the tribally administered community health representatives program that supports tribal community members who work to prevent illness and disease in their communities. The House agreed to all these proposed amounts.

For *other health services*, the Administration proposed \$374.2 million for FY2007, a 6% decrease from FY2006. The House approved \$406.9 million, an increase of 2% from FY2006 and of 9% from the proposal. Contract support costs (CSC), the largest item in this category, were proposed to receive \$270.3 million for FY2007, a 2% increase, to which the House agreed. Contract support costs are provided to tribes to help pay the costs of administering IHS-funded programs under contracts or compacts authorized by the Indian Self-Determination Act (P.L. 93-638, as amended). CSC pays for costs tribes incur for such items as financial management, accounting, training, and program start up. Most tribes and tribal organizations participate in self-determination contracts and self-governing compacts. Other health services also include urban Indian health programs (discussed below), Indian health professions scholarships and other support (\$31.7 million), tribal management grants (\$2.5 million), direct IHS operation of facilities (\$63.8 million), and self-governance technical assistance (\$5.8 million). The House agreed to all these amounts except for urban Indian health.

Urban Indian Health Program. The Administration proposed no new funding for the urban Indian health program, funded at \$32.7 million in FY2006. The 28-year-old program helps fund preventive and primary health services for eligible urban Indians through contracts and grants with 34 urban Indian organizations at 41 urban sites. The specific services vary from site to site, and may include direct clinical care, alcohol and substance abuse care, referrals, and health information. The Administration contends that IHS must target funding and services towards Indians on reservations, and that urban Indians can be served through other federal, health, and local health programs. For instance, the Administration proposed increased funding for the Health Centers program in HHS. Opponents assert that the Administration has not provided evidence that these alternative programs can replace the urban Indian health program and has not studied the impact of the loss of IHS funding on health care for the approximately 71,000 urban Indians who annually receive services through the program. They further believe that only the urban Indian health program will provide culturally appropriate care. The House Appropriations Committee recommended funding for the urban Indian health program at its FY2006 level, asserting that the program had a good assessment rating and that the program has attracted additional non-IHS funding. The House agreed with the Committee's recommendation.

Facilities. The IHS's Facilities category includes money for the equipment, construction, maintenance, and improvement of both health-care and sanitation

facilities, as well as environmental health support programs. The Administration's proposal was \$347.3 million, a 2% decrease from FY2006 appropriations. The House approved \$363.6 million, a 3% increase from FY2006 and a 5% increase from the Administration's proposal. (See **Table 19.**) As with Health Services, the House Committee recommended a fixed cost decrease for Facilities, in this case a cut of \$2.7 million, cutting funding proposed to pay costs of medical inflation and population growth by 40%. The House agreed to the decrease.

Included in the FY2007 Facilities proposal are \$52.7 million for maintenance and improvement of health care facilities (2% increase), \$94.0 million for sanitation facilities construction (2% increase), \$21.6 million for equipment (3% increase), \$161.3 million for facilities and environmental health support (7% increase), and funds for health care facilities construction (discussed below). The House approved all these proposed amounts.

Health Care Facilities Construction. The Administration proposed \$17.7 million for construction of new health care facilities in FY2007, a 53% reduction from the FY2006 level of \$37.8 million. The FY2006 level was a 57% reduction from the FY2005 level of \$88.6 million. The House approved \$36.7 million, which is 3% below FY2006 and 108% above the proposal. The Administration's FY2007 proposal would fund completion of one ongoing project. The House-approved bill would fund 3 ongoing projects and partially fund dental and small ambulatory facilities construction and IHS-tribal joint venture construction. The Administration asserted that its proposed cut was part of an HHS-wide pause in new construction and that it helped fund staffing of newly-completed facilities and the increase in Indian health services. Opponents contended that the IHS reports a \$1.5-billion backlog in unmet health-facility needs and that the need is too great for a pause. The House Appropriations Committee expressed concern about IHS health care facilities budget requests, stating that it would take 48 years to complete the facilities on IHS's current priority list at the rate of funding IHS requested for FY2007, while about one-third of IHS-operated hospitals and health centers are already over 40 years old.

