R41057

Summary

The Small Business Administration's (SBA's) Microloan program provides direct loans to nonprofit intermediary lenders to provide "microloans" of up to \$50,000 to small businesses and nonprofit child care centers. They also provide marketing, management, and technical assistance to microloan borrowers and potential borrowers. Authorized in 1991 as a five-year demonstration project, it became operational in 1992, and was made permanent, subject to reauthorization, in 1997.

The Microloan program is designed to assist women, low-income, veteran, and minority entrepreneurs and small business owners by providing them small-scale loans for working capital or the acquisition of materials, supplies, or equipment. In FY2019, Microloan intermediaries provided 5,533 microloans totaling \$81.5 million. The average Microloan was \$14,735 and had a 7.5% interest rate.

Critics of the SBA's Microloan program argue that it is expensive relative to alternative programs, duplicative of the SBA's 7(a) loan guaranty program, and subject to administrative shortfalls. The program's advocates argue that it assists many who otherwise would not be served by the private sector and is an important source of capital and training assistance for low-income, women, and minority business owners.

Congressional interest in the Microloan program has increased in recent years, primarily because microloans are viewed as a means to assist very small businesses, especially women- and minority-owned startups, to get loans that enable them to create and retain jobs. Job creation and preservation, always a congressional interest, has taken on increased importance given the Coronavirus Disease 2019 (COVID-19) pandemic's adverse impact on the national economy.

This report describes the program's eligibility standards and operating requirements. It also examines arguments presented by the program's critics and advocates. It then discusses

- P.L. 111-240, the Small Business Jobs Act of 2010, which, among other provisions, increased the Microloan program's loan limit for borrowers from \$35,000 to \$50,000, and the aggregate loan limit for intermediaries after their first year of participation in the program from \$3.5 million to \$5 million.
- P.L. 115-141, the Consolidated Appropriations Act, 2018, which, among other provisions, relaxed requirements on Microloan intermediaries that prohibited them from spending more than 25% of their technical assistance grant funds on prospective borrowers and more than 25% of those grant funds on contracts with third parties to provide that technical assistance. The act increased those percentages to 50%.
- P.L. 115-232, the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which, among other provisions, increased the Microloan program's aggregate loan limit for intermediaries after their first year of participation in the program from \$5 million to \$6 million.
- P.L. 116-136, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), which, among other provisions, appropriated \$17 billion to pay the principal, interest, and any associated fees that are owed on an existing 7(a), 504/CDC, or Microloan that is in a regular servicing status for a six-month period starting on the next payment due date.
- P.L. 116-139, the Paycheck Protection Program and Health Care Enhancement Act, which, among other provisions, increased the Paycheck Protection

Program's (PPP) authorization limit from \$349 billion to \$659 billion and required that no less than \$30 billion of that amount be set aside for loans issued by "community financial institutions," including, among others, microloan intermediaries.

Small Business Microloans and Training Assistance

The Small Business Administration (SBA) administers programs that support small businesses, including loan guarantees to lenders to encourage them to provide loans to small businesses “that might not otherwise obtain financing on reasonable terms and conditions” and grants to nonprofit organizations to provide marketing, management, and technical training assistance to small business owners.¹ Historically, one of the justifications presented for funding the SBA’s loan guarantee programs has been that small businesses can be at a disadvantage, compared with other businesses, when trying to obtain access to sufficient capital and credit.² It has been argued that this disadvantage is particularly acute for startups and microbusinesses (firms with fewer than five employees):

Traditional lending institutions, such as banks and investors, are unlikely to offer loans and investment capital to microfirms due to a variety of reasons. One barrier to microlending is a concern that startups and smaller enterprises are risky investments since growing businesses typically exhibit erratic bursts of growth and downturn. The perceived risk of these types of companies reduces the chances of a microbusiness to obtain financing. Another issue is that microbusinesses by and large require smaller amounts of capital, and thus banks or investment companies often believe that it is not efficient use of their time or resources, nor will they receive a substantive return on investment from such a small loan amount.³

An Urban Institute survey of SBA 7(a), 504/Certified Development Company (504/CDC), Small Business Investment Company (SBIC), and Microloan borrowers conducted in 2007 found that Microloan borrowers reported having the most difficulty in finding acceptable financing elsewhere. Less than one-third (31%) of Microloan borrowers reported that they would have been able to find acceptable financing elsewhere, compared with 35% of SBIC borrowers, 40% of 7(a) borrowers, and 48% of 504/CDC borrowers.⁴

Since its inception in 1953, the SBA has provided loan guarantees to encourage lenders to issue small businesses loans.⁵ Interest in creating a separate loan program to address the specific needs of startups and microbusinesses increased during the 1980s, primarily due to the growth and experience of microlending institutions abroad and evidence concerning private lending practices that led Congress to conclude that a new loan program was necessary “to reach very small businesses that were not being served by traditional lenders of SBA’s credit programs.”⁶

⁴ Christopher Hayes, *An Assessment of the Small Business Administration’s Loan and Investment Programs: Survey of Assisted Businesses* (Washington: The Urban Institute, January 2008), p. 5, at http://www.urban.org/UploadedPDF/411599_assisted_business_survey.pdf.

⁵ The SBA also provided direct loans to small businesses until 1994. For further analysis, see CRS Report R40985, *Small Business: Access to Capital and Job Creation*, by Robert Jay Dilger.

⁶ Robert Cull, Asli Demirguc-Kunt, and Jonathan Morduch, “Microfinance Meets the Market,” *Journal of Economic Perspectives*, vol. 23, no. 1 (Winter 2009), pp. 169-172; and U.S. Congress, Senate Committee on Small Business and

To address the perceived disadvantages faced by very small businesses in gaining access to capital, Congress authorized the SBA's Microloan lending program in 1991, as a five-year demonstration project (P.L. 102-140, the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1992). The program became operational in 1992. Its stated purpose is

to assist women, low-income, veteran ... and minority entrepreneurs and business owners and other individuals possessing the capability to operate successful business concerns; to assist small business concerns in those areas suffering from a lack of credit due to economic downturns; ... to make loans to eligible intermediaries to enable such intermediaries to provide small-scale loans, particularly loans in amounts averaging not more than \$10,000, to start-up, newly established, or growing small business concerns for working capital or the acquisition of materials, supplies, or equipment; [and] to make grants to eligible intermediaries that, together with non-Federal matching funds, will enable such intermediaries to provide intensive marketing, management, and technical assistance to microloan borrowers.⁷

The SBA's Microloan lending program was made permanent, subject to reauthorization, in 1997 (P.L. 105-135, the Small Business Reauthorization Act of 1997).⁸

Congressional interest in the Microloan program has increased in recent years, primarily because microloans are viewed as a means to assist very small businesses, especially women- and minority-owned startups, obtain loans that enable them to create jobs. Job creation and preservation, always a congressional interest, has taken on increased importance given the Coronavirus Disease 2019 (COVID-19) pandemic's adverse impact on the national economy.

This report describes the Microloan program's eligibility standards and operating requirements for lenders and borrowers and examines arguments presented by the program's critics and advocates. It also examines the following laws that affected the program:

Entrepreneurship, *Microloan Program Improvement Act of 2001*, report to accompany S. 174, 107th Cong., 1st sess., May 26, 2001, S.Rept. 107-18 (Washington: GPO, 2001). About 3.54 million employer firms in the United States in 2012 had fewer than five employees. See U.S. Census Bureau, *Statistics of U.S. Businesses: U.S. & States, Totals*, at http://www2.census.gov/econ/subs/data/2012/us_state_totals_2012.xls.

⁷ 15 U.S.C. §636(m)(1)(A).

