CRS Report for Congress

Prepared for Members and Committees of Congress

Summary

This report is a chart book of selected immigration trends that touch on the main elements of comprehensive immigration reform (CIR). Most policymakers agree that the main issues in CIR include increased border security and immigration enforcement, improved employment eligibility verification, revision of legal immigration, and options to address the millions of unauthorized aliens residing in the country. The report offers snapshots of time series data, *using the most complete and consistent time series currently available for each statistic*. The key findings and elements germane to the data depicted are summarized with the figures. The summary offers the highlights of key immigration trends.

The United States has a history of receiving immigrants, and these foreign-born residents of the United States have come from all over the world.

- Immigration to the United States today has reached annual levels comparable to the early years of the 20th century.
- Immigration over the last few decades of the 20th century was not as dominated by three or four countries as it was earlier in the century, and this pattern has continued into the 21st century.
- The number of foreign-born residents in the United States is at its highest level in U.S. history, reaching 41.3 million in 2013.
- Foreign-born residents of the United States made up 13.1% of the U.S. population in 2013, approaching levels not seen since the proportion of foreign-born residents reached 14.8% in 1910.

Legal immigration encompasses permanent immigrant admissions (e.g., employment-based or family-based immigrants) and temporary nonimmigrant admissions (e.g., guest workers, foreign students). The Immigration and Nationality Act (INA) contains the provisions detailing the requirements for admission (permanent and temporary) of foreign nationals and the eligibility rules for foreign nationals to become U.S. citizens.

- In FY2013, 991,000 aliens became U.S. legal permanent residents (LPRs). Of this total, 65% entered on the basis of family ties.
- The pool of people potentially eligible to immigrate to the United States as LPRs each year typically exceeds the worldwide level set by the INA.
- Most of the 4.4 million approved petitions pending at the close of FY2014 were for family members of U.S. citizens.
- After falling from 7.6 million in FY2001 to 5.0 million in FY2004, temporary visa issuances reached 9.2 million in FY2013.
- Generally, all of the temporary employment-based visa categories have increased since FY1994. Although there was a dip during the recent recession, the number of employment-based temporary visas increased each year between FY2010 and FY2013.

Immigration control encompasses an array of enforcement tools, policies, and practices to secure the border and to prevent and investigate violations of immigration laws. The INA specifies the

grounds for exclusion and removal of foreign nationals as well as the documentary and entry-exit controls for U.S. citizens and foreign nationals.

- U.S. State Department denials of petitions for LPR visas have increased in recent years, and prior removals from the United States or past illegal presence in the United States has become the leading ground of inadmissibility.
- U.S. Border Patrol apprehensions of foreign nationals between ports of entry fell to a 40-year low of 327,577 in FY2011 before increasing to 420,789 by FY2013.
- The number of employers enrolled in the E-Verify employment eligibility verification system grew from 5,900 at the close of FY2005 to 483,000 by the end of FY2013. These data indicate that approximately 8% of U.S. employers were participating in E-Verify by the close of FY2013.
- A total of \$15.8 million in administrative fines was imposed on employers who engaged in unlawful employment in FY2013—a figure that exceeds the level of total fines imposed over the entire period from FY1999 through FY2009.
- Formal removals grew from 30,039 in 1990 to 438,421 in FY2013.
- Immigration and Customs Enforcement (ICE) identifies many more potentially removable aliens than it arrests (i.e., places in removal proceedings).
- The number of criminal aliens removed from the United States increased from 73,298 in FY2001 to 198,394 in FY2013.

The three main components of the unauthorized resident alien population are (1) aliens who enter the country surreptitiously without inspection, (2) aliens who overstay their nonimmigrant visas, and (3) aliens who are admitted on the basis of fraudulent documents.

- Estimates based on the March Supplement of the U.S. Census Bureau's Current Population Survey (CPS) indicate that the unauthorized resident alien population rose from 8.5 million in 2000 to 12.2 million in 2007, before leveling off at 11.3 million in 2013.
- The latest available estimates indicate that 42% of the 11.4 million unauthorized resident aliens in 2012 had entered from 2000 to 2010.
- Apprehensions of unaccompanied alien children, mainly at the Mexico-U.S. border, increased from 8,041 in FY2008 to 68,445 in FY2014. Most of this recent increase has come from El Salvador, Guatemala, and Honduras.

For those who seek more complete analyses of the issues, this report cites Congressional Research Service (CRS) products that discuss the policies underlying the data presented in each of the figures.

Introduction

This report is a chart book of selected immigration trends that touch on the main elements of comprehensive immigration reform (CIR). The main issues in the immigration debate typically include increases to border security and enforcement of immigration laws within the U.S. interior, expansion of employment eligibility verification, and reforms to the system for legal temporary and permanent immigration. The thorniest issues concern policy options to address the millions of unauthorized aliens residing in the country.

This report offers snapshots of time series data, *using the most complete and consistent time series currently available for each statistic*. Some of the time series span decades, others capture only a few years. The key findings and elements germane to the data depicted are summarized with the figures. For those who seek more complete analyses of the issues, the report cites Congressional Research Service (CRS) products that discuss the policies underlying the data presented in each of the figures.

Much of the data come from administrative sources, most notably the Department of Homeland Security (DHS) and the Department of State (DOS). For historical context, demographic data from the U.S. Census Bureau are also included.

The Immigration and Nationality Act (INA), which was first codified in 1952, contains the provisions detailing the requirements for admission (permanent and temporary) of foreign nationals, grounds for exclusion and removal of foreign nationals, document and entry-exit controls for U.S. citizens and foreign nationals, and eligibility rules for the naturalization of foreign nationals. Congress has significantly amended the INA several times since 1952, most notably by the Immigration Amendments of 1965, the Refugee Act of 1980, the Immigration Reform and Control Act (IRCA) of 1986, the Immigration Act of 1990, and the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996.¹

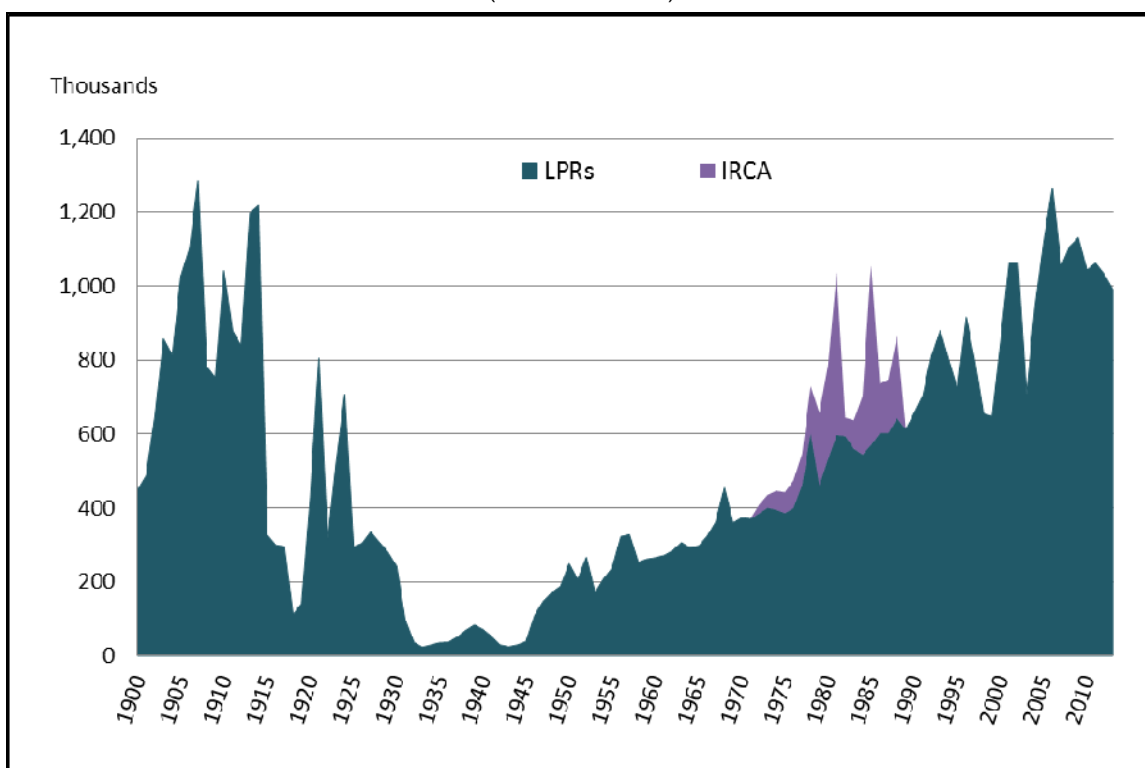

Legal immigration encompasses permanent admissions (e.g., employment-based or family-based legal permanent residents (LPRs)) and temporary admissions (e.g., guest workers, foreign students). This chart book presents historical time series data on permanent admissions as well as a breakdown of legal permanent residents by broad classes of admission in 2013. Trends in temporary admissions, including legal employment-based temporary migrants, are also depicted.

Immigration control encompasses an array of enforcement tools, policies, and practices to secure the border and to prevent and investigate violations of immigration laws. Among the statistical trends tracking immigration control presented in this chart book are inadmissibility determinations, border apprehensions, worksite enforcement prosecutions, and alien removal. The final section of this chart book looks at trends in the unauthorized resident alien population since 2000.

¹ Since 2000, other major laws that amended the INA include the USA PATRIOT Act (P.L. 107-56), the Enhanced Border Security and Visa Reform Act of 2002 (P.L. 107-173), Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458), and the REAL ID Act of 2005 (P.L. 109-13, Division B). None of these laws attempted a comprehensive reform of the INA.

Historical Immigration Trends

Figure 1. Annual LPR Admissions and Status Adjustments
(FY1900-FY2013)

Source: *Statistical Yearbook of Immigration*, U.S. Department of Homeland Security, Office of Immigration Statistics, multiple fiscal years. Aliens legalizing through the Immigration Reform and Control Act (IRCA) of 1986 are depicted by year of arrival rather than year of adjustment.

Immigration to the United States was peaking at the beginning of the 20th century. In 1910, foreign-born residents made up 14.8% of the U.S. population. Immigration dropped as a result of the numerical limits and national origins quotas imposed by the Immigration Acts in 1921 and 1924. Levels fell further during the Great Depression and World War II. The annual number of settled immigrants, typically referred to as LPRs, rose gradually after World War II (**Figure 1**). In 1952, the INA was codified and, as amended, remains the governing statute.

The growth in immigration after 1980, shown in **Figure 1**, is partly attributable to the total number of LPRs entering through the preference system as well as immediate relatives of U.S. citizens. The Immigration Reform and Control Act (IRCA) of 1986 enabled 2.1 million unauthorized aliens residing in the United States as of 1982 to become LPRs. In addition, the number of refugees admitted increased from 718,000 in the period 1966-1980 to 1.6 million during the period 1981-1995, after the enactment of the Refugee Act of 1980. The Refugee Act established permanent provisions for refugees and asylees to become LPRs.