For further information on the Indian Health Service, see its website at [<http://www.ihs.gov/>].

CRS Report RL33022. *Indian Health Service: Health Care Delivery, Status, Funding, and Legislative Issues*, by Donna U. Vogt and Roger Walke.

CRS Report RS22056. *Major Indian Issues in the 109th Congress*, by Roger Walke.

Office of Navajo and Hopi Indian Relocation

The Office of Navajo and Hopi Indian Relocation (ONHIR) and its predecessor were created pursuant to a 1974 act (P.L. 93-531, as amended) to resolve a lengthy dispute between the Hopi and Navajo tribes involving lands originally set aside by the federal government for a reservation in 1882. Pursuant to the 1974 act, the lands were partitioned between the two tribes. Members of one tribe living on land partitioned to the other tribe were to be relocated and provided new homes, and bonuses, at federal expense. Relocation is to be voluntary.

ONHIR's chief activities consist of land acquisition, housing acquisition or construction, infrastructure construction, and post-move support, all for families being relocated, as well as certification of families' eligibility for relocation benefits. For FY2007, the Administration proposed \$5.9 million in new appropriations for ONHIR, a 30% reduction from the FY2006 appropriation of \$8.5 million. The House approved the Administration's proposed amount. ONHIR estimated it would also spend about \$12.0 million in unobligated "carryover" funds during FY2006, thereby reducing its large unobligated balance from \$19.0 million at the beginning of FY2005 to \$3.0 million by the end of FY2006.

Navajo-Hopi relocation began in 1977 and is now nearing completion. ONHIR has a backlog of relocatees who are approved for replacement homes but have not yet received them. Most families subject to relocation were Navajo. Originally, an estimated 3,400 eligible Navajo families resided on land partitioned (or judicially confirmed) to the Hopi, while only 26 eligible Hopi families lived on Navajo partitioned land, according to ONHIR data. By the end of FY2004, according to ONHIR, 96% of the Navajo families and 100% of the Hopi families had completed relocation. In addition, however, about half of the roughly 250 Navajo families — only some of them among the 3,400 eligible families — who signed "accommodation agreements" (under P.L. 104-301) that allowed them to stay on Hopi land under Hopi law, may wish to opt out of these agreements and relocate using ONHIR benefits, according to ONHIR.

ONHIR estimated that as of the end of FY2004, 130 Navajo families were awaiting relocation. Eleven of these families were still residing on Hopi partitioned land, with three of them having homes built or seeking homes and eight refusing to relocate or sign an accommodation agreement. ONHIR and the U.S. Department of Justice are negotiating with the Hopi Tribe to allow the eight families to stay on Hopi land, as autonomous families, in return for ONHIR's relocating off Hopi land those families who signed agreements but wish to opt out.

In its FY2006 budget justification ONHIR estimated that relocation moves for currently eligible families would be completed by the end of FY2006. The addition of Navajo families who have opted out of accommodation agreements, and of Navajo families who filed late applications or appeals but whom ONHIR proposes to accommodate to avoid litigation — together estimated at 210 families — would mean that all relocation moves would not be completed until the end of FY2008, according to ONHIR. This schedule would depend on infrastructure needs and relocatees' decisions. In addition, required post-move assistance to relocatees would necessitate another two years of expenditures after the last relocation move (whether in FY2006 or FY2008).

Congress has been concerned, at times, about the speed of the relocation process and about avoiding forced relocations or evictions. Pending legislation (S. 1003) would sunset ONHIR in 2008 and transfer any remaining duties to the Secretary of the Interior. Further, a long-standing proviso in ONHIR appropriations language, retained for FY2006 and recommended by the House for FY2007, prohibits ONHIR from evicting any Navajo family from Hopi partitioned lands unless a replacement home were provided. This language appears to prevent ONHIR from forcibly relocating Navajo families in the near future, because of ONHIR's backlog of approved

relocatees awaiting replacement homes. As the backlog is reduced, however, forced eviction may become an issue, if any remaining Navajo families were to refuse relocation and if the Hopi Tribe were to exercise a right under P.L. 104-301 to begin legal action against the United States for failure to give the Hopi Tribe “quiet possession” of all Hopi partitioned lands. The agreement that ONHIR reports it is negotiating with the Justice Department and the Hopi Tribe seeks to avoid this.

