

National Flood Insurance Program Borrowing Authority

Diane P. Horn

Analyst in Flood Insurance and Emergency Management

Updated December 30, 2019

This Insight evaluates the National Flood Insurance Program (NFIP) borrowing authority to receive loans from the Treasury and the current financial situation of the NFIP.

NFIP Funding

Funding for the NFIP is primarily maintained in an authorized account called the [National Flood Insurance Fund](#) (NFIF). The NFIP is funded from receipts from the premiums of flood insurance policies, including fees and surcharges; [direct annual appropriations for specific costs of the NFIP](#) (only for flood mapping); and borrowing from the Treasury when the NFIF's balance has been insufficient to pay the NFIP's obligations (e.g., insurance claims). Since the end of FY2017, 15 short-term NFIP reauthorizations have been enacted. [Key provisions](#) of the NFIP were extended from September 30 until December 8, 2017 (P.L. 115-56), extended again until December 22, 2017 (P.L. 115-90), and again until January 19, 2018 (P.L. 115-96). The NFIP lapsed between January 20 and January 22, 2018, and received a fourth short-term reauthorization until February 8, 2018 (P.L. 115-120). The NFIP lapsed again for eight hours during a brief government shutdown on February 9, 2018, and was then reauthorized until March 23, 2018 (P.L. 115-123). The NFIP received a 6th reauthorization until July 31, 2018 (P.L. 115-141), a 7th until November 30, 2018 (P.L. 115-225), an 8th until December 7, 2018 (P.L. 115-281), a 9th until December 21, 2018 (P.L. 115-298), a 10th until May 31, 2019 (P.L. 115-396), an 11th until June 14, 2019 (P.L. 116-19), a 12th until September 30, 2019 (P.L. 116-20), a 13th until November 21, 2019 (P.L. 116-59), a 14th until December 20, 2019 (P.L. 116-69), and a 15th reauthorization until September 30, 2020 (P.L. 116-93). These extensions did not increase the NFIP's borrowing limit or provide additional funds to the NFIP.

NFIP Borrowing Authority

The NFIP was not designed to retain funding to cover claims for truly extreme events; instead, the National Flood Insurance Act of 1968 allows the program to [borrow money from the Treasury](#) for such events. For most of the NFIP's history, the program has been able to cover its costs, borrowing relatively small amounts from the Treasury to pay claims and to repay the loans with interest. **Table 1** and **Table 2** show NFIP borrowing, repayments, and debt from 1981 to 2019. Comparable figures are not available before 1980. When the NFIP was established, the [borrowing limit was \\$250 million](#). In 1973, the borrowing limit was [increased to \\$500 million, or \\$1 billion with the approval of the President](#). The borrowing limit was [increased to \\$1.5 billion](#) in 1996; however, borrowing at that level was not required before 2005. The largest debt was \$917 million in 1997, which was reduced to zero by the end of FY2003. However, Congress increased the level of borrowing to pay claims in the aftermath of the [2005 hurricane season](#) (particularly Hurricanes Katrina, Rita, and Wilma). Congress [increased the borrowing limit to \\$18.5 billion](#) in November 2005 and further [increased the borrowing limit to \\$20.775 billion](#) in March 2006. In July 2010, the borrowing limit was [decreased to \\$20.725 billion](#). In 2013, following Hurricane Sandy, Congress [increased the borrowing limit to the current \\$30.425 billion](#). Since 2005, the NFIP has made six principal repayments totaling \$2.82 billion and has [paid \\$4.4 billion in interest](#). The program pays [nearly \\$400 million annually in interest](#).

Table 1. NFIP Borrowing FY1980 to FY1998

(nominal dollars)

Fiscal Year	Amount Borrowed	Amount Repaid	Cumulative Debt
1980	917,406,008	0	917,406,008
1981	164,614,526	624,970,099	457,050,435
1982	13,915,000	470,965,435	0

a. The \$16 billion of debt was cancelled rather than repaid ([P.L. 115-72](#), Title III, §308).

Hurricanes Harvey, Irma, and Maria

In January 2017, the NFIP borrowed \$1.6 billion due to losses in 2016 and debt repayments. On September 22, 2017, FEMA borrowed the remaining \$5.825 billion from the Treasury, reaching the NFIP's authorized borrowing limit of \$30.425 billion. On October 26, 2017, \$16 billion of NFIP debt was canceled to make it possible for the program to pay claims for Hurricanes Harvey, Irma, and Maria. This represents the first time NFIP debt has been canceled, although Congress appropriated funds between 1980 and 1985 to repay NFIP debt. FEMA borrowed another \$6.1 billion on November 9, 2017, to fund estimated 2017 losses, including those incurred by Hurricanes Harvey, Irma, and Maria, increasing the debt to \$20.525 billion. The NFIP currently has \$9.9 billion of remaining borrowing authority.

In January 2017, FEMA paid a \$150 million premium to purchase \$1.042 billion of reinsurance. The contract was structured to pay 26% of losses between \$4 billion and \$8 billion arising from a single flooding event. Claims for Hurricane Harvey exceeded \$8 billion, triggering a full reinsurance claim.

FEMA has not claimed on the [2018 and 2019 reinsurance purchases](#), as no named storms in 2018 or 2019 reached the threshold of \$4 billion in claims.

EveryCRSReport.com

The Congressional Research Service (CRS) is a federal legislative branch agency, housed inside the Library of Congress, charged with providing the United States Congress non-partisan advice on issues that may come before Congress.

EveryCRSReport.com republishes CRS reports that are available to all Congressional staff. The reports are not classified, and Members of Congress routinely make individual reports available to the public.

Prior to our republication, we redacted phone numbers and email addresses of analysts who produced the reports. We also added this page to the report. We have not intentionally made any other changes to any report published on EveryCRSReport.com.

CRS reports, as a work of the United States government, are not subject to copyright protection in the United States. Any CRS report may be reproduced and distributed in its entirety without permission from CRS.