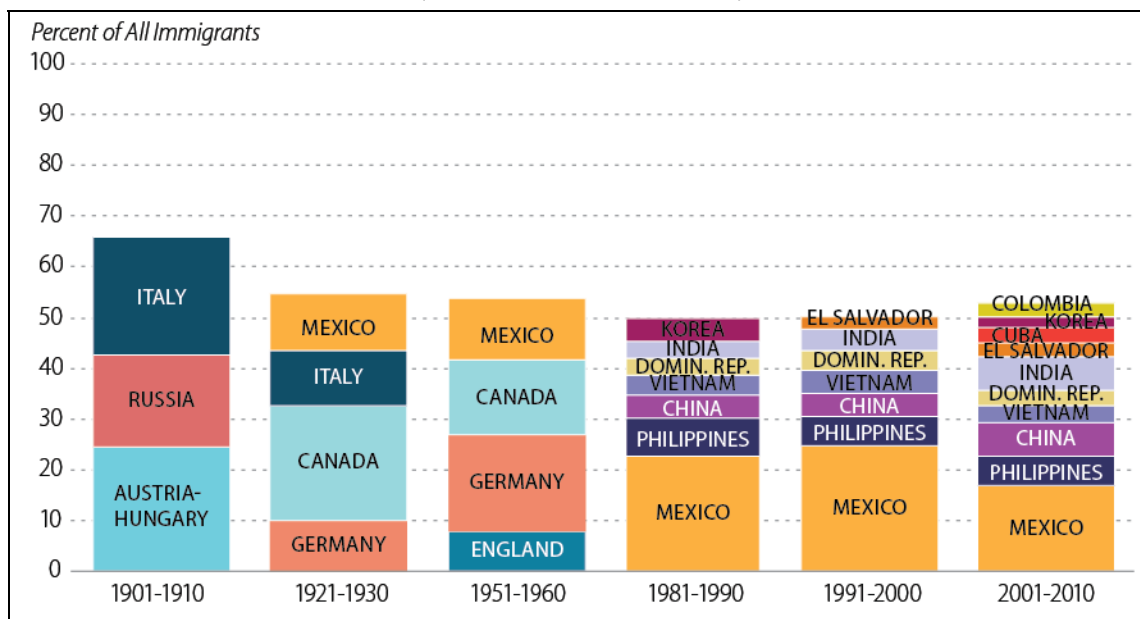

The Immigration Act of 1990 was the last significant revision of legal permanent immigration. It set a statutory worldwide level of 675,000 LPRs annually, but certain categories of LPRs, most notably immediate relatives of U.S. citizens and refugees, are permitted to exceed the limits. The

INA further holds countries to an annual numerical limit of 7% of the worldwide level of U.S. immigrant admissions, known as per-country limits or country caps. Immigration to the United States today has reached levels comparable to the early years of the 20th century. In FY2013, 990,553 aliens became LPRs through admissions (459,751) or status adjustments (530,802).

For further background and analysis, see CRS Report R42866, *Permanent Legal Immigration to the United States: Policy Overview*.

Figure 2. Top Sending Countries Comprising at Least Half of All LPRs

(Selected decades, 1901-2010)

Source: CRS analysis of Table 2, *Statistical Yearbook of Immigration*, U.S. Department of Homeland Security, Office of Immigration Statistics, FY2010.

In any given period of U.S. history, a handful of countries have dominated the flow of immigrants, but the dominant countries have varied over time. **Figure 2** presents trends in the top immigrant-sending countries (together comprising at least 50% of the immigrants admitted) for selected decades. The Immigration Act of May 19, 1921, imposed the first numerical limits on LPR admissions to the United States, and it set the level of admission of aliens from specific countries to 3% of the foreign-born persons of that nationality who lived in the United States in 1910. A few years later, the Immigration Act of May 26, 1924, established the national origins system, which set quotas based on the number of foreign-born persons of that nationality in the country in 1890 and 1920. Both laws exempted Western Hemisphere countries from the limits. The Immigration Amendments of 1965 replaced the national origins quota system with per-country ceilings.

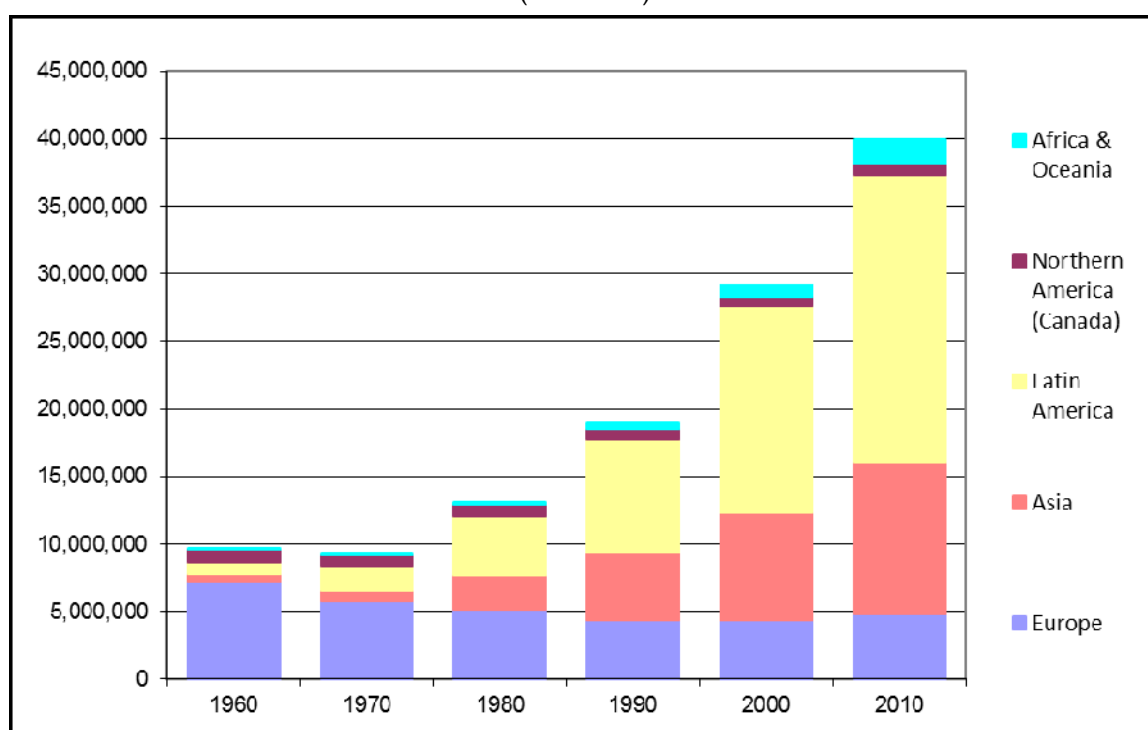

Figure 2 illustrates that immigration over the last few decades of the 20th century was not as dominated by three or four countries as it was earlier in the century. Although Europe was home to the countries sending the most immigrants during the early 20th century (e.g., Germany, Italy, Austria-Hungary, and the United Kingdom), Mexico has been a top sending country for most of the 20th century—largely after 1970—and into the 21st century. Other top sending countries from

FY2001 through FY2010 were the Dominican Republic, El Salvador, Colombia, and Cuba (Western Hemisphere); and the Philippines, India, China, South Korea, and Vietnam (Asia).

These data suggest that the per-country ceilings established in 1965 had some effect. As **Figure 2** illustrates, immigrants from only three or four countries made up more than half of all LPRs prior to 1960. By the last two decades of the 20th century, immigrants from seven to eight countries comprised about half of all LPRs, and this pattern has continued into the 21st century.

For further background and analysis, see CRS Report R42866, *Permanent Legal Immigration to the United States: Policy Overview*.

Figure 3. Foreign-Born Residents by Region of Origin
(1960-2010)

Source: U.S. Census Bureau data: decennial census 1960, 1970, 1980, 1990, and 2000, and the American Community Survey for 2010.

Notes: Figure 3 shows data from each year of the decennial census of the United States since 1960. As such, 2010 is shown as the most recent year in the figure in order to present equally spaced time intervals. The most recent estimate currently available for the total foreign born population is 41.3 million people representing 13.1% of the total U.S. population, as of 2013.

The number of foreign-born residents in the United States is at the highest level in U.S. history. In the past 50 years, the number of foreign-born residents of the United States has gone from just under 10 million in 1960 to 40 million in 2010, a 313% increase, as **Figure 3** illustrates. As part of this increase, the source regions of foreign-born residents have shifted from Europe (74% in 1960) to Latin America and Asia (81% in 2010). Foreign-born residents made up 12.9% of the U.S. population in 2010.

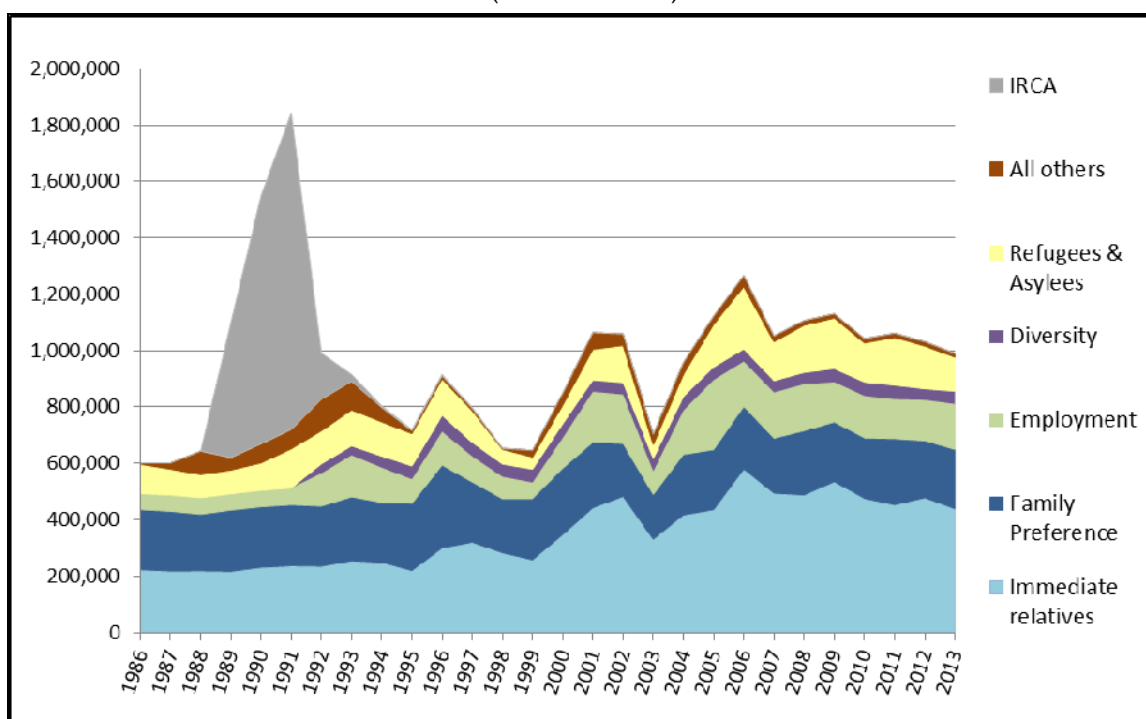

More recently, between 2000 and 2010, the foreign born contributed 32% of the total U.S. population increase. Foreign-born residents comprised most of the increase in the prime 25-54 working age population over this decade. Almost one-third of current foreign-born residents arrived in the United States since 2000, as discussed in the CRS report cited below.

The Department of Homeland Security (DHS) Office of Immigration Statistics (OIS) estimated that 13.3 million foreign-born residents were LPRs as of January 1, 2012. OIS has also estimated that 1.9 million foreign-residents were legally present on long-term temporary visas and about 11.4 million were aliens residing in the United States without legal authorization.

For further background and analysis, see CRS Report R41592, *The U.S. Foreign-Born Population: Trends and Selected Characteristics*.

Legal Permanent Immigration

Figure 4. Legal Permanent Residents Admitted/Adjusted by Category
(FY1986-FY2013)

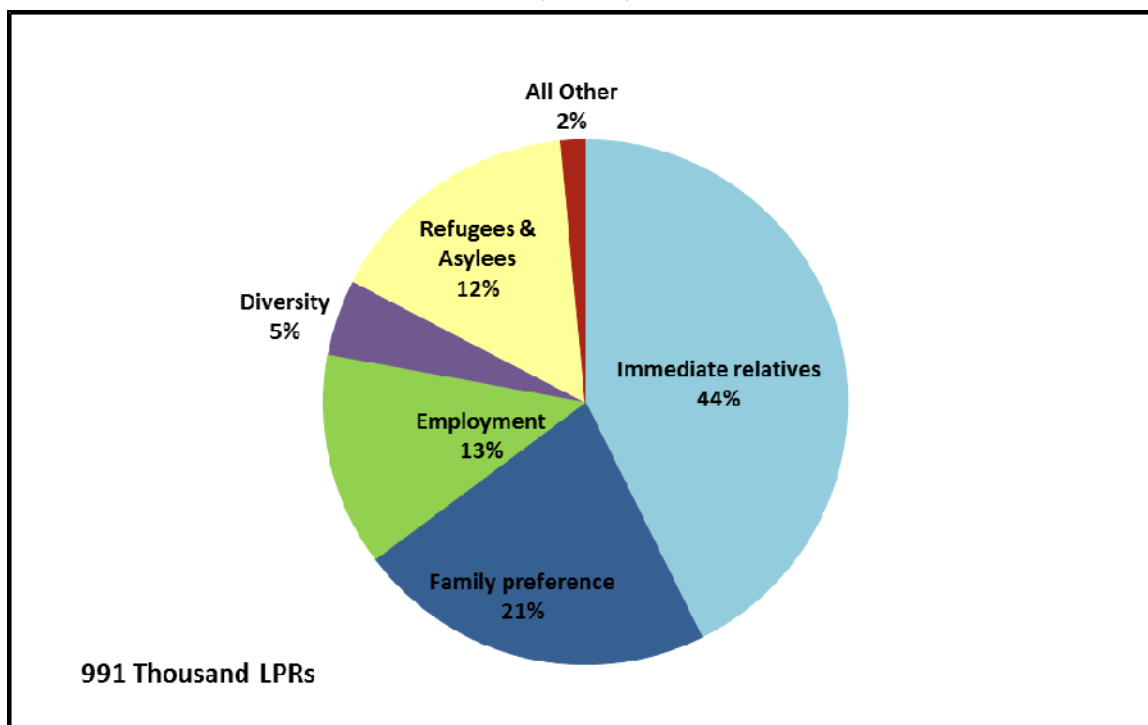

Source: U.S. Department of Homeland Security, Office of Immigration Statistics, *U.S. Legal Permanent Residents: 2013*. Aliens legalizing through the IRCA are depicted by year of adjustment.