Smithsonian Institution

The Smithsonian Institution (SI) is a museum and education and research complex consisting of 19 museums and galleries, the National Zoo, and 9 research facilities throughout the United States and around the world, plus 144 affiliated museums. The SI is responsible for over 400 buildings with approximately 8 million square feet of space. There were over 24 million visitors to SI museums last year, a 24% increase over FY2004. The Smithsonian Institution is estimated to be 75% federally funded and also supported by various types of trust funds. A federal commitment to fund the SI was established by legislation in 1846.

House Consideration and FY2007 Budget. For FY2007, the House-passed bill would provide \$624.1 million for the Smithsonian, a decrease of \$20.3 million from the Administration’s proposed \$644.4 million for FY2007, but a \$9.0 million increase over the FY2006 level of \$615.1 million. See **Table 20** below. For Salaries and Expenses, the House approved \$517.1 million, a decrease from the Administration’s request of \$537.4 million, and a slight increase over the FY2006 amount of \$516.6 million. Salaries and Expenses cover administration of all of the museums and research institutions that are part of the SI. It also includes program support and outreach, and facilities services (security and maintenance). The House-passed bill cut the Smithsonian’s Salaries and Expenses funding on the grounds that Congress was not consulted on a contract that the Smithsonian Institution made with Showtime. (See below under *Business Ventures*.) During House consideration, an amendment was adopted to prohibit funds in the bill from being used to limit the Smithsonian’s outreach programs, which currently extend to many communities across all states.

Facilities Capital. For FY2007, the House approved \$107.0 million for facilities capital, the same as the Administration’s budget. This would be an increase over the FY2006 level of \$98.5 million. The House approved \$91.1 million for revitalization, \$5.4 million for construction, and \$10.5 million for facilities planning and design. Revitalization funds are for addressing advanced deterioration in SI buildings, helping with routine maintenance and repair in SI facilities, and making critical repairs. Several studies, including one by the Government Accountability Office (GAO-05-369), indicate that the SI needs an investment of \$1.6 billion for revitalization and construction over the next decade.

National Museum of African American History and Culture. A new National Museum of African American History and Culture (NMAAHC) has been authorized within the Smithsonian Institution through P.L. 108-184. The museum will collect, preserve, study, and exhibit African American historical and cultural material and will focus on specific periods of history, including the time of slavery, Reconstruction, the Harlem Renaissance, and the civil rights movement. For

FY2007, the House supported the Administration's budget request for \$3.0 million, a slight increase from the FY2006 appropriation of \$2.9 million. The funding will cover operating costs, including personnel for planning, and capital fund raising. Space has been selected on the Mall near the Washington Monument. Other groups, such as Latinos, have been seeking museum space on the Mall, and legislation has been introduced (H.R. 2134, S. 2475) for an American Latino Museum. The House Appropriations Committee's report on FY2006 appropriations stipulated that the SI's purchase of any additional buildings would require initial consultation with the House and Senate Committees on Appropriations.

National Zoo. For FY2007, the House approved \$21.4 million for salaries and expenses at the National Zoo, an increase over the Administration's request (\$20.7 million) and FY2006 (\$20.0 million). In the House-passed bill, \$1 million is to address critical infrastructure including fire detection and suppression systems. Recently, Members of Congress and the public have expressed increased concern about the National Zoo's facilities and the care and health of its animals. The Smithsonian Institution has a plan to revitalize the zoo, to make the facilities safer for the public and healthier for the animals. The Administration's FY2007 request estimated \$13.0 million (under the Facilities Capital account) to begin Phase II of the Asia Trail and Elephant Trails to provide ample space for the elephants. It also included renewing facades, roofs, and skylights at Rock Creek (\$2.0 million); and an upgrade of critical infrastructure (\$1.0 million), including installing fire protection systems and upgrading utilities. The new construction and renovation will help the Zoo come into compliance with the Department of Agriculture and American Zoo and Aquarium Association standards, and help correct "infrastructure deficiencies" found throughout the National Zoo. The House agreed to provide the full amount for Facilities Planning and Design, but asked to review the list of the Zoo's projects for Facilities Planning and Design before approval.