⁸ Prior to the Microloan program, the SBA temporarily established, in 1964, the "6 on 6" pilot lending program, which provided up to \$6,000 for a term of up to 6 years "aimed specifically at disadvantaged potential entrepreneurs." See U.S. Congress, House Select Committee on Small Business, Subcommittee on Minority Small Business Enterprise, *Government Minority Small Business Programs*, hearing pursuant to H. Res. 5 and 19, 92nd Cong., 1st sess., July 27, 1971 (Washington: GPO, 1972), p. 6. Also, in 1964, P.L. 88-452, the Economic Opportunity Act of 1964 (Title IV-Employment and Investment Incentives), authorized the director of the Office of Economic Opportunity, through the SBA, to provide what were subsequently called Economic Opportunity Loans (EOL). The EOL program became operational in January 1965 and continued through 1992 (the final EOL loan disbursement took place in 1996). P.L. 93-386, the Small Business Amendments (approved August 23, 1974) transferred authority for the EOL program from the Office of Economic Opportunity to the SBA. Initially, the EOL program provided direct loans (of up to \$25,000, with loan terms of up to 15 years) to assist small businesses promote employment of the long-term unemployed. Starting in 1968, EOL loans increasingly were issued as guaranteed loans. The program's loan limits were increased, by law, from \$25,000 to \$50,000 in 1972 and to \$100,000 in 1976. The EOL program's requirements and operations evolved over time, but remained focused on providing loans to low-income, minority-owned, very small businesses. The EOL program also emphasized the provision of management and technical training assistance to disadvantaged entrepreneurs. See U.S. Congress, House Committee on Education and Labor, *Economic Opportunity Act Amendments of 1967*, hearing on H.R. 8311, 90th Cong., 1st sess., June 23, 1967 (Washington: GPO, 1967), pp. 1356-1362; U.S. Congress, House Committee on Appropriations, Subcommittee on Commerce, Justice, State, and Judiciary, *Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for 1993*, 102nd Cong., 2nd sess., February 19, 1992 (Washington: GPO, 1992), pp. 503-504; and U.S. General Accounting (now Government Accountability) Office, *Most Borrowers of Economic Opportunity Loans Have Not Succeeded in Business*, CED-81-3, December 8, 1980, pp. 1-8, at <http://www.gao.gov/assets/140/131190.pdf>.

- P.L. 111-240, the Small Business Jobs Act of 2010, among other provisions, authorized several changes to the SBA’s loan guaranty programs, including increasing the Microloan program’s loan limit for borrowers from \$35,000 to \$50,000, and the aggregate loan limit for intermediaries after their first year of participation in the program from \$3.5 million to \$5 million. It also authorized the SBA to waive, in whole or in part through FY2012, the nonfederal share requirement for loans to the Microloan program’s intermediaries and for grants made to Microloan intermediaries for small business marketing, management, and technical assistance for up to a fiscal year.
- P.L. 115-141, the Consolidated Appropriations Act, 2018, among other provisions, relaxed requirements on Microloan intermediaries that prohibited them from spending more than 25% of their technical assistance grant funds on prospective borrowers and more than 25% of those grant funds on contracts with third parties to provide that technical assistance. The act increased those percentages to 50% (originally in H.R. 2056, the Microloan Modernization Act of 2017, and S. 526, its companion bill in the Senate).
- P.L. 115-232, the John S. McCain National Defense Authorization Act for Fiscal Year 2019, among other provisions, increased the Microloan program’s aggregate loan limit for intermediaries after their first year of participation in the program from \$5 million to \$6 million (originally in H.R. 2056, the Microloan Modernization Act of 2017, and S. 526, its companion bill in the Senate).
- P.L. 116-136, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), among other provisions, appropriated \$17 billion to pay the principal, interest, and any associated fees that are owed on an existing 7(a), 504/CDC, or Microloan that is in a regular servicing status for a six-month period starting on the next payment due date.⁹
- P.L. 116-139, the Paycheck Protection Program and Health Care Enhancement Act, among other provisions, increased the Paycheck Protection Program’s (PPP) authorization limit from \$349 billion to \$659 billion and required that no less than \$30 billion of that amount be set aside for loans issued by “community financial institutions,” including, among others, microloan intermediaries.¹⁰

Also, during the 116th Congress,

- S. 996, the Microloan Program Enhancement Act of 2019, would, among other provisions, eliminate the restriction that prevents the SBA from distributing more than \$800,000 or 1/55th of available loan funds (whichever is less) in any state during the first half of each fiscal year. The bill also would increase the annual cap on the total amount that may be committed to an intermediary to provide loans from \$2.5 million to \$3 million, and the intermediary’s aggregate loan amount after its first year of participation in the program from \$6 million to \$7 million. The bill also would authorize \$80 million for Microloan technical assistance grants and \$110 million for Microloan direct loans in each of FY2020-FY2022, and require the SBA to annually report information related to the

⁹ For additional information about the CARES Act, see CRS Report R46284, *COVID-19 Relief Assistance to Small Businesses: Issues and Policy Options*, by Robert Jay Dilger, Bruce R. Lindsay, and Sean Lowry.

Microloan program to the House and Senate Committees on Small Business and on the SBA's public website.¹¹

The SBA Microloan Program: Funding, Eligibility Standards, Program Requirements, and Statistics

Unlike the SBA's 7(a) and 504/CDC loan guarantee programs, the SBA Microloan program does not guarantee loans.¹² Instead, it provides direct loans to qualified nonprofit intermediary Microloan lenders who, in turn, provide "microloans" of up to \$50,000 to small business owners, entrepreneurs, and nonprofit child care centers.¹³ There are currently 144 active Microloan intermediaries serving 49 states, the District of Columbia, and Puerto Rico.¹⁴

Funding

The Microloan program's total administrative costs (anticipated to be \$6.9 million in FY2020) are funded through the SBA's salaries and expenses and business loan administration accounts. In addition, each year the SBA receives an appropriation for credit subsidies for its direct lending (Microloan) program.

Business loan credit subsidies represent the net present value of cash flows to and from the SBA over the life of the loan portfolio. For guaranteed loans, the net present value of cash flows is primarily affected by the difference between the cost of purchasing loans that have defaulted and the revenue generated from fees and collateral liquidation. For direct (Microloan) lending, the net present value of cash flows is primarily affected by the cost of offering below market interest rates to intermediaries because the cost of purchasing loans that have defaulted is typically relatively small because intermediaries are required to maintain a loan loss reserve. In addition, the SBA does not charge intermediaries fees.¹⁵

¹¹ The Trump Administration recommended in its FY2021 Congressional Budget Justification document that the 1/55th rule be changed to a 1/25th rule, noting that "The 10 states with the highest percentage of SBA loan funds comprise 36.7% of SBA funds outstanding. This restriction delays deployment of Microloan funds and limits the availability of capital for small businesses regardless of the size of the state or the needs of the small business community. Under the 1/55th rule, funds allocated to these 10 states would total 18.2%. If the rule were adjusted to 1/25th, the SBA could allocate up to 40% of available funds to these 10 states and bring supply and demand more in line. This rule change would maintain a distributional guardrail but provide greater flexibility to lenders and access to financing for small businesses." See SBA, *Fiscal Year 2021 Congressional Budget Justification and FY2019 Annual Performance Report*, p. 87, at <https://www.sba.gov/document/report—congressional-budget-justification-annual-performance-report>.

¹² For information and analysis concerning the SBA's 7(a) and 504/CDC programs, see CRS Report R41146, *Small Business Administration 7(a) Loan Guaranty Program*, by Robert Jay Dilger, and CRS Report R41184, *Small Business Administration 504/CDC Loan Guaranty Program*, by Robert Jay Dilger.

¹³ P.L. 111-240, the Small Business Jobs Act of 2010, increased the loan limit for borrowers from \$35,000 to \$50,000.

¹⁴ SBA, *Fiscal Year 2021 Congressional Budget Justification and FY2019 Annual Performance Report*, pp. 36, 165, at <https://www.sba.gov/document/report—congressional-budget-justification-annual-performance-report>. For a list of Microloan intermediaries, regardless of lending volume, see SBA, *Microloan Program: Partner Identification & Management System Participating Intermediary Microlenders Report*, June 21, 2017, at https://www.sba.gov/sites/default/files/articles/microlenderrpt5_20170621.pdf.

¹⁵ The SBA's Office of Financial Analysis and Modeling is responsible for ensuring that the computation of subsidy rates for the SBA's credit programs are in compliance with the Federal Credit Reform Act of 1990 (FCRA). As indicated on its website: "The FCRA requires all credit agencies, including the SBA, to budget and account for the cost of credit programs by determining the net present value of cash flows to and from the Government over the life of the portfolio and expressing the net amount as a credit subsidy rate. The process to develop a subsidy rate is lengthy and

In FY2020, the SBA was provided \$5 million for direct (Microloan) business loan credit subsidies. This appropriation is expected to support about \$46 million in lending to intermediaries over the fiscal year.¹⁶

In FY2020, the SBA received an appropriation of \$34.5 million for grants to selected Microloan intermediaries and qualified “non-lending technical assistance providers” to provide Microloan borrowers and prospective borrowers marketing, management, and technical training assistance.¹⁷

As shown in **Table 1**, Microloan intermediaries provided counseling services to 22,100 small businesses in FY2019. The data indicate that the number of small businesses served by the Microloan technical assistance program has generally increased in recent years.