The INA specifies a complex set of numerical limits and preference categories that give priorities for permanent immigration based on family relationships, employment connections, protection of refugees, and diversity of admissions by country of origin. Apart from aliens legalized by IRCA, the largest growth since 1986 has been in the immediate relatives of U.S. citizens, almost doubling from 223,468 in FY1986 to 439,460 in FY2013, as presented in **Figure 4**.

As prescribed by changes in statute that the Immigration Amendments Act of 1990 made, the number of employment-based immigrants grew from 56,617 in FY1986 to 161,110 in FY2013. About 87% of the employment-based LPRs adjusted from a temporary status. The employment-based numbers include the accompanying spouses and children of the qualifying LPR.

Figure 5. Legal Permanent Residents Admitted/Adjusted by Category
(FY2013)

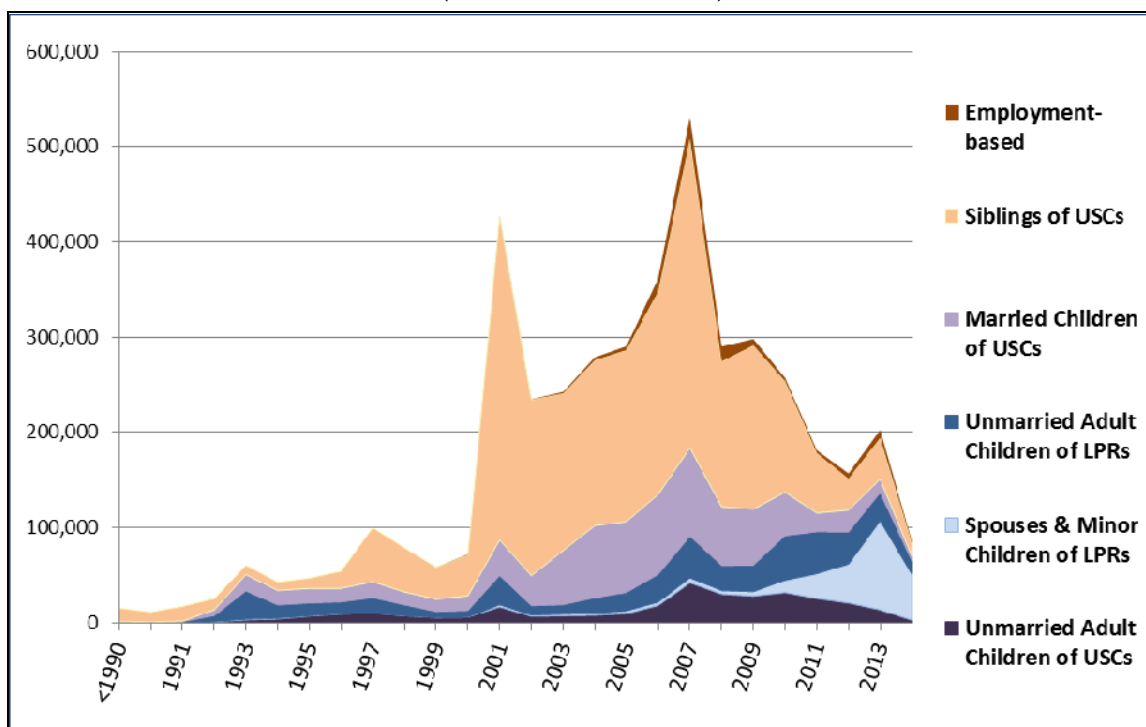

Source: U.S. Department of Homeland Security, Office of Immigration Statistics, *U.S. Legal Permanent Residents: 2013*.

In FY2013, 991,000 aliens became LPRs (**Figure 5**). Of this total, 65% entered on the basis of family ties. Other major categories were employment-based LPRs (13%), diversity migrants (5%), and refugees and asylees (12%).

For further background and analysis, see CRS Report R42866, *Permanent Legal Immigration to the United States: Policy Overview*.

Figure 6. Approved LPR Visa Petitions Pending by Year of Submission and by Preference Category
(As of November 1, 2014)

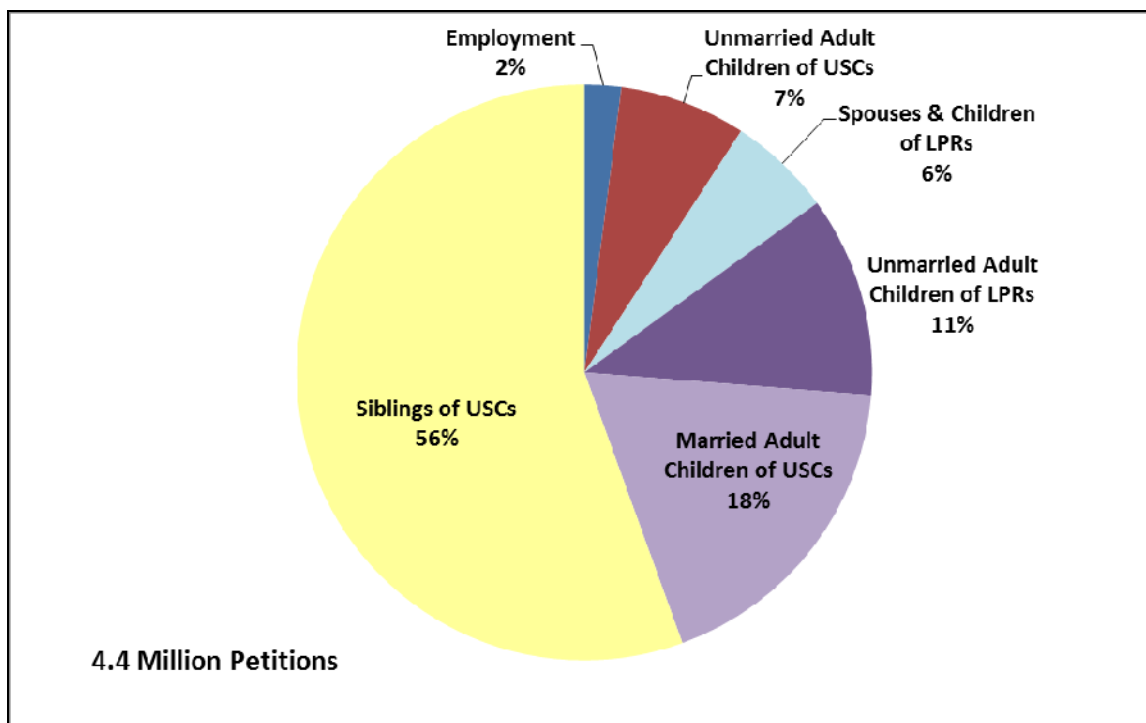

Source: U.S. Department of State, Immigrant Visa Applicants in the Family-Sponsored and Employment-Based Preferences Registered at the National Visa Center, November 1, 2014.

The pool of people who are potentially eligible to immigrate to the United States as LPRs each year typically exceeds the worldwide level set by the INA. **Figure 6** presents a snapshot of this pool in November 1, 2014. Almost 1.8 million (40%) of the 4.4 million approved visa petitions pending at the end of FY2014 had been submitted and approved at least 10 years earlier. These data do not constitute a processing backlog; rather, these data represent persons who have been approved for visas that are not yet available due to the numerical limits in the INA.

Some immigration officials and practitioners maintain that many petitions filed after FY2007 had not yet appeared in the approved caseload at the close of FY2014, despite a slight uptick in FY2009. The decline in approved cases pending after FY2007 was likely due to petitioners who had not advanced in the pipeline because their visa priority dates are well into the future, rather than a drop in petitioners.

Figure 7. Approved LPR Visa Petitions Pending by Preference Category
(As of November 1, 2014)

Source: U.S. Department of State, Annual Report of Immigrant Visa Applicants in the Family-sponsored and Employment-based preferences Registered at the National Visa Center as of November 1, 2014.

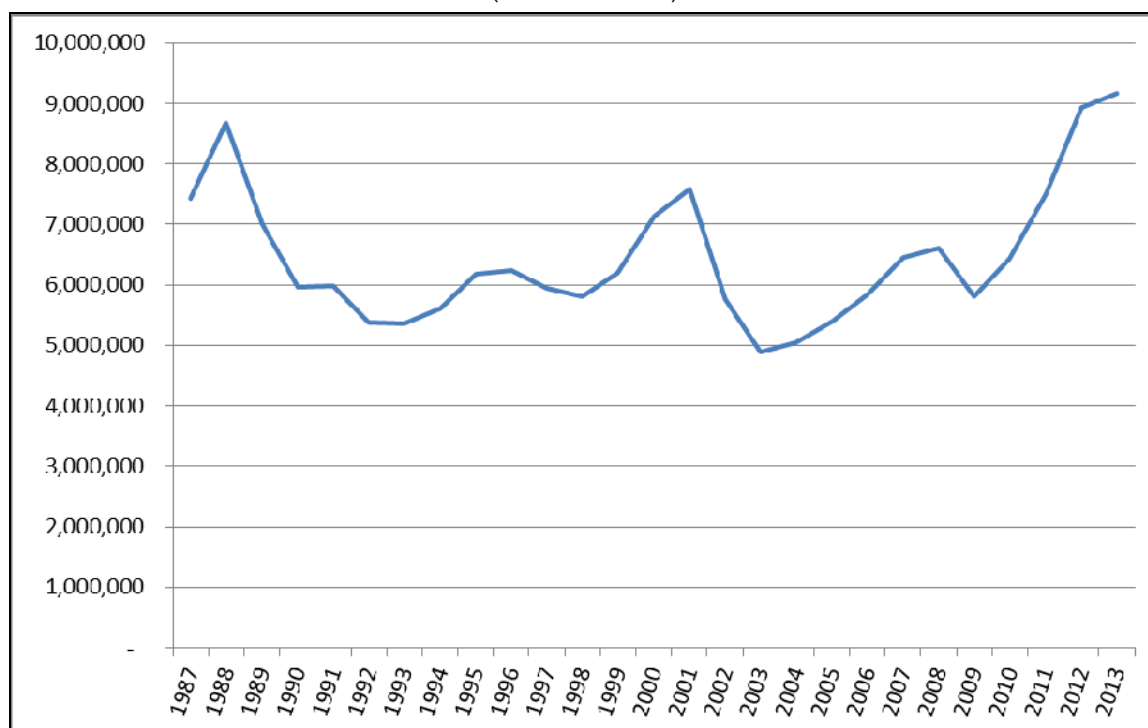

Notes: **LPR** refers to a lawful permanent resident who has been admitted to reside permanently in the United States. **USC** refers to U.S. citizen.

Over half (55%) of the 4.4 million approved LPR visa petitions pending at the close of FY2014 were brothers and sisters of U.S. citizens (**Figure 7**). Adult children of U.S. citizens with approved LPR visas pending totaled 25% (7% unmarried and 18% married). Family members of LPRs totaled 17% of the approved visa petitions pending. The employment preferences accounted for only 2% (90,910) of the LPR visas pending.

For further background and analysis, see CRS Report R42866, *Permanent Legal Immigration to the United States: Policy Overview*; and CRS Report R42048, *Numerical Limits on Employment-Based Immigration: Analysis of the Per-Country Ceilings*.