Trust Funds. In addition to federal appropriations, the Smithsonian Institution receives income from trust funds to expand its programs. The SI trust funds include general trust funds, contributions from private sources, and government grants and contracts from other agencies. For FY2006 (the most recent estimate), the trust funds available for operations were estimated at \$274.0 million, comprised of \$59.0 million for general trust, \$109.0 million for government grants and contracts, and \$106.0 million for donor-designated funds. Of concern to Congress is the extent to which the SI's financial managers are investing in hedge funds to boost the endowment. The SI has tried to assure the Congress that it is not reducing the endowment from these investments.

Business Ventures. Some Members of Congress have expressed concern over a new business venture between the Smithsonian and Showtime. The venture, called "Smithsonian On Demand," is a new cable programming service that will offer commercial-free shows about Smithsonian resources and collections. According to the SI, the Institution will take advantage of the power of cable television to expand access to objects, scientists, and scholars in keeping with its mission to diffuse knowledge. The primary concern is that the national collections might not be available to the public and that access by other film makers could be limited. The SI asserts that its collections will remain open to all researchers. Further, according to the SI, it will not refuse access to other producers and in fact will hire independent

film makers to produce the programs for the channel. The SI claims that it does not need to divulge the terms of its contract with CBS/Showtime, because it is a business contract that does not involve federal funds. Some lawmakers assert that, because of the substantial federal support of the SI, they have a right to know about this contract, while others contend that they should be informed as a courtesy. The SI contends that it maintains separate trust fund accounts and that activities related to the private accounts do not need to be made public.

To express its disapproval with the Smithsonian over the Showtime business venture, the House Interior Appropriations Subcommittee included bill language limiting the Smithsonian's ability to execute any contract or legal agreement which could limit access by the public to the Smithsonian collections. This was retained in the House-passed bill. The House also reduced the Administration's request for Smithsonian Institution's Salaries and Expenses by \$20.3 million from \$537.4 million to \$517.1 million. Finally, the House agreed to limit the salary of the Secretary of the Smithsonian to not more than that of the President of the United States and to reduce the salaries of any other SI officer or employee now receiving more than the President to the level of the President.

**Table 20. Appropriations for the Smithsonian Institution,
FY2005-FY2007**
(\$ in thousands)

Smithsonian Institution (SI)	FY2005 Approp.	FY2006 Approp.	FY2007 Request	FY2007 House Passed
Salaries and Expenses	\$489,035	\$516,568	\$537,394	\$517,094

Total Appropriations	\$615,158	\$615,097	\$644,394	\$624,094

For further information on the *Smithsonian Institution*, see its website at [<http://www.si.edu/>].

National Endowment for the Arts and National Endowment for the Humanities

One of the primary vehicles for federal support for the arts and the humanities is the National Foundation on the Arts and the Humanities, composed of the National Endowment for the Arts (NEA), the National Endowment for the Humanities (NEH), and the Institute of Museum and Library Services. The NEA and NEH authorization (P.L. 89-209; 20 U.S.C. §951) expired at the end of FY1993, but the agencies have been operating on temporary authority through appropriations law. IMLS receives funding through the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Acts. (For further information on

IMLS appropriations, see CRS Report RL32952, *Labor, Health and Human Services, and Education: FY2006 Appropriations*, by Paul M. Irwin.)