Table 1. Microloan Technical Assistance Program Counseling Services, FY2010-FY2019

Fiscal Year	Number of Small Businesses Provided Microloan Technical Assistance Counseling Services
2010	14,916
2011	15,900
2012	15,892
2013	19,368
2014	15,668
2015	17,200
2016	17,948
2017	19,600
2018	21,800
2019	22,100

complex, requiring unique data collection techniques and analysis efforts. SBA develops its subsidy rates by creating models that incorporate data on loan maturity, borrowers’ interest rates, fees, grace periods, interest subsidies, delinquencies, purchases or defaults, recoveries, prepayments, advances and borrower characteristics. See SBA, Office of Financial Analysis and Modeling, “Summary of Responsibilities,” at <https://www.sba.gov/offices/headquarters/ocfo/resources/13299>. Also, see U.S. Congress, Senate Committee on Small Business and Entrepreneurship, *Small Business Reauthorization and Improvements Act of 2006*, report to accompany S. 3778, 109th Cong., 2nd sess., November 16, 2006, S.Rept. 109-361 (Washington: GPO, 2006), p. 6; and U.S. Government Accountability Office, *Participants in SBA’s Microloan Program Could Provide Additional Information to Enhance the Public’s Understanding of Recovery Act Fund Uses and Expected Outcomes*, GAO-10-1032R, September 29, 2010, p. 2, at <http://www.gao.gov/assets/100/97128.pdf>.

¹⁷ P.L. 116-93.

Intermediary Microloan Lender Eligibility Standards

To become a qualified intermediary Microloan lender, an applicant must

- be organized as a nonprofit community development corporation or other entity, a consortium of nonprofit community development corporations or other entities, a quasigovernmental economic development corporation, or an agency established by a Native American Tribal Government;
- be located in the United States, including the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, and American Samoa;
- have made and serviced short-term, fixed rate loans of not more than \$50,000 to newly established or growing small businesses for at least one year; and
- have at least one year of experience providing technical assistance to its borrowers.¹⁸

If accepted into the program by the SBA, an intermediary may borrow no more than \$750,000 from the SBA during its first year of participation. After the first year, the maximum loan amount is \$2.5 million. By law, an intermediary's total outstanding Microloan program debt must not exceed \$6 million.¹⁹

The SBA approves and lends funds, subject to the availability of appropriations, to intermediaries based on the order in which applications are received. The amount provided is subject to two statutory limitations.

- No more than 300 intermediaries may participate in the Microloan program at any given time.²⁰
- During the first six months of each fiscal year, subject to the availability of appropriations, at least \$800,000 or 1/55th of available loan funds (whichever is less) is required to be made available for loans to intermediaries in each state (including the District of Columbia, the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, and American Samoa).²¹

Any applications that cannot be funded during the first six months “due to geographic limitations will be kept on file in the order they were received” and, subject to the availability of funds, “will be funded during the seventh month of the fiscal year [April].”²² If the amount of requested loan funds exceeds the amount of available funds, the SBA “may hold back up to 20% of available loan funds to ensure that due consideration is given to new intermediaries and those having the

¹⁸ 13 C.F.R. §120.701; and 13 C.F.R. §120.702. P.L. 111-240, the Small Business Jobs Act of 2010, increased the loan limit for borrowers from \$35,000 to \$50,000.

¹⁹ 13 C.F.R. §120.706; and SBA, “SOP 52 00 B: Microloan Program,” (effective July 1, 2018), p. 22, at <https://www.sba.gov/document/sop-52-00-microloan-program>. P.L. 111-240, the Small Business Jobs Act of 2010, increased the aggregate loan limit for intermediaries after their first year of participation in the program from \$3.5 million to \$5 million. P.L. 115-232, the John S. McCain National Defense Authorization Act for Fiscal Year 2019, among other provisions, increased the Microloan program's aggregate loan limit for Microloan intermediaries after their first year of participation in the program from \$5 million to \$6 million.

²⁰ 15 U.S.C. §636 (m)(7)(A).

²¹ 15 U.S.C. §636 (m)(7)(B)(i).

²² SBA, “SOP 52 00 B: Microloan Program,” (effective July 1, 2018), pp. 20, 21, at <https://www.sba.gov/document/sop-52-00-microloan-program>. (Hereinafter cited as SBA, “SOP 52 00 B: Microloan Program.”)

greatest impact to underserved markets.”²³ Also, if the amount of requested loan funds from new intermediaries exceeds the amount of available funds, the SBA “may choose to select a new intermediary in an underserved location (a location that is currently unserved by an SBA Microloan Program Intermediary Lender), as determined by the Agency, over a new applicant in an area that is already served by one or more existing Intermediaries.”²⁴

Intermediary Microloan Lender Program Requirements

Intermediaries are not required to make any interest payments on the Microloan during the first year, but interest accrues from the date that the SBA disburses the loan proceeds to the intermediary. After that, the SBA determines the schedule for periodic payments. Loans must be repaid within 10 years.²⁵

The SBA charges intermediaries an interest rate that is based on the five-year Treasury rate, adjusted to the nearest one-eighth percent (called the Base Rate), less 1.25% if the intermediary maintains an historic portfolio of Microloans averaging more than \$10,000, and less 2.0% if the intermediary maintains an historic portfolio of Microloans averaging \$10,000 or less. The Base Rate, after adjustment, is called the Intermediary’s Cost of Funds. The Intermediary’s Cost of Funds is initially calculated one year from the date of the note and is reviewed annually and adjusted as necessary (called recasting). The interest rate cannot be less than zero.²⁶

Intermediaries are required to contribute not less than 15% of the loan amount in cash from nonfederal sources and, as security for repayment of the loan, must provide the SBA first lien position on all notes receivable from any microloans issued under the program.²⁷ Unlike the SBA’s 7(a) and 504/CDC loan guarantee programs, the SBA does not charge intermediaries upfront or ongoing service fees under the Microloan program.²⁸

As mentioned, P.L. 111-240 temporarily allowed the SBA to waive, in whole or in part through FY2012, the intermediary’s 15% nonfederal share requirement under specified circumstances (e.g., the economic conditions affecting the intermediary and the intermediary’s performance) for up to a fiscal year.²⁹

Intermediaries are required to deposit the proceeds from the SBA’s loans, their 15% contribution, and payments from their Microloan borrowers into a Microloan Revolving Fund. Intermediaries may only withdraw from this account funds necessary to make microloans to borrowers, repay the SBA, and establish and maintain a Loan Loss Reserve Fund to pay any shortage in the Microloan Revolving Fund caused by delinquencies or losses on its microloans.³⁰ They are required, until they have been in the program for at least five years, to maintain a balance in the Loan Loss Reserve Fund equal to 15% of the outstanding balance of the notes receivable from

²⁶ 15 U.S.C. §636(m)(3)(F)(iii); and SBA, “SOP 52 00 B: Microloan Program,” (effective July 1, 2018), pp. 22, 23, at <https://www.sba.gov/document/sop-52-00-microloan-program>. In recent years, the Intermediary’s Cost of Funds has been either zero or close to zero.

²⁷ 13 C.F.R. §120.706. Note: The 15% contribution must be from nonfederal sources and may not be borrowed. For purposes of this program, Community Development Block Grants are considered nonfederal sources.

²⁸ 13 C.F.R. §120.706.

²⁹ P.L. 111-240, the Small Business Jobs Act of 2010, §1401. Matching Requirements Under Small Business Programs.

³⁰ 13 C.F.R. §120.709.

their Microloan borrowers.³¹ After five years, if the intermediary's average annual loss rate during the preceding five years is less than 15% and no other factors exist that may impair the intermediary's ability to repay its obligations to the SBA, the SBA Administrator may reduce the required balance in the intermediary's Loan Loss Reserve Fund to the intermediary's average annual loss rate during the preceding five years, but not less than 10% of the portfolio.³² Intermediaries are required to maintain their Loan Loss Reserve Fund until they have repaid all obligations owed to the SBA.