Legal Temporary Migration

Figure 8. Nonimmigrant Visas Issued by U.S. Department of State
(FY1987-FY2013)

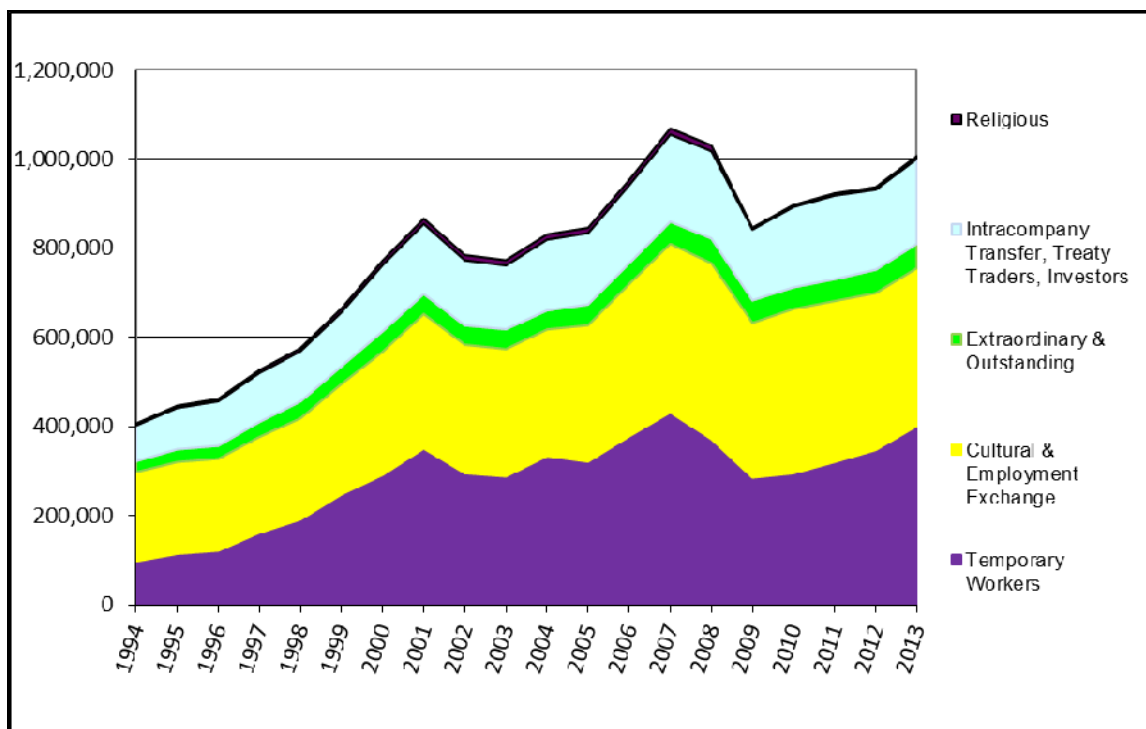

Source: CRS presentation of data from the annual reports of the U.S. Department of State Office of Visa Statistics.

The INA provides for the temporary admission of various categories of foreign nationals, known as nonimmigrants. Nonimmigrants are admitted for a temporary period of time and a specific purpose, including as tourists, students, and temporary workers. There are 24 major nonimmigrant visa categories, and over 70 specific types of nonimmigrant visas are issued currently. Most of these nonimmigrant visa categories are defined in §101(a)(15) of the INA. These visa categories are commonly referred to by the letter and numeral that denotes their subsection in §101(a)(15); for example, B-2 tourists, E-2 treaty investors, F-1 foreign students, H-1B temporary professional workers, and J-1 cultural exchange participants. Many nonimmigrant visas are valid for multiple entries as well as multiple years.

The U.S. Department of State (DOS) consular officer who issues the visa must be satisfied that the foreign national is entitled to a nonimmigrant status. Notably, INA §214(b) generally presumes that all aliens seeking admission to the United States are coming to live permanently; as a result, most aliens seeking to qualify for a nonimmigrant visa must demonstrate that they are not coming to reside permanently. Nonimmigrant visas issued abroad had dipped to 5.0 million in FY2004 after peaking at 7.6 million in FY2001, as **Figure 8** shows. Nonimmigrant visa issuances reached 9.2 million in FY2013. Expansion of the visa waiver program (VWP), which allows nationals from 36 countries to enter the United States as temporary visitors for business or pleasure without obtaining a visa from a U.S. consulate abroad, has affected these trends.

For further background and analysis, see CRS Report RL31381, *U.S. Immigration Policy on Temporary Admissions*; and CRS Report RL32221, *Visa Waiver Program*.

Figure 9. Temporary Employment-Based Visas Issued
(FY1994-FY2013)

Source: U.S. Department of State Bureau of Consular Affairs data, multiple years.

The major nonimmigrant category for temporary workers is the H visa. Professional workers typically use the H-1 visa, which includes professional specialty workers (H-1B) and nurses (H-1C). There are two visa categories for temporary seasonal workers (i.e., guest workers): agricultural guest workers (H-2A) and other seasonal/intermittent workers (H-2B). Unskilled workers are eligible for H-2A and H-2B visas.

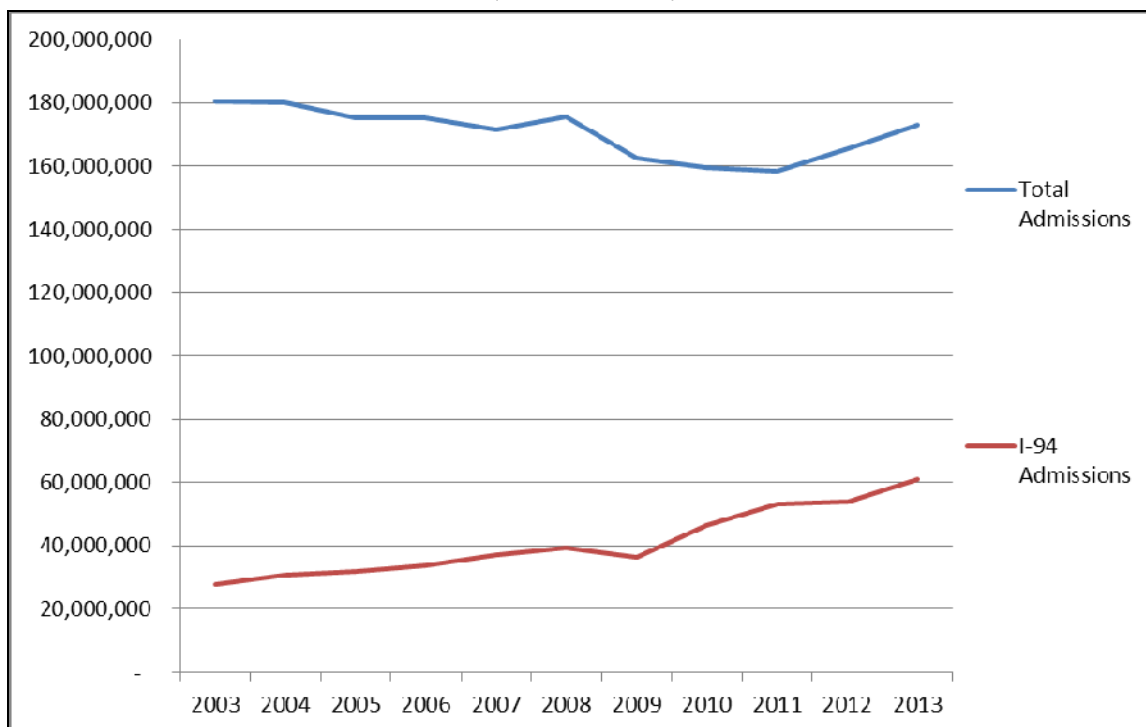

Intracompany transferees who are executive, managerial, and have specialized knowledge, and who are employed with an international firm or corporation are admitted on the L visas. Aliens who are treaty traders enter on E-1 visas, whereas those who are treaty investors use E-2 visas. Those with J and Q cultural exchange visas include professors and research scholars, students, foreign medical graduates, teachers, resort workers, camp counselors, and au pairs who are participating in an approved exchange visitor program. Persons with extraordinary ability in the sciences, arts, education, business, or athletics are admitted on O visas, whereas internationally recognized athletes or members of an internationally recognized entertainment group come on P visas. Aliens working in religious vocations enter on R visas.

Generally speaking, all of the temporary employment-based visa categories have increased since FY1994, as **Figure 9** illustrates. Only the religious workers on R visas did not exhibit substantial growth. Visas issued to employment-based nonimmigrants surpassed 1 million in FY2007 and again in FY2008, after dropping when the “high-tech bubble” burst in the early 2000s. Although

there was another dip during the recent recession, the temporary employment-based visas have increased each year since FY2010.

For further background and analysis, see CRS Report R42530, *Immigration of Foreign Nationals with Science, Technology, Engineering, and Mathematics (STEM) Degrees*; and CRS Report R42434, *Immigration of Temporary Lower-Skilled Workers: Current Policy and Related Issues*.

Figure 10. Nonimmigrant Admissions at U.S. Ports of Entry
(FY2003-FY2013)

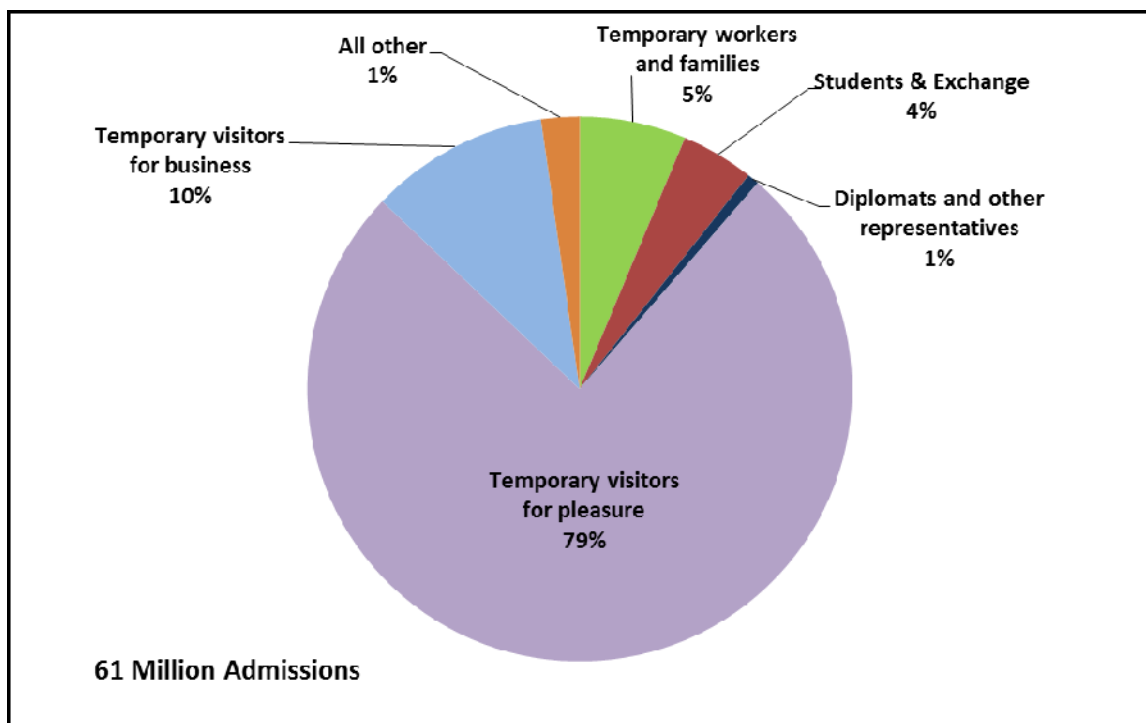

Source: Yearbook of Immigration Statistics: 2013, Table 25, U.S. Department of Homeland Security, Office of Immigration Statistics.

In addition to DOS consular officers interviewing aliens applying for visas, DHS Customs and Border Protection (CBP) inspects foreign nationals when they seek to enter the United States. CBP policy typically requires about one-quarter of nonimmigrants entering the United States to fill out the arrival records, which are colloquially called I-94 admissions because I-94 is the immigration form number. For example, Mexican nationals with border crossing cards and Canadian nationals traveling for business or tourist purposes are specifically excluded from the I-94 admission totals. I-94 data presented in **Figure 10** recorded admissions rather than persons.

I-94 admissions have generally inched upwards from FY2003 to FY2013, largely due to CBP's expanded use of I-94 forms at land ports in FY2005. The total nonimmigrant admissions recorded by CBP has declined somewhat over this same period. In FY2013, the 18.3 million visitors entering under the VWP constituted about 40% of all temporary visitors.