Among the questions Congress continually considers is whether funding for the arts and humanities is an appropriate federal role and responsibility. Additional concerns of Congress for FY2007 include whether NEA and NEH funding is keeping up with inflation and whether it is adequate for both NEA and NEH to cover their mandatory and escalating costs, such as cost of living increases in salaries and rent. An idea that has been in the background for years is combining the two Endowments into one to share programs and staff. It is not known if this change would achieve savings ultimately, or whether it would be feasible, given that the programs for the most part serve different constituencies. There may be further discussion of this idea during consideration of the FY2007 NEA and NEH appropriations or by the authorizing committees.

NEA. The NEA is a major federal source of support for the arts in all arts disciplines. Since 1965 it has provided over 120,000 grants that have been distributed to all states. NEA is celebrating its 40th anniversary as a fully operational public agency. For FY2007, the House-passed bill would provide \$129.4 million for NEA, an increase of \$5.0 million over the Administration's FY2007 budget and the FY2006 appropriation. The FY2007 House-passed bill provided \$44.9 million for direct grants and \$39.5 million for state partnerships. During House consideration, an amendment was adopted to add \$5.0 million for both the NEA and NEH. Another House amendment that would have reduced the NEA by \$30.0 million and redirected most of that money to the wildland fire management budget of the Forest Service was not agreed to.

Both the House-passed bill and the FY2007 Administration request would allow \$14.1 million to be used for Challenge America grants. The Challenge America Arts Fund is a program of matching grants for arts education, outreach, and community arts activities for rural and under-served areas. These grants reach over 17,000 schools, many in remote areas. Both the House-passed bill and the FY2007 Administration request included \$9.9 million for the American Masterpieces program. It is funded jointly under NEA grants and state partnerships. This national initiative includes touring programs, local presentations, and arts education in the fields of dance, visual arts, and music. See **Table 21** below.

NEH. The NEH generally supports grants for humanities education, research, preservation and public humanities programs; the creation of regional humanities centers; and development of humanities programs under the jurisdiction of the 56 state humanities councils. Since 1965, NEH has provided approximately 61,000 grants. NEH also supports a Challenge Grant program to stimulate and match private donations in support of humanities institutions. NEH is celebrating its 40th anniversary as a fully operational public agency.

For NEH, for FY2007, the House-passed bill would provide \$146.0 million, \$5.0 million above the FY2007 Administration request and the FY2006 level. The House-passed bill would provide \$14.9 million for matching grants for both Treasury Funds and Challenge Grants, and \$131.0 million for grants and administration (comprised of \$101.2 million for grants, \$24.8 million for administration, and \$5.0 million in

unspecified funds due to a House floor amendment). See **Table 21** below. The House-passed bill and the FY2007 budget request would allow \$15.2 million for the “We the People” initiative. These grants include model curriculum projects for schools to improve course offerings in the humanities — American history, culture, and civics.

CRS Report RS20287. *Arts and Humanities: Background on Funding*, by Susan Boren.

Cross-Cutting Topics

The Land and Water Conservation Fund (LWCF)

Overview. The LWCF is authorized at \$900 million annually through FY2015. However, these funds may not be spent without an appropriation. The LWCF is used for three purposes. First, the four principal federal land management agencies — Bureau of Land Management, Fish and Wildlife Service, National Park Service, and Forest Service — draw primarily on the LWCF to acquire lands. The sections on each of those agencies earlier in this report identify funding levels and other details for their land acquisition activities. Second, the LWCF funds acquisition and recreational development by state and local governments through a grant program administered by the NPS, sometimes referred to as stateside funding. Third, Administrations have requested, and Congress has appropriated, money from the LWCF to fund some related activities that do not involve land acquisition. This third use is a relatively recent addition, starting with the FY1998 appropriation. Programs funded have varied from year to year. Most of the appropriations for federal acquisitions generally are specified for management units, such as a specific National Wildlife Refuge, while the state grant program and appropriations for other related activities rarely are earmarked.