The SBA does not maintain detailed data necessary to determine an aggregate default rate for Microloan borrowers. However, a Government Accountability Office (GAO) analysis of 23,000 SBA microloans issued from 2014 through 2017 found that about 3% of Microloan borrowers were delinquent (payments were more than 30 days late but up to 120 days late) and 7% had defaulted on their loans to intermediaries.³³ Because the Loan Loss Reserve Fund is used to contribute toward the cost of borrower defaults, and is often sufficient to cover the entire cost of such defaults, the SBA's loss rate for intermediary repayment is typically less than 3% each year.³⁴

An intermediary may be suspended or removed from the Microloan program if it fails to comply with a specified list of program performance standards. For example, intermediaries are required to close and fund at least 10 microloans per year, cover the service territory assigned by the SBA, honor the SBA determined boundaries of neighboring intermediaries and nonlender technical assistance providers, fulfill reporting requirements, maintain a loan currency rate of 85% or more (where loans are no more than 30 days late in scheduled payments), maintain a default rate of 15% or less, and "satisfactorily provide" in-house technical assistance to microloan clients and prospective microloan clients.³⁵

Intermediary Marketing, Management, and Technical Training Assistance

As mentioned, the SBA has received an appropriation of \$34.5 million in FY2020 for grants to Microloan intermediaries and qualified "non-lending technical assistance providers" to provide Microloan borrowers and prospective borrowers marketing, management, and technical training assistance (see **Appendix** for previous funding levels).

³¹ 13 C.F.R. §120.710.

³² 13 C.F.R. §120.710.

³³ U.S. Government Accountability Office (GAO), *SBA Microloan Program: Opportunities Exist to Strengthen Program Performance Measurement, Collaboration, and Reporting*, GAO-20-49, November 19, 2019, p. 11, at <https://www.gao.gov/products/GAO-20-49>. In 2007, the SBA estimated that the borrower default rate for the Microloan program was about 12%. See U.S. Congress, House Committee on Small Business, *Full Committee Hearings on the Small Business Administration's Microloan Program*, 110th Cong., 1st sess., June 14, 2007, H.Hrg. 110-30 (Washington: GPO, 2007), p. 15. However, a study released on December 28, 2009, by the SBA's Office of the Inspector General concluded that Microloan intermediaries may be under-reporting the default rate. See SBA, Office of the Inspector General, "SBA's Administration of the Microloan Program under the Recovery Act," December 28, 2009, at <https://www.sba.gov/document/report-rom-10-10-rom-10-10-sbas-administration-microloan-program-under-recovery-act>.

³⁴ In FY2019, the Microloan program's intermediary default rate was 2.31%. See SBA, *Agency Financial Report, Fiscal Year 2019*, p. 70, at <https://www.sba.gov/sites/default/files/2019-11/SBA-AFR-fy2019.pdf>.

³⁵ 13 C.F.R. §120.716. A new Microloan intermediary is not required to meet the minimum loan requirement during the year it enters the program.

Intermediaries are eligible to receive a Microloan technical assistance grant “of not more than 25% of the total outstanding balance of loans made to it under this subsection.”³⁶ Grant funds may be used only to provide marketing, management, and technical assistance to Microloan borrowers, except that no more than 50% of the funds may be used to provide such assistance to prospective Microloan borrowers. Grant funds may also be used to attend training required by the SBA.³⁷ Also, intermediaries must contribute, solely from nonfederal sources, an amount equal to 25% of the grant amount. In addition to cash or other direct funding, the contribution may include indirect costs or in-kind contributions paid for under nonfederal programs.³⁸ Intermediaries may expend no more than 50% of the grant funds on third-party contracts for the provision of technical assistance.³⁹

In addition, as mentioned earlier, P.L. 111-240 temporarily allowed the SBA to waive, in whole or in part through FY2012, the 25% nonfederal share requirement for grants made to Microloan intermediaries for small business marketing, management, and technical assistance under specified circumstances (e.g., the economic conditions affecting the intermediary and the intermediary’s performance) for up to a fiscal year.⁴⁰

The SBA does not require Microloan borrowers to participate in the marketing, management, and technical assistance program. However, intermediaries typically require Microloan borrowers to participate in the training program as a condition of the receipt of a microloan. Combining loan and intensive training assistance is one of the Microloan program’s distinguishing features.

Intermediaries that have a portfolio of loans made under the program “that averages not more than \$10,000 during the period of the intermediary’s participation in the program” are eligible to receive an additional training grant equal to 5% of “the total outstanding balance of loans made to the intermediary.”⁴¹ Intermediaries are not required to make a matching contribution as a condition of receiving these additional grant funds.

Nonlending Technical Assistance Providers

Each year, the SBA is authorized to select qualified nonprofit, nonlending technical assistance providers to receive grant funds to provide marketing, management, and technical assistance to Microloan borrowers. Any nonprofit entity that is not an intermediary may apply for these funds.⁴²

The SBA may award up to 55 grants each year to qualified nonlending technical assistance providers to deliver marketing, management, and technical assistance to Microloan borrowers. The grants may be for terms of up to five years and may not exceed \$200,000.⁴³ The nonprofit entity must contribute, solely from nonfederal sources, an amount equal to 20% of the grant. In

³⁶ 15 U.S.C. §636(m)(4)(A). Note: The SBA’s Program for Investment in Microentrepreneurs Act (PRIME) program also provides nonprofit organizations grant funding to assist low-income entrepreneurs with training assistance. See, SBA, “PRIME Program,” at <https://www.sba.gov/offices/headquarters/oca/resources/11416>.

³⁷ 13 C.F.R. §120.712.

³⁸ 13 C.F.R. §120.712. Intermediaries may not borrow their contribution.

³⁹ 13 C.F.R. §120.712. Intermediaries may not borrow their contribution.

⁴⁰ P.L. 111-240, the Small Business Jobs Act of 2010, §1401. Matching Requirements Under Small Business Programs.

⁴¹ 13 C.F.R. §120.712; and 15 U.S.C. §636(m)(4)(C)(i).

⁴² 13 C.F.R. §120.714.

⁴³ 13 C.F.R. §120.714.

addition to cash or other direct funding, the contribution may include indirect costs or in-kind contributions paid for under nonfederal programs.⁴⁴

The SBA stopped awarding these grants at the beginning of FY2005. The SBA determined at that time that the nonlending technical assistance providers duplicated much of what was already being provided by Microloan intermediaries and other SBA entrepreneurial development programs.⁴⁵

Microloan Borrower Eligibility Standards

With one exception, Microloan borrowers must be an eligible, for-profit small business as defined by the Small Business Act. P.L. 105-135, the Small Business Reauthorization Act of 1997, expanded the Microloan program's eligibility to include borrowers establishing a nonprofit childcare business.

Microloan Borrower Program Requirements

Intermediaries are directed by legislative language to provide borrowers "small-scale loans, particularly loans in amounts averaging not more than \$10,000."⁴⁶ They are also directed, "to the extent practicable ... to maintain a microloan portfolio with an average loan size of not more than \$15,000."⁴⁷ Microloans for more than \$20,000 are allowed "only if such small business concern demonstrates that it is unable to obtain credit elsewhere at comparable interest rates and that it has good prospects for success."⁴⁸ The maximum loan amount is \$50,000 and no borrower may owe an intermediary more than \$50,000 at any one time.⁴⁹

Microloan proceeds may be used only for working capital and acquisition of materials, supplies, furniture, fixtures, and equipment. Loans cannot be made to acquire land or property, and must be repaid within seven years (previously, the loan was to be repaid within six years).⁵⁰ Within these parameters, loan terms vary depending on the loan's size, the planned use of funds, the requirements of the intermediary lender, and the needs of the small business borrower. During the 114th Congress, H.R. 2670 would have increased the program's repayment terms from not more than 6 years to not more than 10 years for loans greater than \$10,000.