Figure 11. Nonimmigrant Admissions by Class of Admission
(FY2013)

Source: *Yearbook of Immigration Statistics: 2013*, Table 25, U.S. Department of Homeland Security, Office of Immigration Statistics.

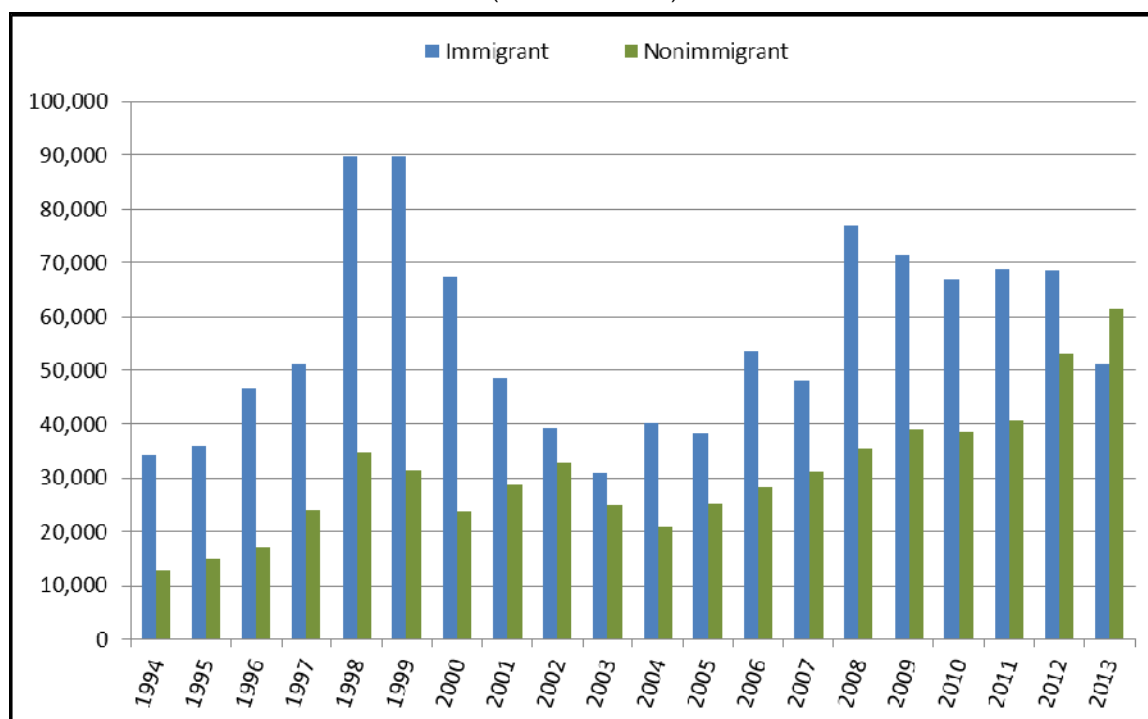

Visitors dominated the 61.0 million I-94 admissions in FY2013, as presented in **Figure 11**. Almost four-fifths of all I-94 admissions were tourists in FY2013 and another 10% were business visitors. The other substantial categories were students and exchange visitors (4%) and temporary workers and families (5%).

For further background and analysis, see CRS Report RL31381, *U.S. Immigration Policy on Temporary Admissions*; and CRS Report RL32221, *Visa Waiver Program*.

Inadmissibility

Foreign nationals not already legally residing in the United States who wish to come to the United States generally must obtain a visa to be admitted. The burden of proof is on the foreign national to establish eligibility for a visa. Most importantly, foreign nationals must not be deemed inadmissible according to the specified grounds in INA §212(a). These §212(a) inadmissibility criteria are health-related grounds, criminal history, security and terrorist concerns, public charge (e.g., indigence), seeking to work without proper labor certification, illegal entrants and immigration law violations, ineligible for citizenship, and aliens illegally present or previously removed.

Figure 12. Aliens Denied Visas Under §212(a) Inadmissibility
(FY1994-FY2013)

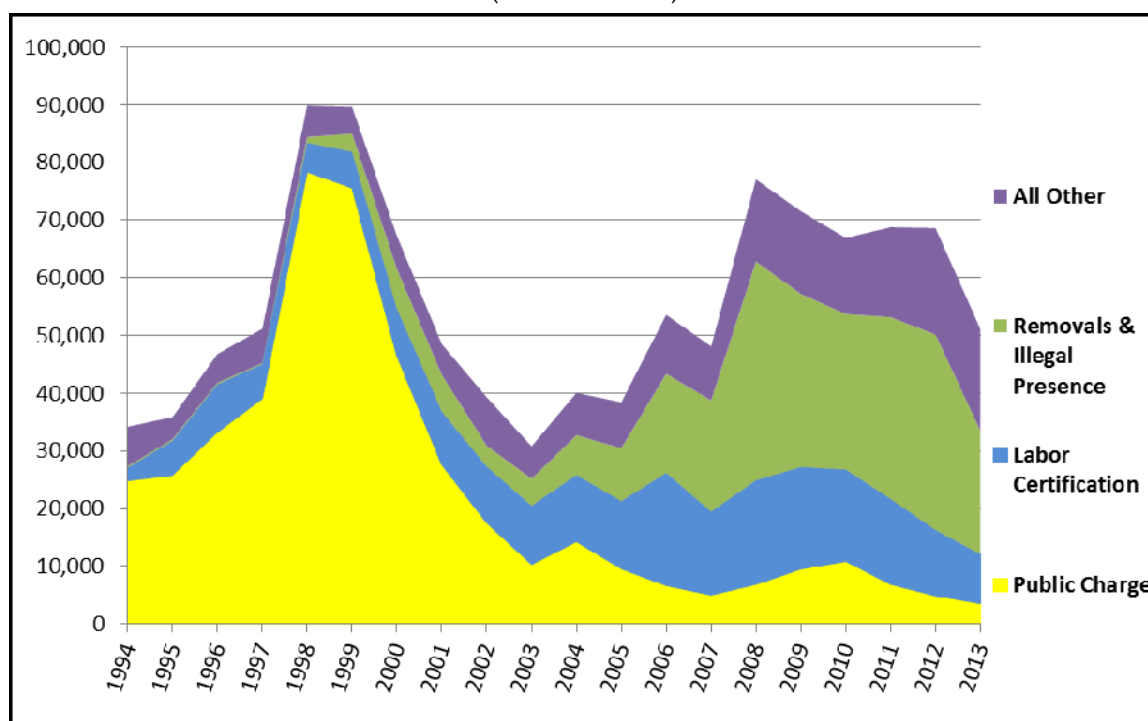

Source: CRS presentation of initial determination data from Table 20 of the annual reports of the U.S. Department of State Office of Visa Statistics.

As **Figure 12** shows, §212(a) denials for nonimmigrant visas have increased in the past decade, while such denials for immigrant visas generally have been declining since 2008. FY2013 represented the first year where nonimmigrant visa denials outnumbered those for immigrant visas.

Until FY2003-FY2005, public charge² exclusions dominated the 20-year trend analysis of inadmissibility for LPRs (**Figure 13**). Now, prior removals/illegal presence has become the top single ground of inadmissibility, followed by labor certification. Increased §212(a) denials based on other immigration law violations are depicted at the right among “all other,” and these collectively sum to the leading grounds since FY2008.

Figure 13. LPR Inadmissibility by Legal Grounds
(FY1994-FY2013)

Source: CRS presentation of initial determination data from Table 20 of the annual reports of the U.S. Department of State Office of Visa Statistics.

For further background and analysis, see CRS Report R41104, *Immigration Visa Issuances and Grounds for Exclusion: Policy and Trends*.

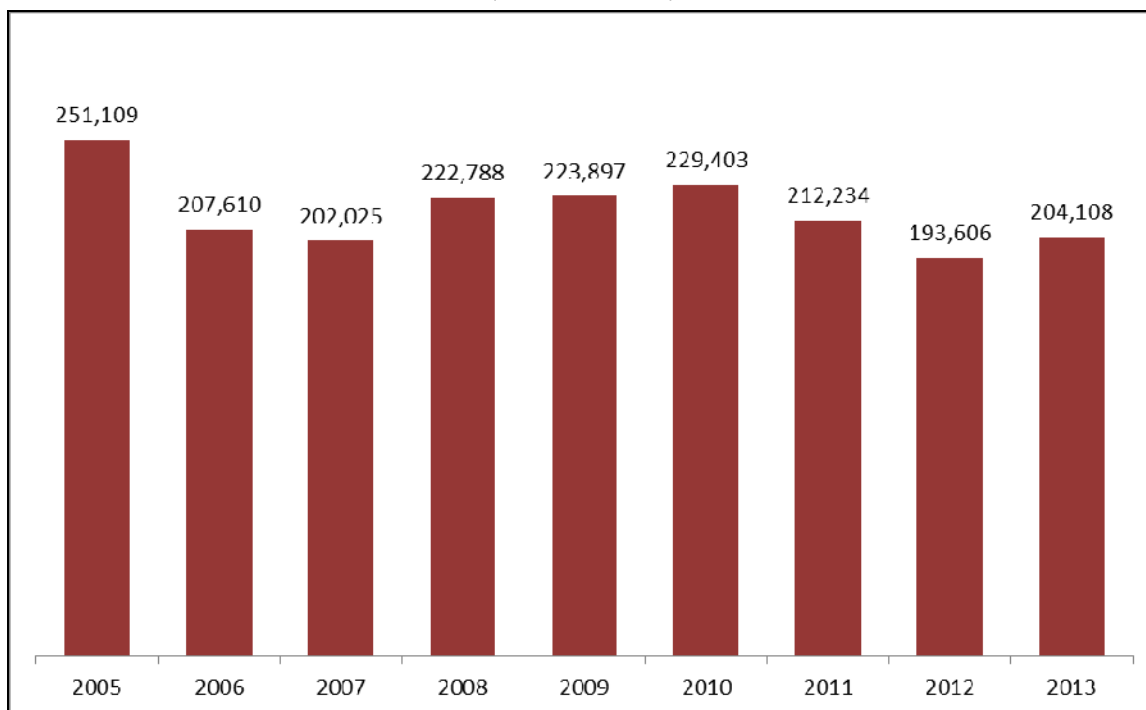

The INA requires the inspection of all aliens who seek entry into the United States; possession of a visa or another form of travel document does not guarantee admission into the United States. As a result, all persons seeking admission to the United States must demonstrate to a CBP inspector that they are a foreign national with a valid visa and/or passport or that they are a U.S. citizen. CBP officers can permit an alien to voluntarily withdraw their application for admission and return to their home country. CBP officers can also summarily exclude an alien arriving through the Visa Waiver Program and those arriving without proper documentation, unless the alien expresses the intention to apply for asylum or has a fear of persecution or torture. Immigration

² The term “public charge” in immigration refers to a foreign national who becomes indigent or unable to support themselves. Applicants for immigrant status can overcome the public charge ground for exclusion based on their own funds, prearranged or prospective employment, or an affidavit of support from someone in the United States.

judges with the U.S. Department of Justice's Executive Office for Immigration Review (EOIR) decide all other inadmissibility cases resulting from inspections.

As **Figure 14** shows, the number of inadmissible aliens at ports of entry has not fluctuated greatly over the nine-year period for which data are available. Reports published by the DHS Office of Immigration Statistics indicate that CBP recorded 204,108 foreign nationals arriving at a port of entry who were inadmissible in FY2013.