From FY1965 through FY2006, about \$29 billion has been credited to the LWCF. About half that amount — \$14.3 billion — has been appropriated. Throughout history, annual appropriations from LWCF have fluctuated considerably. Until FY1998, LWCF funding did not exceed \$400 million, except from FY1977-FY1980, when funding ranged from \$509 million (FY1980) to \$805 million (FY1978). In FY1998, LWCF appropriations exceeded the authorized level for the first time, spiking to \$969 million from the FY1997 level of \$159 million. A record level of funding was provided in FY2001, when appropriations reached \$1.0 billion, partly in response to President Clinton's Lands Legacy Initiative and some interest in increased and more certain funding for LWCF.

Source: Data are from the House Appropriations Committee, the DOI Budget Office, and *The Interior Budget in Brief* for each fiscal year.

- a. The NPS land acquisition and total appropriation figures are reduced by \$9.8 million due to the use of prior year funds for NPS federal land acquisition. The total only also is reduced by \$17.0 million due to the use of prior year funds for NPS land acquisition and state assistance. Thus, the figures in the column exceed the total by \$17.0 million.

FY2007 Funding. For FY2007, the Administration requested \$533.3 million for LWCF, an increase of \$186.5 million (54%) over the FY2006 appropriation of \$346.8 million. From prior year funds, for the NPS for FY2006 there are an additional \$17.0 million for land acquisition and state assistance and \$9.8 million for federal land acquisition. The FY2007 request includes funds for federal land acquisition, the stateside program, and other purposes. The House approved a total of \$209.9 for LWCF, a decrease of \$136.9 million (39%) from FY2006 and of \$323.4 million (61%) from the Administration's request. In its report on the FY2007 bill, the House Appropriations Committee stated that new land acquisition and unproven grant programs are a low priority.

Land Acquisition. Of the total FY2007 request, \$83.6 million is for federal land acquisition, a \$29.1 million (26%) reduction from the FY2006 level of \$112.8 million. An additional \$7.4 million was requested for land appraisals related to federal land acquisitions. The House approved \$58.7 million for land acquisition, a reduction of \$54.1 million (48%) from FY2006 and of \$24.9 million (30%) from the President's request. The House approved an additional \$7.4 million for appraisal services.

For the five fiscal years ending in FY2001, appropriations for federal land acquisition had more than tripled, rising from \$136.6 million in FY1996 to \$453.4 million in FY2001. However, since then the appropriation for land acquisition has declined, to \$112.8 million for FY2006. Not only did the total for federal land acquisition decline each year from FY2002 to FY2006, but each of the four component accounts declined each year (except NPS from FY2004 to FY2005). The decline may be attributed in part to increased attention to the federal budget deficit and enhanced interest in funding other national priorities, such as the war on terrorism. **Table 22** shows recent funding for LWCF.

Stateside Program. Another \$1.6 million of the total FY2007 request is for administration of the stateside grant program. The Administration is not seeking funds for new state grants in FY2007 on the grounds that state and local governments have alternative sources of funding for parkland acquisition and development, and the current program could not adequately measure performance or demonstrate results. For FY2007, the House also supported \$1.6 million for program administration only. This is not a new phenomenon. For example, the President similarly did not seek funds for new state grants in FY2006, although Congress appropriated \$29.6 million for that purpose. In addition, for several years the Clinton Administration proposed eliminating stateside funding, and Congress concurred. In the last five years, stateside funding has fallen 79%, from \$144.0 million in FY2002 to \$29.6 million in FY2006.

Other Purposes. The largest portion of the President's FY2007 request — \$440.6 million — is for 15 other programs in the Department of the Interior and the Forest Service. This would be a \$226.5 million (106%) increase over the FY2006 level

of \$214.1 million. **Table 22** shows that in FY2006, the largest portion of the appropriation was for other programs but the Administration had requested a much larger amount. **Table 23** shows the programs for which the President seeks LWCF funds in FY2007, and the FY2006 appropriation for the indicated programs. In some cases, Congress provided these programs with non-LWCF funding.