On loans of more than \$10,000, the maximum interest rate that can be charged to the borrower is the interest rate charged by the SBA on the loan to the intermediary, plus 7.75 percentage points. On loans of \$10,000 or less, the maximum interest rate that can be charged to the borrower is the interest charged by the SBA on the loan to the intermediary, plus 8.5 percentage points.⁵¹ Rates

⁴⁷ 15 U.S.C. §636(m)(6)(B).

⁴⁸ 15 U.S.C. §636(m)(3)(E).

⁴⁹ 13 C.F.R. §120.707. P.L. 111-240, the Small Business Jobs Act of 2010, increased the loan limit for borrowers from \$35,000 to \$50,000.

⁵⁰ 13 C.F.R. §120.707 and SBA, "Express Loan Programs; Affiliation Standards," 85 *Federal Register* 7632, February 10, 2020.

⁵¹ 15 U.S.C. §636(m)(6)(C)(i) and 15 U.S.C. §636(m)(6)(C)(ii) indicate that the threshold average loan amount for determining the maximum interest rate charged to borrowers is \$7,500. The SBA increased the threshold average loan amount used to determine the maximum interest rate charged to borrowers from \$7,500 to \$10,000 in 2001, citing authority provided in P.L. 106-554, the Consolidated Appropriations Act, 2001 (2000 legislation—Small Business

are negotiated between the borrower and the intermediary, and typically range from 6.5% to 9%. In FY2019, the average interest rate charged was 7.5%.⁵²

Each intermediary establishes its own lending and credit requirements. However, borrowers are generally required to provide some type of collateral (consistent with prudent lending practices), and a personal guarantee to repay the loan.⁵³ The SBA does not review the loan for creditworthiness.⁵⁴

Intermediaries are allowed to charge borrowers reasonable packaging fees limited to 3% of the loan amount for loans with terms of one year or more, and 2% for loans with terms of less than one year. Intermediaries are also allowed to charge borrowers “actual, paid and documented out-of-pocket closing costs ... such as filing or recording fees, collateral appraisals, credit reports, and other such direct charges related to loan closing.”⁵⁵ These fees may be added to the loan amount and financed over the life of the loan “provided the total loan amount, including the fee, does not exceed \$50,000.”⁵⁶

Microloan Program Statistics

Table 2 provides the number and amount of Microloan intermediary loans that the SBA approved, the number and amount of Microloans that intermediaries provided small businesses, and the unpaid principal balance for the Microloan program from FY2010 through FY2019.

Reauthorization Act of 2000): “SBA is amending § 120.707(c) [the section in the U.S. Code of Federal Regulations concerning the threshold average loan amount for determining the maximum interest rate charged to borrowers] to reflect the statutory change which increased the dollar amount to \$10,000 up from \$7,500.” See SBA, “Microloan Program,” 66 *Federal Register* 47877, September 4, 2001. However, P.L. 106-554 included language amending Section 7(m) of the Small Business Act (15 U.S.C. 636(m)) “in paragraphs (1)(A)(iii)(I), (3)(A)(ii), and (4)(C)(i)(II), by striking “\$7,500” each place it appears and inserting “\$10,000.” The three sections cited in P.L. 106-554 referred to encouraging intermediaries to make “loans in amounts averaging not more than \$7,500;” directing the Administration to “give priority to those applicants that provide loans in amounts averaging not more than \$7,500;” and eligibility for technical assistance grants “the intermediary has a portfolio of loans made under this subsection that averages not more than \$7,500 during the period of the intermediary’s participation in the program.” According to the SBA, “at the time of the change in the law, SBA staff believed that Congress intended to raise all of the microloan thresholds to \$10,000 from \$7,500, as evidenced by the fact that Congress revised the general purpose language in §7(m)(1)(A)(iii). That provision was revised to state that one of the purposes of the Microloan program is to enable intermediaries to provide small-scale loans, ‘particularly in amounts averaging not more than \$10,000.’ In addition, the legislative history indicates that the loan amounts were increased to reflect inflation, but does not explain why only some loan amounts were adjusted and not others.... Furthermore, it would be confusing to have different thresholds in the several provisions that incentivize intermediaries to make small loans, especially when those thresholds had been the same prior to the changes implemented by P.L. 106-554.... For these reasons, SBA staff believed that increasing all of the microloan thresholds to \$10,000 from \$7,500 would achieve the Congressional purpose in making more small loans available. The regulations implemented the legislative changes in 2001. There is Congressional awareness of these longstanding microloan program regulations, which have never been challenged or questioned. There is also Congressional awareness of the discrepancies in the statute, as evidenced by the 13 bills that have been introduced since 2001 to correct them.” SBA, Office of Congressional and Legislative Affairs, “Correspondence with the author,” November 14, 2013.

⁵² SBA, “Nationwide Loan Report, October 1, 2018, through September 30, 2019,” October 8, 2019.

⁵³ The SBA urges intermediaries in its Microloan SOP “to temper collateral requirements with strong technical assistance and to be creative in their definition of acceptable collateral.” See SBA, “SOP 52 00 B: Microloan Program,” (effective July 1, 2018), pp. 52, 53, at <https://www.sba.gov/document/sop-52-00-microloan-program>.

⁵⁶ SBA, “SOP 52 00 B: Microloan Program,” p. 53.

As shown in **Table 2**, in FY2019, the SBA approved 53 loans to Microloan intermediaries totaling \$42.3 million. The average approved intermediary loan amount was \$797,471.⁵⁷ Microloan intermediaries provided 5,532 loans to small businesses totaling \$81.5 million. The average Microloan amount was \$14,735.⁵⁸

As of the end of FY2019, the SBA had disbursed 1,275 loans to Microloan intermediaries totaling \$597.8 million.⁵⁹ At that time, there were 500 active Microloan intermediary loans with an unpaid principal balance of \$168.1 million.⁶⁰

As shown in **Table 2**, the number and amount of Microloans provided to small businesses have generally increased in recent years.

Table 2. Microloan Program Statistics, FY2010-FY2019

(\$ in millions)

FY	# of Approved SBA Loans to Intermediaries	Amount of Approved SBA Loans to Intermediaries	# of Microloans to Small Businesses	Amount of Microloans to Small Businesses	Unpaid Principal Balance
2010	78	\$40.5	3,729	\$44.1	\$110.3
2011	76	\$37.6	4,002	\$46.8	\$116.8

⁶⁰ SBA, Office of Congressional and Legislative Affairs, “Correspondence with the author,” October 22, 2019 (WDS Draft Table 1.1a Unpaid Principal Balance (UPB) by Program).

The Microloan program is open to all small business entrepreneurs, but targets new and early-stage businesses in “underserved markets, including borrowers with little to no credit history, low-income borrowers, and women and minority entrepreneurs in both rural and urban areas who generally do not qualify for conventional loans or other, larger SBA guaranteed loans.”⁶¹ An analysis conducted by the Urban Institute found that about 9.9% of conventional small business loans are issued to minority-owned small businesses and about 16% of conventional small business loans are issued to women-owned businesses.⁶² In FY2019, of those reporting their race, minority-owned or -controlled firms received 51.2% of the number of microloans issued and 38.4% of the amount issued.⁶³ Women-owned or -controlled firms received 43.7% of the number of microloans issued and 33.1% of the amount issued.⁶⁴

More than three-quarters of all Microloan borrowers (84.3%) in FY2019 were located in an urban area. Also, in FY2019, startup companies received 37.8% of the number of microloans issued and 35.2% of the total amount of microloans issued.⁶⁵

As mentioned, the Microloan program’s estimated borrower default rate is about 7%. Because the Loan Loss Reserve Fund is used to contribute toward the cost of borrower defaults, and is often sufficient to cover the entire cost of such defaults, the SBA’s loss rate for intermediary repayment is typically less than 3% annually. For example, the Microloan program’s intermediary default rate was 1.60% in FY2016, 2.26% in FY2017, 2.29% in FY2018, and 2.31% in FY2019.⁶⁶

Microloans are often used for more than one purpose. In FY2019, they were most commonly used for working capital (73.4%), equipment (28.3%), inventory (19.0%), and supplies (6.3%).⁶⁷

Congressional Issues

Critics of the SBA’s Microloan program argue that it is duplicative of other available programs, expensive relative to alternative programs, and subject to administrative shortfalls. The program’s advocates argue that it provides assistance that “reaches many who otherwise would not be served by the private sector or even the SBA’s 7(a) loan program” and “has provided an important source of capital for low-income women business owners and minority borrowers.”⁶⁸

⁶¹ SBA, “Microloans Help Small Businesses Start, Grow and Succeed” (no longer available online).