Figure 14. Inadmissible Aliens at Ports of Entry
(FY2005-FY2013)

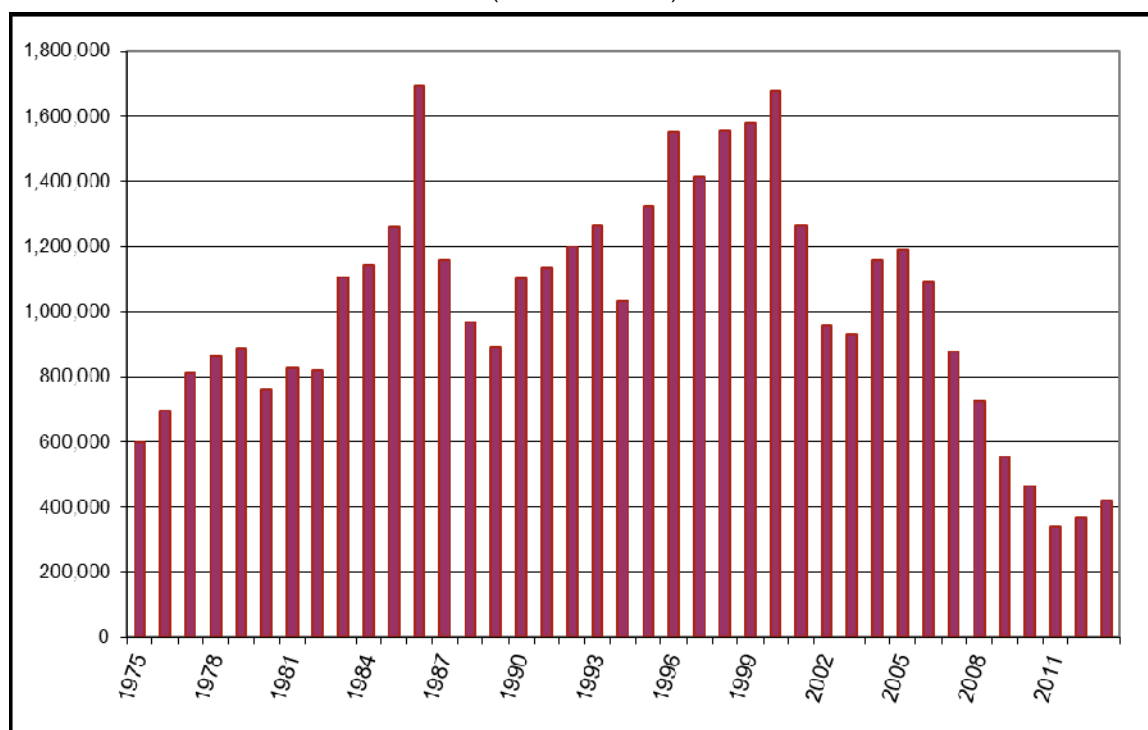

Source: *Yearbook of Immigration Statistics: 2013*, Table 36, U.S. Department of Homeland Security, Office of Immigration Statistics.

According to the DHS Office of Immigration Statistics, Mexican nationals accounted for 28% of inadmissible aliens, followed by persons from Canada (14%), the Philippines (11%), and Cuba (9%). These four countries accounted for almost two-thirds of all aliens whom CBP deemed inadmissible in FY2013.

For further background and analysis, see CRS Report R41104, *Immigration Visa Issuances and Grounds for Exclusion: Policy and Trends*.

Border Security

Figure 15. U.S. Border Patrol Apprehensions
(FY1975-FY2013)

Source: Statistical Yearbook of Immigration, U.S. Department of Homeland Security, Office of Immigration Statistics, multiple fiscal years; and data provided by USBP Congressional Affairs.

Border Patrol apprehensions of foreign nationals between ports of entry fell to a 40-year low in FY2011, before increasing in the subsequent two years, as **Figure 15** shows. Apprehensions had peaked at 1.7 million in 1986, the year Congress enacted IRCA. Since 1986, Congress has passed at least four laws authorizing increased Border Patrol personnel, and there has been a corresponding increase in appropriations. Border Patrol staffing has more than doubled over the past decade and increased more than nine-fold since 1998. As of October 9, 2014, the Border Patrol had 20,833 agents, up from a total of 2,268 Border Patrol agents in 1980.³

Annual Border Patrol apprehensions generally increased between FY1991 and FY2000, climbing from 1.13 million in FY1991 to 1.68 million in FY2000. Apprehensions have generally fallen since that time (with the exception of FY2004-FY2006), reaching a low of 327,577 in FY2011 before increasing to 420,789 in FY2013.

Border patrol apprehensions data count events rather than people. Thus, an unauthorized migrant who is caught trying to enter the country three times in one year counts as three apprehensions. The percentage of apprehended aliens whom the Border Patrol makes subject to some form of

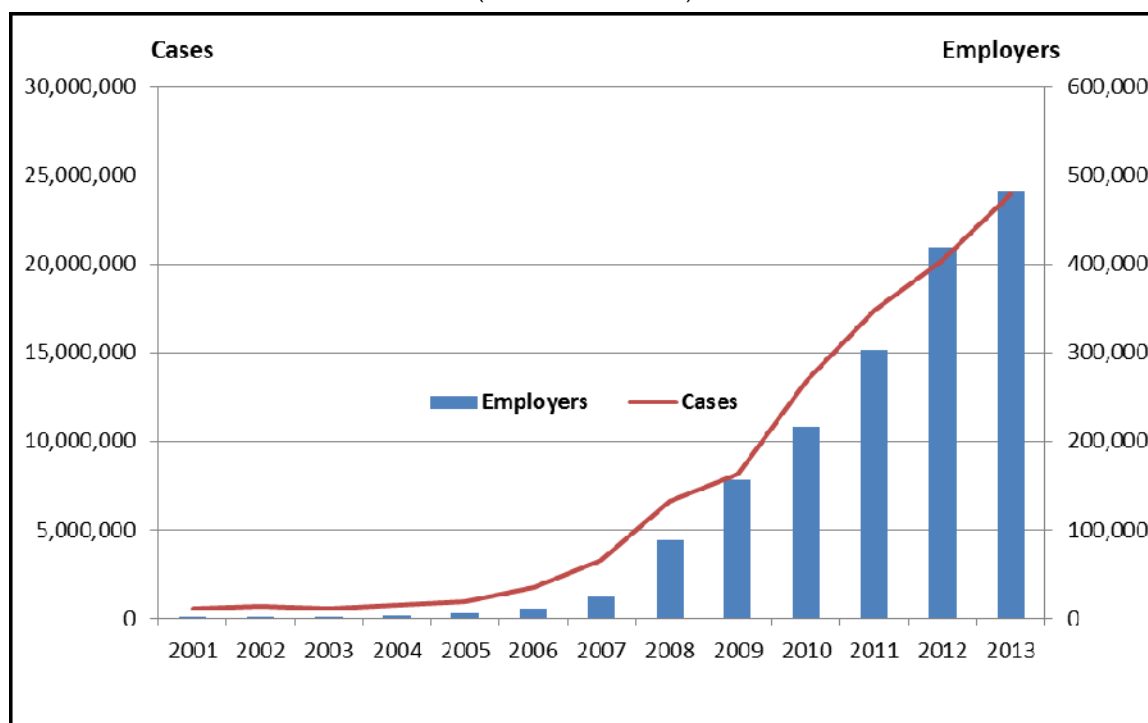

³ Department of Homeland Security press release Remarks by Secretary Jeh Johnson (and accompanying slides), "Border Security in the 21st Century," October 9, 2014.

high-consequence enforcement (i.e., criminal charges, formal removal, lateral repatriation, or interior repatriation) has increased in recent years, reaching 86% (452,664 out of 529,393) in FY2012.

For further background and analysis, see CRS Report R42138, *Border Security: Immigration Enforcement Between Ports of Entry*.

Employment Eligibility Verification

Figure 16. Number of Employers Enrolled in E-Verify and Cases Submitted
(FY2001 to FY2013)

Source: CRS presentation of data from U.S. Citizenship and Immigration Services.

All employers are currently required to participate in a paper-based employment eligibility verification system in which they examine documents presented by every new hire to verify the person's identity and work eligibility. The INA states that an employer is in compliance "if the document reasonably appears on its face to be genuine." The new hire must submit a document that establishes both identity and authorization to work (e.g., U.S. passport or LPR card) or submit two documents, one establishing identity (e.g., driver's license) and the other establishing authorization to work (e.g., Social Security card). Employers must retain these employment eligibility verification (I-9) forms.

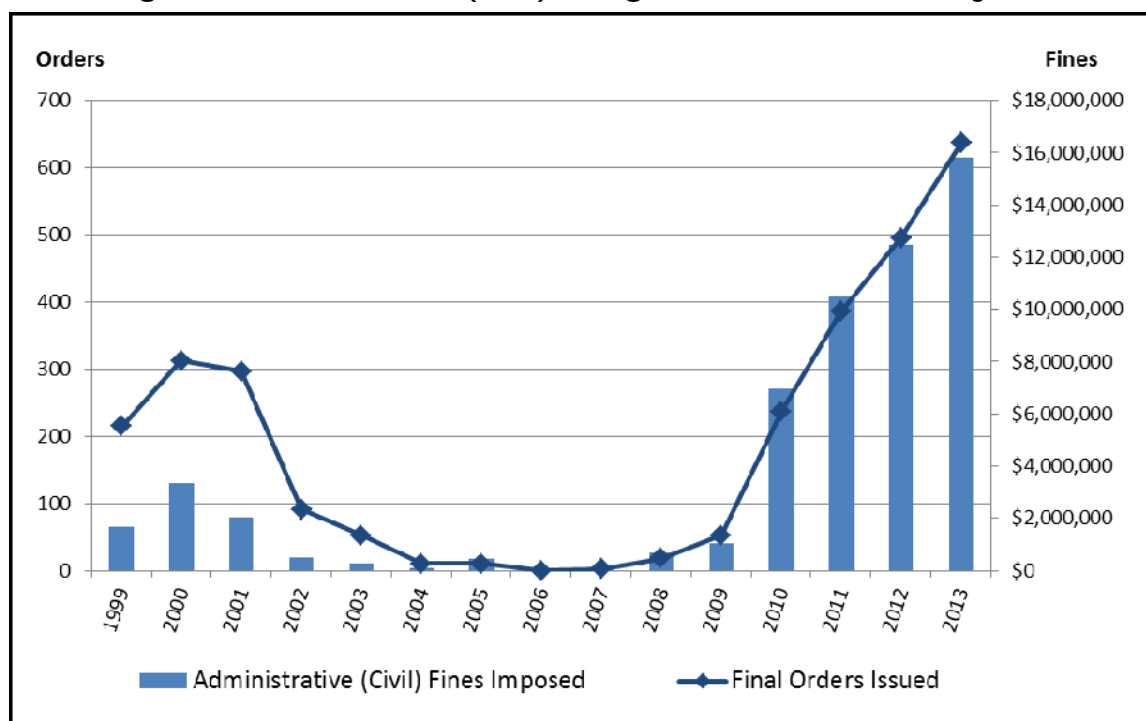

Employers may opt to participate in an electronic employment eligibility verification program, E-Verify, which checks the new hire's employment authorization through Social Security Administration and, if necessary, DHS databases. E-Verify evolved from the Basic Pilot program, one of the three employment verification pilots authorized by the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996 to be implemented and the only one still in

operation. It began in November 1997 in the five states with the largest unauthorized alien populations at the time. In December 2004, in accordance with P.L. 108-156, the program became available nationwide. The number of employers enrolled in E-Verify grew from 5,900 in FY2005 to 483,000 by the end of FY2013. These data indicate that approximately 8% of U.S. employers were participating in E-Verify by the close of FY2013. **Figure 16** shows a comparable increase over time in the number of E-Verify cases that employers have submitted. The number of cases has grown from just under 1 million in FY2005 to 23.9 million in FY2013.

For further background and analysis, see CRS Report R40446, *Electronic Employment Eligibility Verification*.