For FY2007, the House passed \$142.1 million for other purposes. This included funds for four FWS programs, one FS program, and one DOI program. The House-passed level would constitute a reduction of \$72.0 million (34%) from FY2006 and of \$298.5 million (68%) from the President's request.

— Urban and Community Forestry Program	0.0	26.8	0.0
Total Appropriations	\$214.1	\$440.6	\$142.1

Notes: This table identifies “other” programs for which the Administration seeks LWCF funds for FY2007; it excludes federal land acquisition and the stateside program. The FY2007 information is derived from DOI and the House Committee on Appropriations. Funding provided outside of LWCF is not reflected.

Everglades Restoration

Altered natural flows of water by a series of canals, levees, and pumping stations, combined with agricultural and urban development, are thought to be the leading causes of environmental deterioration in South Florida. In 1996, Congress authorized the U.S. Army Corps of Engineers to create a comprehensive plan to restore, protect, and preserve the entire South Florida ecosystem, which includes the Everglades (P.L. 104-303). A portion of this plan, the Comprehensive Everglades Restoration Plan (CERP), was completed in 1999, and provides for federal involvement in restoring the ecosystem. Congress authorized the Corps to implement CERP in Title IV of the Water Resources Development Act of 2000 (WRDA 2000, P.L. 106-541). While restoration activities in the South Florida ecosystem are conducted under several federal laws, WRDA 2000 is considered the seminal law for Everglades restoration.

Appropriations for restoration projects in the South Florida ecosystem have been provided to various agencies as part of several annual appropriations bills. The Interior, Environment, and Related Agencies appropriations laws have provided funds to DOI agencies for restoration projects. Specifically, DOI conducts CERP and non-CERP activities in southern Florida through the National Park Service, Fish and Wildlife Service, U.S. Geological Survey, and Bureau of Indian Affairs.

For FY1993-FY2006, federal appropriations for projects and services related to the restoration of the South Florida ecosystem exceeded \$2.6 billion, and state funding topped \$3.6 billion.³² The average annual federal cost for restoration activities in southern Florida in the next 10 years is expected to be approximately \$286 million per year.³³

FY2007 Funding. For FY2007, the Administration requested \$233.4 million for the Department of the Interior and the Army Corps of Engineers for restoration efforts in the Everglades, which is an increase of \$31.0 million from the FY2006 enacted level of \$202.4 million. For DOI, the Administration requested \$69.4 million for CERP and non-CERP activities related to restoration in the South Florida ecosystem for FY2007. The bill passed by the House would provide \$69.0 million for Everglades restoration, which is similar to the requested amount. See **Table 24** below.

For FY2006, \$80.5 million was provided to the DOI for Everglades restoration. However, of this amount, \$17.0 million was provided for land acquisition from prior year balances, making the FY2006 appropriation for restoration \$63.5 million. The FY2007 House-passed level of \$69.0 million for Everglades restoration is \$5.5 million above the FY2006 appropriation.

³² These figures represent an estimated cost of all CERP and non-CERP related costs for restoration in the South Florida ecosystem.

³³ This figure is based on CERP and non-CERP related restoration activities in South Florida.

Source: U.S. Dept. of the Interior, *Fiscal Year 2007, The Interior Budget in Brief* (Washington, DC: Feb. 2006) and House Appropriations Committee Press Release, accessed May 15, 2006 at [http://appropriations.house.gov/index.cfm?FuseAction=PressReleases.Detail&PressRelease_id=605]. n/a = not available.

a. The report of the House Appropriations Committee (H.Rept. 109-465) and the House-passed bill do not specify funding for all of the projects listed under Everglades restoration.

b. This includes total funding for park operations in Everglades National Park, Dry Tortugas National Park, Biscayne National Park, and Big Cypress National Preserve.

The primary increase in funding for Everglades restoration requested for FY2007 is for the Modified Water Deliveries Project (Mod Waters) under NPS. This project is designed to improve water deliveries to Everglades National Park, and to the extent possible, restore the natural hydrological conditions within the Park. The completion of this project is required prior to the construction of certain projects under CERP. For FY2006, \$7.9 million in new funds were appropriated for Mod Waters. This figure reflects a reduction of \$17.0 million due to the use of prior year funds. For FY2007, \$13.3 million was requested. The House-passed bill would provide similar funding based on conditions discussed under the phosphorus mitigation heading.