⁶² Kenneth Temkin, Brett Theodos, with Kerstin Gentsch, *Competitive and Special Competitive Opportunity Gap Analysis of the 7(A) and 504 Programs* (Washington: The Urban Institute, 2008), p. 13, at http://www.urban.org/UploadedPDF/411596_504_gap_analysis.pdf.

⁶³ SBA, “Nationwide Loan Report, October 1, 2018 through September 30, 2019,” October 8, 2019. 928 of 5,533 Microloan borrowers (16.8%) did not report their race. These borrowers received \$11.3 million in loans. Because the race of these borrowers is unknown, their borrowing was removed from the calculation of the proportional share percentage figures provided for minority-owned or -controlled firms.

⁶⁸ U.S. Congress, House Committee on Small Business, *Full Committee Hearing on the Small Business Administration’s Microloan Program*, 110th Cong., 1st sess., June 14, 2007, H.Hrg. 110-30 (Washington: GPO, 2007),

Program Duplication

Critics of the SBA's Microloan program argue that its direct lending program is duplicative of the SBA's 7(a) loan guarantee program and its marketing, management, and technical training assistance grant program is duplicative of the SBA's training assistance provided through Small Business Development Centers, SCORE (Service Corps of Retired Executives), and Women Business Centers. For example, President George W. Bush proposed to eliminate all funding for the Microloan program in his FY2005, FY2006, and FY2007 budget requests to Congress, arguing that "the 7(a) program is capable of serving the same clientele through the Community Express programs for much lower cost to the Government."⁶⁹ President Bush also proposed to terminate the Microloan program's marketing, management, and technical assistance grant program in his FY2008 and FY2009 budget requests to Congress.⁷⁰

Critics argued in 2007 that about 44% of the SBA's 7(a) program's loan guarantees at that time were for loans under \$35,000 (the Microloan program's former loan limit for borrowers), representing more than 17 times the number of loans issued through the SBA's Microloan program.⁷¹ In their view, the 7(a) program had demonstrated that it can service the needs of small businesses targeted by the SBA's Microloan program.⁷² They also argued that the SBA's Microloan program's marketing, management, and technical assistance grants program was not necessary because the SBA "already supports a nationwide network of resource partners who provide counseling and training to entrepreneurs, including Small Business Development Centers, Women's Business Centers, and SCORE."⁷³ They argued that about 94% of Microloan intermediaries are located within 20 miles of a Small Business Development Center, a Women's Business Center, or a SCORE partner.⁷⁴

Advocates argue that the SBA's Microloan program is complementary, not duplicative, of the SBA's 7(a) loan guarantee program. They assert that Microloan borrowers are particularly disadvantaged when seeking access to capital, often having no credit history or lower credit scores than most applicants for the SBA's 7(a) loan guarantee program.⁷⁵ In their view, it is important that the SBA has a program whose sole focus is to assist Microloan borrowers in

starting microbusinesses and have in place intermediaries that “have essential expertise on the needs of this key demographic.”⁷⁶

Advocates also argue that the SBA’s Microloan marketing, management, and technical assistance grants program is “a crucial element which enables intermediaries to assist microbusiness owners step by step through their development and growth” and “not only increases the likelihood of full repayment of the loan, but augments business survival and success.”⁷⁷ As mentioned, intermediaries typically require Microloan borrowers to participate in the training program as a condition of the receipt of the microloan.

Program Cost

Critics of the SBA’s Microloan program argue that it is expensive relative to other SBA programs, with total administrative costs of about \$7,517 per small business assisted in FY2019, compared to \$1,986 per small business assisted in the SBA’s 7(a) loan guarantee program.⁷⁸ President George W. Bush cited the program’s higher expense when he recommended in his FY2005, FY2006, and FY2007 budget requests to Congress that the program be terminated and when he recommended in his FY2008 and FY2009 budget requests to Congress that the interest rate charged to Microloan intermediaries be increased to make the program “self-financing.”⁷⁹

Advocates argue that the program’s higher cost per small business assisted is unavoidable given the relatively unique nature of the program and the special needs of its borrowers. They assert that intermediaries often have to spend a significant amount of time with Microloan borrowers because those borrowers tend to have less experience with the credit application process and a more difficult time documenting their qualifications for assistance than borrowers in the SBA’s loan guaranty programs. Also, in their view, raising the interest rate charged to intermediaries to make the program self-financing would reduce the program’s cost, but could also defeat the program’s purpose. They assert that because microloans are small, it is difficult for intermediaries to generate enough interest income to cover their costs. As a result, if the interest rate charged to intermediaries is increased, they contend that intermediaries would have to pass the increase on to Microloan borrowers. In their view, increasing the program’s cost to Microloan borrowers “will create an economic hardship for them and make it more difficult for them to grow their businesses” and “lead to fewer jobs created and fewer tax dollars paid.”⁸⁰

Program Administration

On September 28, 2017, the SBA’s Office of Inspector General (OIG) released an audit of the SBA’s administration of the Microloan program, following up on an earlier audit released on December 28, 2009. The OIG reported a number of deficiencies that it argued needed to be addressed “to ensure effective operation of the Microloan program.”⁸¹

In 2009, the OIG found that

- the SBA’s oversight of the Microloan program was focused on the intermediaries’ ability to repay their SBA loans and was limited to a cursory review of quarterly financial reports supported by only one monthly bank statement. The bank statements were used to simply verify the outstanding balances reported on the intermediaries’ quarterly reports. This review process did not allow the SBA to analyze the sources and uses of funds “which is necessary to detect inappropriate fund transfers between the intermediaries’ [Microloan Revolving Funds and Loan Loss Reserve Funds] accounts.”⁸²
- onsite reviews were conducted only when an intermediary defaulted on its SBA loan.
- the program was inadequately staffed, operating at that time “with 6 analysts who oversee more than 160 intermediaries, 460 intermediary loans, and approximately 2,500 microloans per year.”⁸³
- the reported Microloan borrower default rate of 12% “appeared low given the high-risk nature of the program.”⁸⁴
- the audit identified duplicate loan reporting and 92 Microloan borrowers with outstanding microloan balances exceeding the then-\$35,000 limit.
- the SBA’s output performance metrics “do not ensure the ultimate program beneficiaries, the microloan borrowers, are truly assisted by the program” and “without appropriate [outcome performance] metrics, SBA cannot ensure the Microloan program is meeting policy goals.”⁸⁵ The OIG recommended that the SBA “develop additional performance metrics to measure the program’s achievement in assisting microloan borrowers in establishing and maintaining successful small businesses.”⁸⁶

In its 2017 audit, the OIG found that the SBA had taken several actions (see footnote below) to improve its oversight of the Microloan program since the 2009 audit but that the agency still had “internal control weaknesses” that prevented it from conducting “adequate program oversight to measure program performance and ensure program integrity.”⁸⁷

⁸¹ SBA, Office of the Inspector General, “SBA’s Administration of the Microloan Program under the Recovery Act,” p. 3, at <https://www.sba.gov/sites/default/files/oig/om10-10.pdf>.

⁸² *Ibid.*, p. 1.

⁸³ *Ibid.*

⁸⁴ *Ibid.*, p. 4. The OIG found that 1 intermediary made 1,182 microloans valued at over \$11 million since 1993 and only reported slightly more than a 1% historical default rate, and 39 other intermediaries that reported that none of their loans had defaulted.

⁸⁵ *Ibid.*, p. 6.

⁸⁶ *Ibid.*, p. 7.