Worksite Enforcement

Figure 17. Administrative (Civil) Charges and Fines under INA §274A

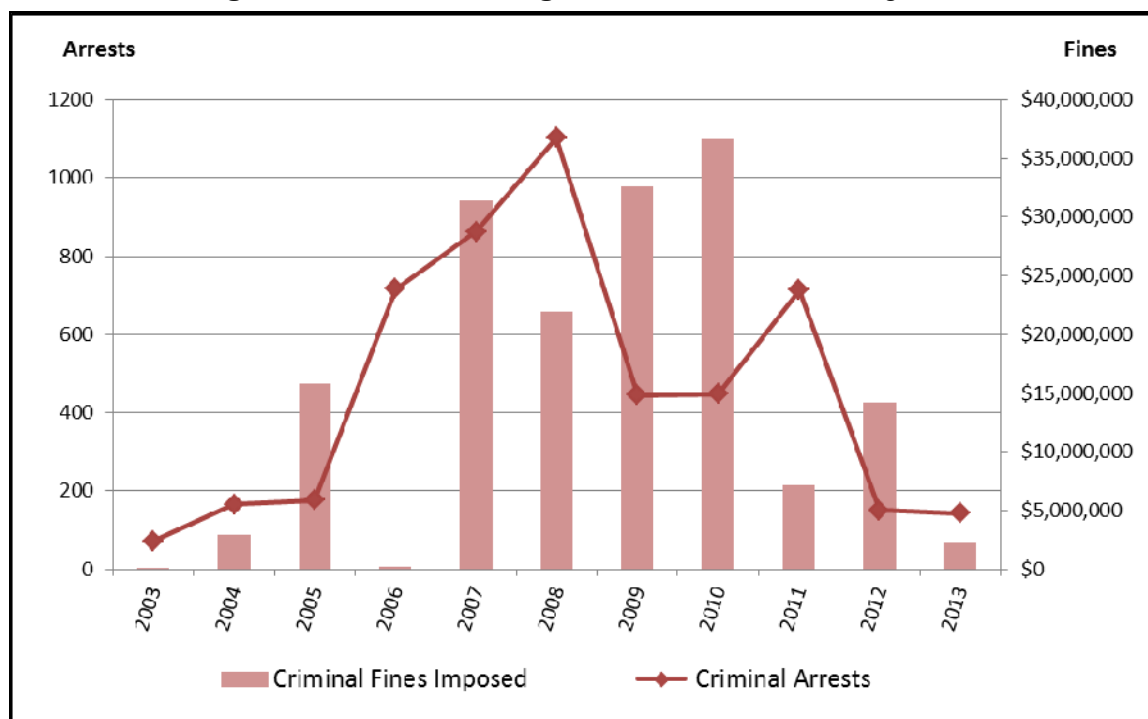

Source: Data provided to CRS by ICE, November 2014.

Under INA §274A, it is unlawful for an employer to knowingly hire, recruit or refer for a fee, or continue to employ an alien who is not authorized to be so employed. Employers who engage in unlawful employment may be subject to civil and/or criminal penalties. If DHS's Immigration and Customs Enforcement (ICE) believes that an employer has committed a civil violation, the employer may receive a "Final Order" for civil money penalties, a settlement, or a dismissal. In April 2009, ICE issued new guidance on immigration-related worksite enforcement. The 2009 guidance emphasized targeting criminal aliens and employers who cultivate illegal workplaces.

According to data provided by ICE, 637 employers were subject to civil penalties in FY2013, up from zero in FY2006, as depicted in **Figure 17**. A total of \$15.8 million in administrative fines

were imposed in FY2013—a figure that exceeds the level of total fines imposed from FY1999 through FY2009.

Figure 18. Criminal Charges and Fines under INA §274A

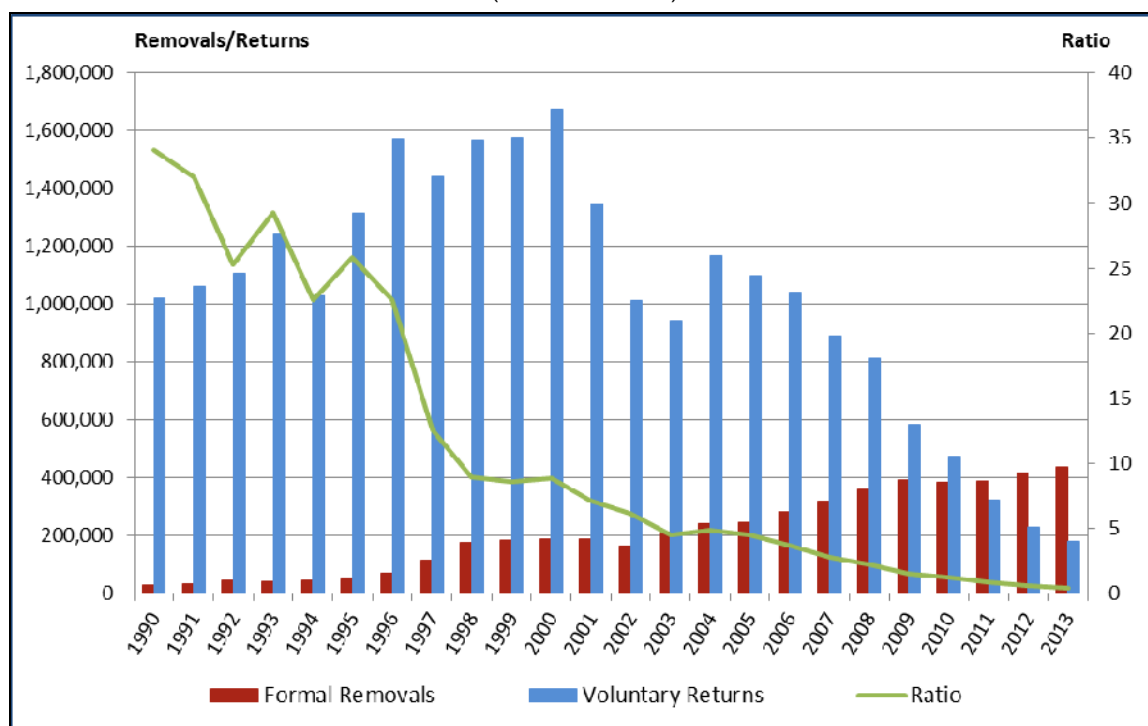

Source: Data provided to CRS by ICE, November 2014

Employers convicted of having engaged in a pattern or practice of knowingly hiring or continuing to employ unauthorized aliens may face criminal fines and/or imprisonment. It is also a criminal offense for a person to knowingly produce, use, or facilitate the production or use of fraudulent immigration documents. Criminal fines peaked at \$36.6 million in FY2010, as presented in **Figure 18**.

For further background and analysis, see CRS Report R40002, *Immigration-Related Worksite Enforcement: Performance Measures*.

Alien Removals

Figure 19. Alien Formal Removals and Voluntary Returns
(FY1990-FY2013)

Source: Statistical Yearbook of Immigration, U.S. Department of Homeland Security, Office of Immigration Statistics, multiple fiscal years.

Note: ICE has reported removal statistics that differ from those published by the DHS Office of Immigration Statistics.

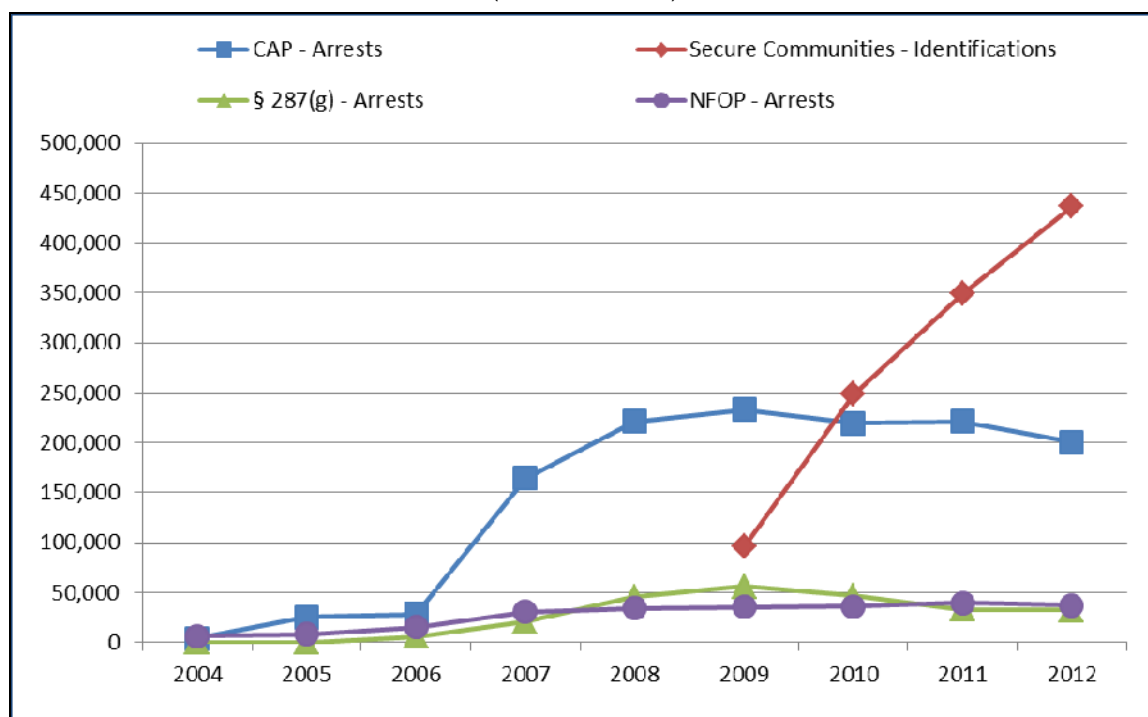

The specific grounds for which foreign nationals are removed from the United States are found in INA §237. These grounds are comparable to the inadmissibility grounds. They include foreign nationals who are inadmissible at time of entry or violate their immigration status; commit certain criminal offenses (e.g., crimes of moral turpitude, aggravated felonies, alien smuggling, high-speed flight); fail to register (if required under law) or commit document fraud; are security risks (such as aliens who violate any law relating to espionage, engage in criminal activity that endangers public safety, partake in terrorist activities, or genocide); become a public charge within five years of entry; or vote unlawfully. Generally, an immigration judge determines whether an alien is removable.

Formal removals grew from 30,039 in FY1990 to 438,421 in FY2013. Since FY2001, formal removals have increased by over 100%. The trends for direct returns at the border and voluntary departures (i.e., permitting aliens to leave the United States on their own recognizance and at their own expense) within the interior in **Figure 19** resemble those of Border Patrol apprehensions over the same period, as depicted in **Figure 15**. As **Figure 19** illustrates, the ratio of voluntary departures to formal removals has gone from 34:1 in FY1990 to under 1:2 by FY2013.

For further background and analysis, see CRS Report R42138, *Border Security: Immigration Enforcement Between Ports of Entry*.

Criminal Aliens

Figure 20. Interior Immigration Enforcement Targeting Criminal Aliens
(FY2004-FY2012)

Source: CRS Report R42057, *Interior Immigration Enforcement: Programs Targeting Criminal Aliens*.

DHS's Immigration and Customs Enforcement (ICE) managed four interior immigration enforcement programs targeting criminal aliens. The Criminal Alien Program (CAP) is an umbrella program that includes several different systems for initiating removal proceedings against criminal aliens within federal, state, and local prisons and jails. The number of CAP arrests jumped from 28,493 in FY2006 to 164,296 in FY2007 in just one year. The number has fluctuated less substantially in subsequent years, as shown in **Figure 20**.

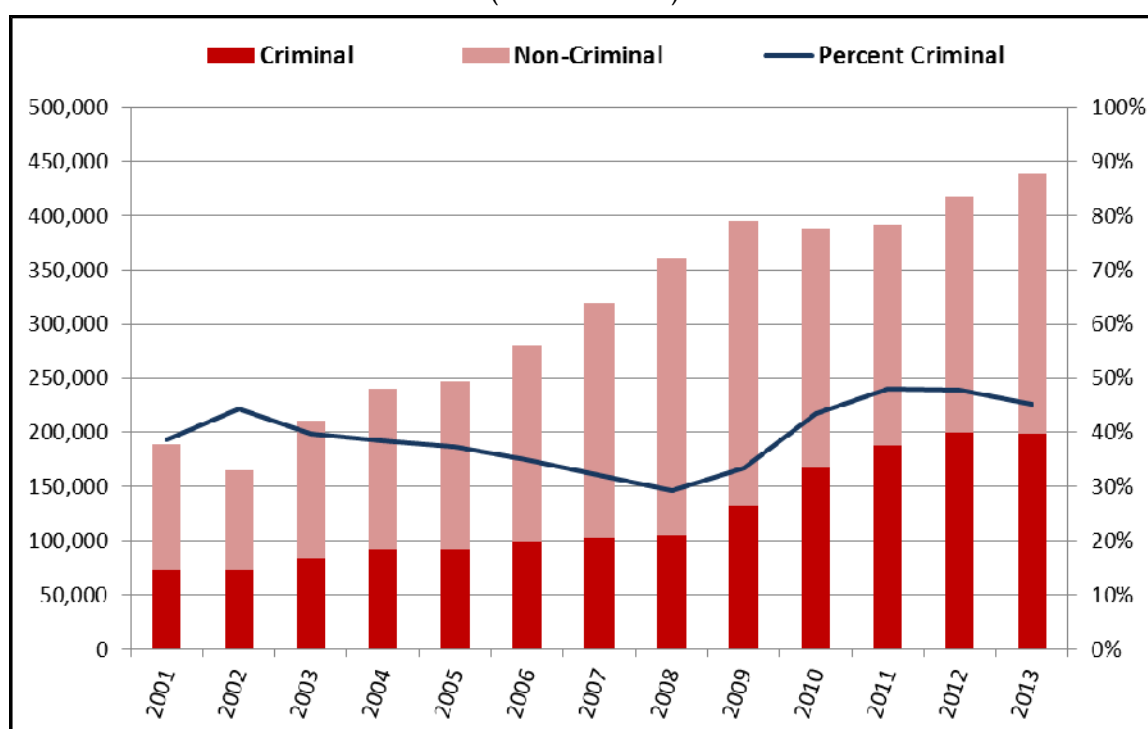

Secure Communities is an information sharing program between DHS and the Department of Justice (DOJ). Under the program, when participating law enforcement agencies submit the fingerprints of people being booked into jails to the Federal Bureau of Investigation (FBI) for criminal background checks, the fingerprints are also automatically checked against DHS databases, and potential matches are forwarded to ICE's Law Enforcement Support Center. Secure Communities began in FY2009 with 95,664 alien identifications and had increased to 436,377 enforcement actions in FY2012. ICE identifies many more potentially removable aliens than it arrests. Per President Obama's Executive Action of November 20, 2014, Secure Communities was ended and replaced with the Priority Enforcement Program (PEP).⁴

⁴ Memorandum from Jeh Charles Johnson, Secretary, *Secure Communities*, U.S. Department of Homeland Security, (continued...)