A funding issue receiving broad attention is the level of commitment by the federal government to implement restoration activities in the Everglades. Some observers measure commitment by the frequency and number of projects authorized under CERP, and the appropriations they receive. Because no restoration projects have been authorized since WRDA 2000, these observers are concerned that federal commitment to CERP implementation is waning. Others assert that the federal commitment will be measurable by the amount of federal funding for construction, expected when the first projects break ground in the next few years. Some state and federal officials contend that federal funding will increase compared to state funding as CERP projects move beyond design, into construction. Still others question whether the federal government should sustain the current level of funding, in light of escalating costs and project delays. In H.Rept. 109-80 (FY2006 appropriations), the House Appropriations Committee cited concerns expressed by stakeholders that a new Florida initiative termed *Acceler8* is focused too heavily on water storage projects that do not provide anticipated natural benefits. In report language for FY2007 appropriations, the Committee expresses its appreciation of the efforts the state of Florida has made to provide funding for *Acceler8* projects.

Concerns Over Phosphorus Mitigation. For FY2006, P.L. 109-54 conditioned funding for Mod Waters based on meeting state water quality standards. It provided that funds appropriated in the act and any prior acts for the project would be provided *unless* administrators of four federal departments/agencies (Secretary of the Interior, Secretary of the Army, Administrator of the EPA, and the Attorney General) indicate in their joint report (to be filed annually until December 31, 2006) that water entering the A.R.M. Loxahatchee National Wildlife Refuge and Everglades National Park do not meet state water quality standards, and the House and Senate Committees on Appropriations respond in writing disapproving the further expenditure of funds. This provision was included in the FY2007 House-passed bill and also had been enacted in the FY2004 and FY2005 Interior appropriations laws. Provisions conditioning funds on the achievement of water quality standards were not requested in the Administration's budget for FY2007.

These provisions were enacted based on concerns regarding a Florida state law (Chapter 2003-12, enacted on May 20, 2003) that amended the Everglades Forever Act of 1994 (Florida Statutes §373.4592) by authorizing a new plan to mitigate phosphorus pollution in the Everglades. Phosphorus is one of the primary water pollutants in the Everglades and a primary cause for ecosystem degradation.

In its report for FY2007, the House Appropriations Committee contends that good water quality is essential for restoring the Everglades and opposes any changes to the

consent decree, which establishes a goal of lowering phosphorus levels to 10 ppb (parts per billion) in federal lands in the Everglades. To support this position, the House-passed bill would condition funds for implementing Mod Waters based on the state of Florida meeting water quality standards. This condition also applies if the terms of the consent decree are terminated prior to its mandate of achieving low levels of phosphorus. Funds for Mod Waters would also be unavailable unless funds for implementing Mod Waters and engineering and design documents for the Tamiami Trail component of the project are appropriated to the Corps. The condition on funding Mod Waters stems from a provision in the law (P.L.106-541) that authorizes the implementation of CERP. This provision states that Mod Waters must be completed before several other restoration projects are undertaken. Therefore, delays in the completion of Mod Waters would result in delays in the implementation of a larger portion of the restoration plan.

CRS-72

- a. Departmental Offices includes Insular Affairs, the Payments in Lieu of Taxes Program (PILT), and the Office of the Special Trustee for American Indians.
- b. Figures generally do not reflect scorekeeping adjustments.
- c. Derived from the report of the House Appropriations Committee on H.R. 5041 (H.Rept. 108-674).
- d. Excludes \$40.0 million in transferred funds from the Department of Defense (§8098, P.L. 108-287).
- e. The total does not reflect a \$1.50 billion in emergency appropriations for veteran's health. It reflects undistributed reductions which are not reflected in the individual agency figures in the column.