⁸⁷ SBA, Office of the Inspector General, “Audit of SBA’s Microloan Program,” executive summary, at

Specifically, the OIG audited 14 intermediary lenders and 52 microloan files and found documentation deficiencies, or differences between the information contained in the lender's loan file versus that in the SBA Microloan Program Electronic Reporting System (MPERS) in 44 of the 52 files. The OIG also argued that the audit revealed that inadequate documentation exists to show that the "no credit elsewhere" test had been properly administered; that, in some cases, inadequate supporting documentation existed to show how the microloan funds were used by the borrower; and that, in some cases, interest rates and fees were charged that exceeded the limits allowed under the program rules and regulations.⁸⁸

The identified internal control weaknesses

were due to the SBA not having an overall site visit plan, an adequate information system, available funding for system improvements, or clear Standard Operating Procedures (SOPs). Additionally, SBA management focused on output-based performance measures instead of outcome measures.⁸⁹

The OIG recommended that the SBA (1) continue efforts to improve the information system to include outcome-based performance measurements and ensure the data captured can be used to effectively monitor the Microloan Program compliance, performance, and integrity; (2) develop and implement a site visit plan to comprehensively monitor microloan portfolio performance and ensure program results can be evaluated program-wide; (3) update the Microloan program's SOP 52 00 A to clarify requirements regarding evidence for use of proceeds and credit elsewhere; and (4) update the microloan reporting system manual to reflect current technology capabilities.

The SBA concurred with the four recommendations and targeted September 30, 2019, for full implementation.⁹⁰ For example, the Microloan program's SOP 52 00 B, effective July 1, 2018, clarified requirements regarding evidence for use of proceeds and credit elsewhere and, in 2018, the SBA developed a standardized checklist that district office officials use for carrying out intermediary site visits.⁹¹

https://www.sba.gov/sites/default/files/oig/SBA_OIG_Report_17-19.pdf. The SBA provided the OIG a list of actions taken to improve Microloan program oversight in recent years, including the following: "In 2010, the program office implemented a comprehensive quarterly reporting analysis, which has been completed on a quarterly basis for each active intermediary in the Microloan Program since that time.... This information enables SBA to understand each Intermediary's relative health by displaying historical default rate, delinquency rate, collateral coverage rate, loan loss reserve coverage rate and other valuable risk indicators. Performing this quarterly analysis on every Intermediary has enabled SBA to minimize its losses due to Intermediary non-payment by providing warning signs well before performance issues reach a non-recoverable level. Also in 2010, OEO [the Office of Economic Opportunity] implemented an annual financial statement analysis that OEO staff has completed annually for each Intermediary. This analysis also allows SBA to see potential financial issues well in advance of becoming a problem in order to limit the risk of Intermediary non-payment to SBA. Further, in 2012 OEO designed its first Site Visit Checklist to be used by SBA District Office personnel when conducting annual site visits to the Microloan intermediaries.... In 2013 OEO published its first Microloan Standard Operating Procedure (SOP) since the Program's inception in 1992. This SOP provides guidance to both SBA staff who are involved in managing the Program and the Intermediary lenders who participate. This SOP was updated in 2015 to incorporate changes made to the Microloan Program regulations. In 2014, the Microloan Program Office designed and implemented a grant calculator spreadsheet that is used by both OEO staff and each Intermediary as a project management tool for the technical assistance grants and the Intermediary's quarterly expense billings and performance reports.... OEO conducts monthly webinar sessions with all participating lenders in order to provide Program-related updates, ongoing training and allow for presentation of best practices." ⁹⁰ *Ibid.*, p. 8.

⁹¹ U.S. Government Accountability Office (GAO), *SBA Microloan Program: Opportunities Exist to Strengthen*

In 2019, GAO examined the Microloan program and recommended that the SBA

- “ensure definitions of data collected, such as income, are clear and instructions are comprehensive for data needed, such as for borrower business outcomes and technical assistance,”
- “develop a performance target to assess the Microloan program’s progress in achieving its statutory purpose of assisting women, low-income, veteran, and minority entrepreneurs,”
- “ensure that appropriate advance planning occurs during the development of the new [planned] Microloan program data reporting system ... and considering data needed to assess program performance,”
- “explore opportunities for additional interagency collaboration and information sharing with other federal agencies that engage in microlending activities, such as Treasury and USDA,” and
- “examine ways to incorporate public reporting of additional Microloan program information into the design of the new data reporting system.”⁹²

The SBA agreed to review and enhance Microloan program guidance, including by clearly defining *low-income* (recommendation 1); involve relevant SBA offices in the design and development of the new data reporting system and consider data needed to assess program performance within the SBA (recommendation 3); and examine ways to incorporate public reporting of additional program information (recommendation 5).

The SBA also agreed to provide aggregate demographic and socioeconomic data collected from borrowers, but cited challenges with data collection because of the voluntary nature of the information provided by loan applicants. The SBA did not commit to creating a performance target to assess the program’s progress in achieving its statutory purpose of assisting women, low-income, veteran, and minority entrepreneurs (recommendation 2).

The SBA also indicated that it would continue to seek additional collaboration opportunities with other federal agencies that operate similar programs, but did not commit to systematically collect information on intermediaries’ participation in other similar programs (recommendation 4).⁹³

Legislation

As mentioned, during the 111th Congress, P.L. 111-240, the Small Business Jobs Act of 2010, increased the Microloan program’s loan limit for borrowers from \$35,000 to \$50,000, and increased the loan limit for Microloan intermediaries after their first year of participation in the program from \$3.5 million to \$5 million.⁹⁴ It also temporarily allowed the SBA to waive, in whole or in part through FY2012, the nonfederal share requirement for loans to the Microloan program’s intermediaries and for grants made to Microloan intermediaries for small business marketing, management, and technical assistance under specified circumstances (e.g., the

Program Performance Measurement, Collaboration, and Reporting, GAO-20-49, November 19, 2019, p. 16, at <https://www.gao.gov/products/GAO-20-49>.

⁹² *Ibid.*, pp. 36, 37.

⁹³ *Ibid.*, p. 37

⁹⁴ P.L. 111-240, the Small Business Jobs Act of 2010, §1113. Maximum Loan Limits Under Microloan Program.

economic conditions affecting the intermediary and the intermediary's performance) for up to a fiscal year.⁹⁵

No bills were introduced during the 112th Congress concerning the Microloan program.

During the 113th Congress,

- H.R. 3191, the Expanding Opportunities to Underserved Businesses Act, would have increased the Microloan program's loan limit for borrowers from \$50,000 to \$75,000.
- S. 2487, the Access to Capital, Access to Opportunity Act, would have increased that limit to \$100,000.
- S. 2693, the Women's Small Business Ownership Act of 2014, and its House companion bill, H.R. 5584, would have increased the Microloan program's aggregate loan limit for intermediaries after their first year of participation in the program from \$5 million to \$7 million. These bills would have also removed the requirements that no more than 25% of Microloan technical assistance grant funds may be used to provide information and technical assistance to prospective borrowers or on third-party contracts to provide the assistance.

During the 114th Congress,

- S. 1445, the Microloan Act of 2015, would have removed the requirements that no more than 25% of Microloan technical assistance grant funds may be used to provide information and technical assistance to prospective borrowers or on third-party contracts to provide the assistance. It would have also eliminated the Microloan program's minimum state allocation formula.
- H.R. 2670, the Microloan Modernization Act of 2015, and its companion bill in the Senate (S. 1857) would have increased the Microloan program's aggregate loan limit for intermediaries after their first year of participation in the program from \$5 million to \$6 million, increased the program's repayment terms from not more than 6 years to not more than 10 years for loans greater than \$10,000, and require the SBA Administrator to establish a rule enabling intermediaries to apply for a waiver of the requirement that no more than 25% of Microloan technical assistance grant funds may be used to provide information and technical assistance to prospective borrowers. The House passed H.R. 2670 on July 13, 2015. S. 1857 was reported by the Senate Committee on Small Business and Entrepreneurship on July 29, 2015.
- S. 2850, the Microloan Program Modernization Act of 2016, would have increased the Microloan program's aggregate loan limit for intermediaries after their first year of participation in the program from \$5 million to \$6 million;

⁹⁵ P.L. 111-240, §1401. Matching Requirements Under Small Business Programs. During the 111th Congress, H.R. 3854, the Small Business Financing and Investment Act of 2009, passed by the House by a vote of 389-32, on October 29, 2009, would have increased the Microloan program's loan funding to "such sums as may be necessary" to support \$110 million in direct microloans in FY2010 and \$110 million in FY2011, increased the program's technical assistance grant funding to \$80 million in FY2010 and \$80 million in FY2011, authorized \$20 million (\$10 million in FY2010 and \$10 million in FY2012) for a new Microloan interest assistance grant program, broadened the eligibility requirements for Microloan intermediaries to qualify for lower interest rates, increased the program's maximum loan amount to intermediaries during their first year in the program from \$750,000 to \$1 million, and in later years from an aggregate of \$3.5 million to \$7 million, and increased the percentage of technical assistance grant funds that an intermediary can spend on prospective borrowers from 25% to 35%, and on the provision of technical assistance through third-party providers from 25% to 35%.

eliminated the requirements that intermediaries spend no more than 25% of Microloan technical assistance grant funds on technical assistance to prospective borrowers and no more than 25% of those funds on third-party contracts for technical assistance; required the SBA to study and report on the operations of a representative sample of Microloan intermediaries and other intermediaries and make recommendations on how to reduce costs associated with intermediaries' participation in the program and to increase intermediary participation in the program; and required the Government Accountability Office to study and report on the SBA's oversight of the program, SBA's processes to ensure intermediary compliance with program rules and regulations, and the program's overall performance.