The INA §287(g) program enables ICE to delegate certain immigration enforcement functions to state and local law enforcement agencies pursuant to memorandums of agreement between such agencies and ICE. ICE trains and supervises the local officers, who may perform specific functions relating to the investigation, apprehension, or detention of aliens. INA §287(g) arrests have gone from 0 in FY2004 and 2 in FY2005 to 32,141 in FY2012, peaking at 56,116 in FY2009. National Fugitive Operations Program (NFOP) pursues known at-large criminal aliens and fugitive aliens, and their arrests have gone from 6,584 in FY2004 to 37,371 in FY2012.

For further background and analysis, see CRS Report R42057, *Interior Immigration Enforcement: Programs Targeting Criminal Aliens*.

Figure 21. Criminal and Non-criminal Aliens Removed from the United States
(FY2001-FY2013)

Source: Statistical Yearbook of Immigration, U.S. Department of Homeland Security, Office of Immigration Statistics, multiple fiscal years.

Note: ICE has reported removal statistics that differ from those published by the DHS Office of Immigration Statistics.

In 1986, Congress made deporting aliens who had been convicted of certain crimes an enforcement priority. Between 1988 and 1996, Congress enacted a series of measures, including the Illegal Immigrant Reform and Immigrant Responsibility Act of 1996 (IIRIRA, P.L. 104-208), which expanded the definition of aggravated felons and created additional criminal grounds for removal.

(...continued)

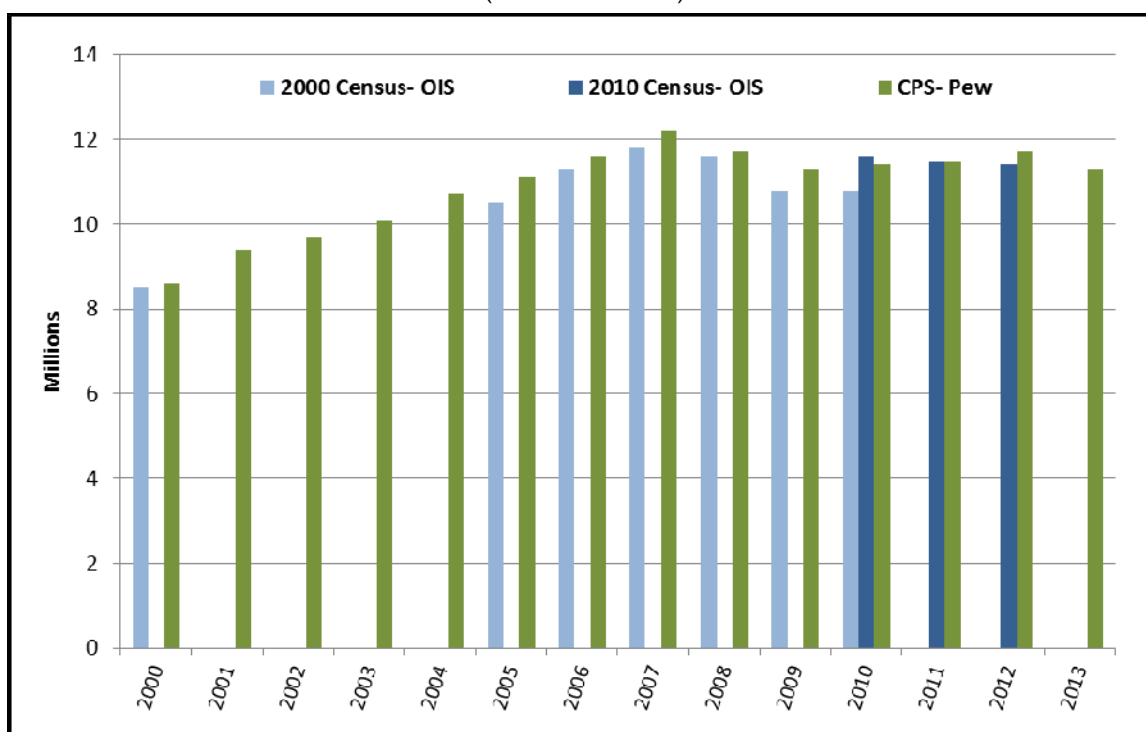

November 20, 2014.

The number of criminal aliens who have been removed has risen sharply in recent years. According to the DHS Office of Immigration Statistics, and as presented in **Figure 21**, the number of criminal aliens removed from the United States has gone from 73,298 in FY2001 to 198,394 in FY2013. This change is a 137% increase in the removal of criminal aliens over the past decade. As a percentage of all removals, criminal aliens accounted for 45% in FY2013.

For further background and analysis, see CRS Report R42057, *Interior Immigration Enforcement: Programs Targeting Criminal Aliens*; and CRS Report RL32480, *Immigration Consequences of Criminal Activity*.

Unauthorized Resident Aliens

Figure 22. Estimated Number of Unauthorized Resident Aliens
(CY2000-CY2013)

Source: CRS presentation of analyses of U.S. Census and CPS data conducted by Jeffrey Passel and D'Vera Cohn (2008, 2010, 2011); Michael Hoefer, Nancy Rytina, and Bryan Baker (2009, 2010, 2011); and Bryan Baker and Nancy Rytina (2013).

Note: This chart presents estimates produced with three different sources of data: the 2000 Decennial Census, the 2010 Decennial Census, and the Current Population Survey (CPS). **OIS** refers to the DHS Office of Immigration Statistics; **Pew** refers to the Pew Hispanic Center.

The three main components of the unauthorized resident alien population are (1) aliens who enter the country surreptitiously without inspection, (2) aliens who overstay their nonimmigrant visas, and (3) aliens who are admitted on the basis of fraudulent documents. In all three instances, the aliens are in violation of the INA and subject to removal.

Estimates derived from the March Supplement of the CPS indicate that the unauthorized resident alien population rose from 8.6 million in 2000 to 11.3 million in 2013, as **Figure 22** shows. The demographers at the Pew Research Center, which produced many of the unauthorized population estimates, concluded that the size of the unauthorized resident alien population has declined from an estimated 12.2 million unauthorized immigrants living in the United States in March 2007.

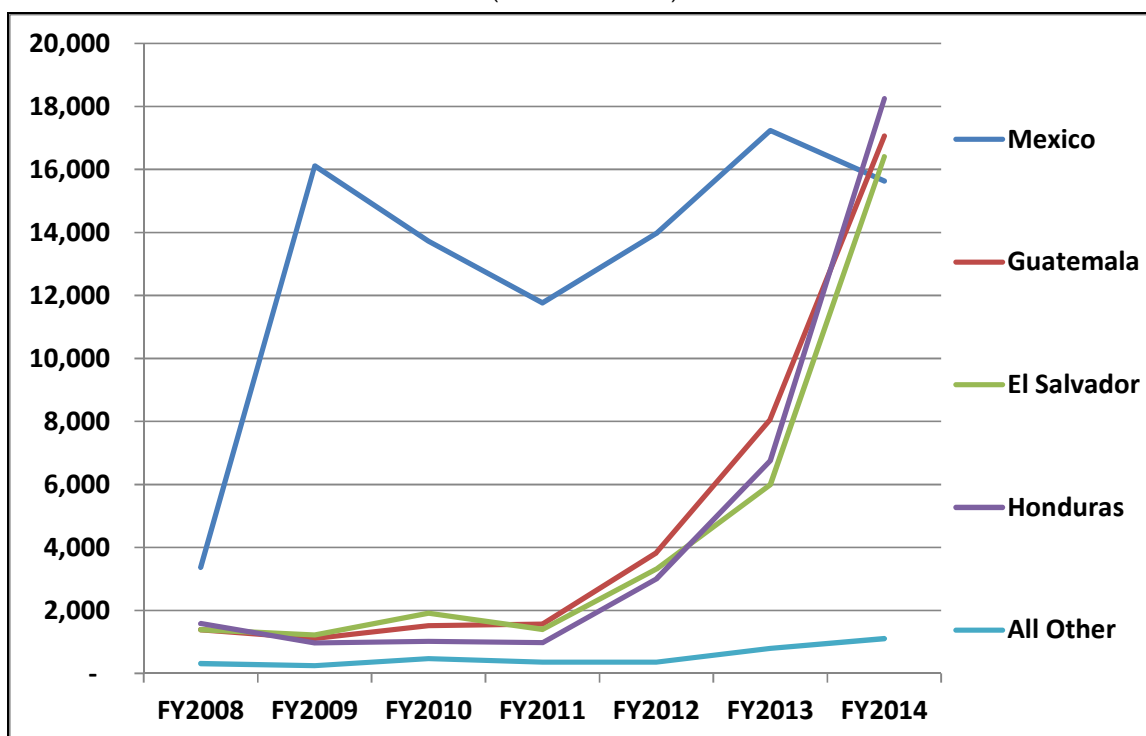

Demographers at the Department of Homeland Security's (DHS's) Office of Immigration Statistics (OIS) published their estimates of the unauthorized resident alien population and yielded results consistent with Pew Research estimates. OIS demographers drew their estimates from the decennial censuses of 2000 and 2010, adjusted with the American Community Survey (ACS). Although their ACS estimates tend to be lower than the Pew estimates using the Current Population Survey (CPS), the trends are comparable.

The most recent OIS report estimated that 42% of the 11.4 million unauthorized residents in 2012 had entered from 2000 to 2010. Although increased border security, a record number of alien removals, and high unemployment, among other factors, have depressed the levels of illegal migration in recent years, the estimated number of unauthorized aliens residing in the United States has remained above 10 million for a decade.

For further background and analysis, see CRS Report RL33874, *Unauthorized Aliens Residing in the United States: Estimates Since 1986*.

Unaccompanied Alien Children

Figure 23. Unaccompanied Alien Children Apprehensions by Country of Origin
(FY2008-FY2014)

Source: Department of Homeland Security, United States Border Patrol

Unaccompanied alien children (UAC) are defined in statute as aliens who are under age 18, lack lawful immigration status in the United States, and are without a parent or legal guardian in the United States or lack a parent or legal guardian in the United States who is available to provide care and physical custody.

In the past several years, the number of unaccompanied alien children (UAC) seeking to enter the United States along the U.S.-Mexico border has surged to historically high levels. Apprehensions of UAC, mainly at the Mexico-U.S. border, increased from 8,041 in FY2008 to 68,445 in FY2014 (**Figure 23**). Four countries account for almost all of the UAC cases (El Salvador, Guatemala, Honduras, and Mexico) and much of the recent increase has come from El Salvador, Guatemala, and Honduras.

Several agencies in the Department of Homeland Security (DHS) and the Department of Health and Human Services' (HHS) Office of Refugee Resettlement (ORR) share responsibilities for the processing, treatment, and placement of UAC. Congress has expressed increasing concern over this situation because of its implications for border security and U.S. immigration policy.

For further background and analysis, see CRS Report R43599, *Unaccompanied Alien Children: An Overview*.