During the 115th Congress,

- P.L. 115-141, the Consolidated Appropriations Act, 2018, relaxed the requirements that intermediaries spend no more than 25% of Microloan technical assistance grant funds on technical assistance to prospective borrowers and no more than 25% of those funds on third-party contracts for technical assistance by increasing those percentages to 50%. These provisions were originally in H.R. 2056, the Microloan Modernization Act of 2017, and S. 526, its companion bill in the Senate (as amended in committee).
- P.L. 115-232, the John S. McCain National Defense Authorization Act for Fiscal Year 2019, among other provisions, increased the Microloan program's aggregate loan limit for intermediaries after their first year of participation in the program from \$5 million to \$6 million. These provisions were originally in H.R. 2056, the Microloan Modernization Act of 2017, and S. 526, its companion bill in the Senate.

During the 116th Congress,

- P.L. 116-136, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), among other provisions, appropriated \$17 billion to pay the principal, interest, and any associated fees that are owed on an existing 7(a), 504/CDC, or Microloan that is in a regular servicing status for a six-month period starting on the next payment due date.⁹⁶
- P.L. 116-139, the Paycheck Protection Program and Health Care Enhancement Act, among other provisions, increased the Paycheck Protection Program's (PPP) authorization limit from \$349 billion to \$659 billion. The act also required that no less than \$30 billion of that amount be set aside for loans issued by "community financial institutions," including community development financial institutions, minority depository institutions, SBA-certified development companies, microloan intermediaries, and small insured depository institutions and credit unions, defined as having consolidated assets of less than \$10 billion.⁹⁷ This provision was designed to provide underserved populations greater access to PPP loans.

⁹⁶ For additional information about the CARES Act, see CRS Report R46284, *COVID-19 Relief Assistance to Small Businesses: Issues and Policy Options*, by Robert Jay Dilger, Bruce R. Lindsay, and Sean Lowry.

⁹⁷ For additional information about the set aside requirements, see CRS Insight IN11355, *Paycheck Protection Program (PPP) Lending Set Asides for Community Development Financial Institutions (CDFIs)*, by Sean Lowry.

- S. 996, the Microloan Program Enhancement Act of 2019, would, among other provisions, eliminate the restriction that prevents the SBA from distributing more than \$800,000 or 1/55th of available loan funds (whichever is less) in any state during the first half of each fiscal year. The bill also would increase the annual cap on the total amount that may be committed to an intermediary to provide loans from \$2.5 million to \$3 million, and the intermediary’s aggregate loan amount after its first year of participation in the program from \$6 million to \$7 million. The bill also would authorize \$80 million for Microloan technical assistance grants and \$110 million for Microloan direct loans in each of FY2020-FY2022, and require the SBA to annually report information related to the Microloan program to the House and Senate Committees on Small Business and on the SBA’s public website.

Concluding Observations

In recent years, congressional debate concerning proposed changes to the SBA’s loan guaranty programs, including the Microloan program, has centered on the likely impact the proposed changes will have on small business access to capital, job retention, and job creation. As a general proposition, some have argued that it is imperative that the SBA be provided additional resources to assist small businesses in acquiring capital necessary to start, continue, or expand operations and create jobs.⁹⁸ Others have worried about the long-term adverse economic effects of spending programs that increase the federal deficit. They advocate business tax reduction, reform of financial credit market regulation, and federal fiscal restraint as the best means to assist small business economic growth and job creation.⁹⁹

In terms of specific program changes, the provisions enacted in P.L. 111-240 (allowing the SBA to temporarily waive the Microloan program’s nonfederal share matching requirements, increasing the loan limit for borrowers from \$35,000 to \$50,000, and increasing the loan limit for intermediaries after their first year of participation in the program from \$3.5 million to \$5 million), P.L. 115-141 (relaxing restraints on the use of technical assistance grants), P.L. 115-232 (increasing the loan limit for intermediaries after their first year of participation in the program from \$5 million to \$6 million) and P.L. 116-136 (providing six months of loan payments) are all designed to create jobs by enhancing micro borrowers’ access to capital and technical training assistance.

Determining how specific changes in federal policy are most likely to lead to job creation is a challenging question. For example, a 2008 Urban Institute study concluded that differences in the term, interest rate, and amount of SBA financing “was not significantly associated with increasing sales or employment among firms receiving SBA financing.”¹⁰⁰ However, they also reported that

⁹⁸ Rep. Nydia Velázquez, Small Business Financing and Investment Act of 2009,” House debate, *Congressional Record*, daily edition, vol. 155, no. 159 (October 29, 2009), pp. H12074, H12075; Senator Mary Landrieu, “Statements on Introduced Bills and Joint Resolutions,” remarks in the Senate, *Congressional Record*, daily edition, vol. 155, no. 185 (December 10, 2009), p. ¹⁰⁰ Shelli B. Rossman and Brett Theodos, with Rachel Brash, Megan Gallagher, Christopher Hayes, and Kenneth Temkin, *Key Findings from the Evaluation of the Small Business Administration’s Loan and Investment Programs*:

their analysis accounted for less than 10% of the variation in firm performance. The Urban Institute suggested that local economic conditions, local zoning regulations, state and local tax rates, state and local business assistance programs, and the business owner's charisma or business acumen also "may play a role in determining how well a business performs after receipt of SBA financing."¹⁰¹

As the Urban Institute study suggests, given the many factors that influence business success, measuring the SBA's Microloan program's effect on job retention and creation is complicated. That task is made even more challenging by the absence of performance-oriented measures that could serve as a guide.

The SBA's Office of Inspector General has recommended that the SBA adopt performance-oriented measures, specifically recommending that the SBA track the number of Microloan borrowers who remain in business after receiving a microloan to measure the extent to which the Microloan program contributed to their ability to stay in business. It has also recommended that the SBA require intermediaries to report the technical assistance provided to each Microloan borrower and "use this data to analyze the effect technical assistance may have on the success of Microloan borrowers and their ability to repay microloans."¹⁰² Other performance-oriented measures that Congress might also consider include requiring the SBA to survey Microloan borrowers to measure the difficulty they experienced in obtaining a loan from the private sector; the ease or difficulty of finding, applying, and obtaining a microloan from an intermediary; and the extent to which the microloan or technical assistance received contributed to their ability to create jobs or expand their scope of operations.

EveryCRSReport.com

The Congressional Research Service (CRS) is a federal legislative branch agency, housed inside the Library of Congress, charged with providing the United States Congress non-partisan advice on issues that may come before Congress.

EveryCRSReport.com republishes CRS reports that are available to all Congressional staff. The reports are not classified, and Members of Congress routinely make individual reports available to the public.

Prior to our republication, we redacted phone numbers and email addresses of analysts who produced the reports. We also added this page to the report. We have not intentionally made any other changes to any report published on EveryCRSReport.com.

CRS reports, as a work of the United States government, are not subject to copyright protection in the United States. Any CRS report may be reproduced and distributed in its entirety without permission from CRS. However, as a CRS report may include copyrighted images or material from a third party, you may need to obtain permission of the copyright holder if you wish to copy or otherwise use copyrighted material.

Information in a CRS report should not be relied upon for purposes other than public understanding of information that has been provided by CRS to members of Congress in connection with CRS' institutional role.

EveryCRSReport.com is not a government website and is not affiliated with CRS. We do not claim copyright on any CRS report we have republished.
